This book examines consumer behavior using the "life course" paradigm, a multidisciplinary framework for studying people's lives, structural contexts, and social change. It contributes to marketing research by providing new insights into

the study of consumer behavior and illustrating how to apply the life course paradigm's concepts and theoretical perspectives to study consumer topics in an innovative way. Although a growing number of marketing researchers, either implicitly or explicitly, subscribe to life course perspectives for studying a variety of consumer behaviors,

their efforts have been limited due to a lack of theories and methods that would help them study consumers over the lifecycle. When studying consumers over their lifespan, researchers examine differences in the consumer behaviors of various age groups (e.g., children, baby boomers, elderly, etc.) or family life stages (e.g., bachelors, full

nesters, empty nesters, etc.), inferring that consumer behavior changes over time or linking consumption behaviors to previous experiences and future expectations. Such efforts, however, have yet to benefit from an interdisciplinary research approach. This book fills this gap in consumer research by informing readers about the differences between some of the most commonly

used models for studying consumers over their lifespan and the life course paradigm, and providing implications for research, public policy, and marketing practice. Presenting applications of the life course approach in such research topics as decision making, maladaptive behaviors (e.g., compulsive buying, binge eating), consumer well-being, and cognitive decline, this book is

beneficial for students, scholars, professors, practitioners, and policy makers in consumer behavior, consumer research, consumer psychology, and marketing research. Clicker Training for Dogs Harvard University Press After being jilted by her fiancée, Autumn Maguire uses her non-refundable honeymoon tickets to explore Paris on her own. Eager to

experience the true bohemian lifestyle, she answers an ad for an artist's model. When she exchanges her clothes for the artist's lush red cloak, something strange happens a feeling of intense sensual reawakening overcomes her. Suddenly lightning strikes and through the power of black magic she's thrust back into the nineteenth century where the scandalous

painter Paul Borquet is insisting she become his Titian-haired muse. Between everyone's strange clothing, the claustrophobic Parisian streets and the overpowering pull of sexual desire, Autumn can't process just where the heck is she and how did she get here? And frankly, with Paul's expert caresses imprinted on her body, does she really care about going

back to present day? House Of Dreams Routledge This contributed volume discusses essential topics and the fundamentals for Big Data Emergency Management and primarily focusses on the application of Big Data for Emergency Management. It walks the reader through the state of the art, in different facets of the big disaster data field. This includes many

elements that are important for these technologies to have real-world impact. This book brings together different computational techniques from: machine learning, communication network analysis, natural language processing, knowledge graphs, data mining, and information visualization, aiming at methods that are typically used for processing big emergency data. This

book also provides authoritative insights and highlights valuable lessons by distinguished authors, who are leaders in this field. Emergencies are severe, large-scale, non-routine events that disrupt the normal functioning of a community or a society, causing widespread and overwhelming losses and impacts. Emergency Management is the process of planning and taking

actions to minimize the social and physical impact of emergencies and reduces the community's vulnerability to the consequences of emergencies. Information exchange before, during and after the disaster periods can greatly reduce the losses caused by the emergency. This allows people to make better use of the available resources, such as relief materials and

medical supplies. It also provides a channel through which reports on casualties and losses in each affected area, can be delivered expeditiously. Big Data-Driven Emergency Management refers to applying advanced data collection and analysis technologies to achieve more effective and responsive decision-making during emergencies. Researchers, engineers and computer

scientists working in Big Data Emergency Management, who need to deal with large and complex sets of data will want to purchase this book. Advanced-level students interested in data-driven emergency/crisis/disaster management will also want to purchase this book as a study guide. **Love is Just a Word** Harlequin In the tiny hamlet of Aswat, far to the south of the royal

capital, a beautiful young girl wants more than the meagre prospects her village offers. Determined and resourceful, she is quick to leap upon an opportunity when the great seer Hui, who is also physician to Pharaoh, visits Aswat to commune with its god, Wepwawet. Taken under Hui's wing to become a healer, she has no idea of his real plans for her—plans that will bring her close to

Pharaoh as his favourite concubine, but will ultimately enmesh her in court intrigue of the most dangerous kind. House of Dreams is a powerful story of passion and jealousy, rich with the details of Ancient Egyptian life.

Historical Developments in Singular Perturbation

Springer Science & Business Media
The study of Goethe's life is a task that each generation must

undertake anew. Thus writes Richard Friedenthal, author of this rich biography. Spanning eight momentous decades of war, revolution, and social upheaval, Goethe's life reveals itself as one of conflict and dynamic development, of inner contradiction and unceasing creativity. As novelist, dramatist, and poet, Goethe produced epochal works of fiery romanticism,

only later to dedicate himself to a classical ideal of purity and measure. His superb love lyrics immortalize a succession of ardent relationships; yet, in him too, was a strain of frigid egotism mingled with an Olympian detachment. The new introduction serves to place in perspective this outstanding work on the German master. He was capable of tirelessly exploring the

external world as physiologist, geologist, and botanist. He was equally capable of plunging to the depths of profound subjective analysis. A minister of state, a model of distinguished probity, Goethe nonetheless lived a life of passionate seeking, eternally questioning official values. Nothing perhaps better sums up this vast complexity than his lifelong work,

Faust, the supreme dramatization of man's quest on earth.

Modernity is made and unmade by the anecdotal. Conceived as a literary genre, a narrative element of criticism, and, most crucially, a mode of historiography, the anecdote illuminates the convergences as well as the fault lines cutting across modern practices of knowledge production. The 'Sailor Prince' in the Age of Empire
Vintage
Canada
This engaging text describes

the development of singular perturbations, including its history, accumulating literature, and its current status. While the approach of the text is sophisticated, the literature is accessible to a broad audience. A particularly valuable bonus are the historical remarks. These remarks are found throughout the manuscript. They demonstrate the growth of mathematical thinking on

this topic by engineers and mathematicians. The book focuses on detailing how the various methods are to be applied. These are illustrated by a number and variety of examples. Readers are expected to have a working knowledge of elementary ordinary differential equations, including some familiarity with power series techniques, and of some advanced calculus. Dr.

O'Malley has written a number of books on singular perturbations. This book has developed from many of his works in the field of perturbation theory. <u>Swann</u> "O'Reilly Media, Inc." This book explores the puzzling phenomenon of the remarkable revival of monarchy in nineteenth-century Europe through a new prism: the public persona of the 'Sailor Prince'. It	highlights how four usually overlooked dynastic figures – the younger sons and brothers of monarchs such as Queen Victoria or Emperor William II – decisively helped to advertise their respective dynasties in the fiercely contested political and popular mass market, by aligning them with one of the most myth-invested cultural presences and power-political symbols of the Age of Empire: the navy. The	'Sailor Prince' in the Age of Empire traces the unusual professional careers, the adventurous empire travels and the multifaceted public representations of Prince Alfred of Britain (1844-1900), Prince Heinrich of Prussia (1862-1929), Prince Valdemar of Denmark (1858-1939) and Prince Georgios of Greece (1869-1957). Through the prism of these four personality

brands, the study also investigates issues such as the role of the maritime sphere in national identity, the nature and extent of nineteenth-century monarchical modernization, the relevance of intra- and inter-imperial royal diplomacy in the Age of High Imperialism, and the curious collaboration of middle-class opinion-makers and entrepreneurs with Europe's

monarchical establishment. Dark Kiss Scholastic UK Includes a new section on clicker training. *Big Data in Emergency Management: Exploitation Techniques for Social and Mobile Data* Basic Books In this book the author investigates the role of entrepreneurship in the socio-economic development of emerging economies, highlighting its vital part in implementing development programs and

policy initiatives. In search of efficient ways to stimulate entrepreneurial activities, *Entrepreneurship in Emerging Economies* reviews recent academic research and accumulated policy implementation experiences to identify measures and instruments which can be adopted within emerging countries' institutional context. Particular attention is given to three issues which

have dominated the debate on the macroeconomic impact of entrepreneurship at the turn of the twenty-first century: job creation, innovation, and international trade and economic cooperation. In the final chapter the author offers a holistic model of entrepreneurship policy to address the particular needs of emerging economies, encompassing entrepreneurship policy, favourable

institutional environments and pragmatic principles for implementing selective policy measures. Straight Time Endeavour If you could choose one person to bring back to life, who would it be?
