AUTUMN BRADFORD

Ecotourism in Rajaji Tiger Reserve OrangeBooks Publication

The book is a collection of articles analysing recent developments and key features of Indian economy & business. The book also contains brief case studies on corporate failures of recent times, analysis of mergers & acquisitions, Industry analysis and analysis of key international developments. The book attempts to reach out to all youngsters, particularly, those appearing in Management, Banking, Civil Services and similar entrance exams. I am sure this would go a long way in helping you prepare for these exams. Apart from that, the book would also be an extremely useful read for those already in various management institutes or studying Economics, Finance, Business etc. This would not only prepare them for their job interviews but also because it is important for all the youngsters to have a broad understanding of these issues to evolve as smarter professionals.

Analytics in Finance and Risk Management CRC Press

This study proceeds on Campbell's (2002) argument that in today's biodiversity conservation discourse, the traditional exclusionary conservation narrative co-exists with a counter-narrative on sustainable use through ecotourism. Based on the perception of a global biodiversity crisis the conservation landscape has seen the resurgence of the traditional conservation discourse, which reinforces the argument against social objectives of conservation and for an exclusionary conservation approach drawing on the notion of wilderness. Local resource use practices are restricted or prohibited, while ecotourism is considered the most sustainable option. However, as a proposed alternative livelihood strategy for local residents, ecotourism often fails to deliver on claims that it significantly benefits local development, while it may be more conducive to furthering ecological imperatives. Based on an analysis of the management of Komodo National Park, Indonesia, and the development of communities within the Park, this study argues that ecotourism may only be a politically attractive slogan that provides conservation agencies with the political and economic justification for an exclusionary protected area management approach. Instead of taking into account economic, social and cultural concerns of local residents, a conservation regime that adopts ecotourism as a conservation strategy may ultimately leave local people struggling to meet their present needs.

Business and Management in Asia: Digital Innovation and Sustainability IIED

This book focuses on digital innovation and sustainability in the Asian region in the context of business and management. Managers and policy makers rely on digital technologies to face the region's sustainability challenges and solve sustainability problems. From business perspective, sustainability is defined as the adoption of business strategies, activities, and operations that meet the needs of the firm and its stakeholder today while protecting, sustaining, and enhancing the human and natural resources that will be needed in the future. Digital innovation refers to the application of digital technologies to existing business problems as well as the development of the firm's strategy, culture, and human resources talent to deal and use digital technologies to solve sustainability issues. There is a consensus among scholars and practitioners that organizations need digital innovation to stay competitive. Businesses that are digital innovators consider new ways to solve old and new sustainability problems facing the Asian region. This book, with its practical examples, gives the reader impulses for new Asian's approaches and encourages the readers to dare to think and act in new ways. This book is the first annual compilation of innovative ideas and valuable managerial solutions produced by the region's managers and decision-makers who think and act creatively, helmed by Tobias Endress and Yuosre F. Badir from the School of

Management at the Asian Institute of Technology.

Evaluating Eden Series Belmont, Calif. : Lifetime Learning Publications

This textbook has been designed to meet the needs of B.Sc. (Hons.) First Semester students of Zoology as per the UGC Choice Based Credit System (CBCS). Comprehensively written, it explains the essential principles, processes and methodology of Acoelomate Non-Chordates along with Protista, and Ecology. This textbook is profusely illustrated with well-drawn labelled diagrams, not only to supplement the descriptions, but also for sound understanding of the concepts.

Psychological Experiences and Responses in the Global South Amidst and Ahead of the Covid-19 Pandemic IGI Global

Business Finance Is An Essential Part Of Life. It Plays A Vital Role In Business As Well As Human Life. Each Activity Either Business Or Human Life Is Based On Finance. Therefore, It Is Considered As A Life Blood Of Business. Generally, Business Finance Is The Study Of Financial Management Of Enterprises Being Run With The Prime Objective Of Earning Profit. In The Present Book All The Elements Of Business Finance Such As Fund Flow Statement; Capital Structure, Financial Statement Analysis And Long-Term Investment Decisions Have Been Discussed After A Detailed Study Of Assumptions And Principles Of Business Finance. For An Exhaustive Study, We Have Used A Simple Language Which Is Easy To Understand The Basic Concepts And Principles Of Business Finance. Charts, Figures And Diagrams Have Also Being Included For Easy Understanding. Contents · Long-Term Investment Decisions · Funds Flow Statement · Cash Flow Statement · Capital Structure & Cost Of Capital · Social And Human Aspects Of Business Finance · Financial Statement Analysis · Bibliography The Book Will Be Useful For Teachers And Students Of B.Com., Bba, Bbm, Mba Of Different Indian Universities.

Managing in Recovering Markets Springer

Software engineering has surfaced as an industrial field that is continually evolving due to the emergence of advancing technologies and innovative methodologies. Scrum is the most recent revolution that is transforming traditional software procedures, which has researchers and practitioners scrambling to find the best techniques for implementation. The continued development of this agile process requires an extensive level of research on up-to-date findings and applicable practices. Agile Scrum Implementation and Its Long-Term Impact on Organizations is a collection of innovative research on the methods and applications of scrum practices in developing agile software systems. The book combines perspectives from both the academic and professional communities as the challenges and solutions expressed by each group can create a better understanding of how practice must be applied in the real world of software development. While highlighting topics including scrum adoption, iterative deployment, and human impacts, this book is ideally designed for researchers, developers, engineers, practitioners, academicians, programmers, students, and educators seeking current research on practical improvements in agile software progression using scrum methodologies.

Bibliography, Wildlife and Protected Area Management in Madhya Pradesh New Delhi : Sultan Chand, [pref. 1978]

Member States intending to introduce a nuclear power programme will need to pass through several phases during the implementation. Experience shows that careful planning of the objectives, roles, responsibilities, interfaces and tasks to be carried out in different phases of a nuclear project is important for success. This publication presents a harmonized approach that may be used to structure the owner/operator management system and establish and manage nuclear projects and their development activities irrespective of the adopted approach. It has been developed from shared management practices and consolidated experiences provided by nuclear project management specialists through a series of workshops and working groups organized by

the IAEA. The resultant publication presents a useful framework for the management of nuclear projects from initiation to closeout and captures international best practices.

Evidence-based Conservation International Atomic Energy Agency

The book 'Ecotourism in Rajaji Tiger Reserve' is a unique and unusual blend of field work, observations and research on various aspects of ecotourism in Rajaji Tiger Reserve and possible approaches for its implementation. Written in an easy style, the book is of equal interest to the expert and the layperson. The author, a Scientist with the Ministry of Environment, Forest and Climate Change, spent more than a decade working in the Rajaji Tiger Reserve. Book gives a broader insight in to the ecotourism promotion and wildlife conservation. The nature-based attraction sites for tourists in and around the reserve, priority interventions, code of ethics and risk management documented in the book reflect a roadmap for better management of the Rajaji Tiger Reserve and in minimizing the man-animal conflict in north India.

The Journal of the Bombay Natural History Society Pointer Publishers

The basis of this book is the disparity between the science of conservation biology and the design and execution of biodiversity conservation projects in the field. The book argues for an 'evidence-based approach', drawing information from fifteen projects in the Lower Mekong regions, with the aim of allowing more effective integrated conservation projects.

Business India Wildlife Institute of India

Due to the increasing importance of product differentiation and collapsing product life cycles, a growing number of value-adding activities in the industry and service sector are organized in projects. Projects come in many forms, often taking considerable time and consuming a large amount of resources. The management and scheduling of projects represents a challenging task, and project performance may have a considerable impact on an organization's competitiveness. This handbook presents state-of-the-art approaches to project management and scheduling. More than sixty contributions written by leading experts in the field provide an authoritative survey of recent developments. The book serves as a comprehensive reference, both, for researchers and project management professionals. The handbook consists of two volumes. Volume 1 is devoted to single-modal and multi-modal project scheduling. Volume 2 presents multi-project problems, project scheduling under uncertainty and vagueness, managerial approaches and a separate part on applications, case studies and information systems.

Urban Hydrology, Watershed Management and Socio-Economic Aspects Routledge

This book presents contemporary issues and challenges in finance and risk management in a time of rapid transformation due to technological advancements. It includes research articles based on financial and economic data and intends to cover the emerging role of analytics in financial management, asset management, and risk management. Analytics in Finance and Risk Management covers statistical techniques for data analysis in finance It explores applications in finance and risk management, covering empirical properties of financial systems. It addresses data science involving the study of statistical and computational models and includes basic and advanced concepts. The chapters incorporate the latest methodologies and challenges facing financial and risk management and illustrate related issues and their implications in the real world. The primary users of this book will include researchers, academicians, postgraduate students, professionals in engineering and business analytics, managers, consultants, and advisors in IT firms, financial markets, and services domains.

Agile Scrum Implementation and Its Long-Term Impact on Organizations Springer

This book constitutes the joint refereed proceedings of the Second International Conference on Modeling and Simulation of Social-Behavioral Phenomena in Creative Societies, MSBC 2022, held in Vilnius, Lithuania, in September 2022. The 14 full papers and 1 short paper presented were

carefully reviewed and selected from 35 submissions. The papers are organized in the following topical sections: simulation of behavioral processes; modeling of sustainability; and data science and modeling.

[Trust Management](#) Springer

This book surveys the current state-of-the-art in operations research. The book summarizes the current developments and theoretical achievements in the field, including project uncertainty and grid resource management. It further covers the range of the key models in the field, including deterministic, probabilistic, single- and multi-mode, single- and multi-objective, and a general model on discrete-continuous resources.

Perspectives in Modern Project Scheduling Notion Press

Written by renowned experts in the field of photon management in solar cells, this one-stop reference gives an introduction to the physics of light management in solar cells, and discusses the different concepts and methods of applying photon management. The authors cover the physics, principles, concepts, technologies, and methods used, explaining how to increase the efficiency of solar cells by splitting or modifying the solar spectrum before they absorb the sunlight. In so doing, they present novel concepts and materials allowing for the cheaper, more flexible manufacture of solar cells and systems. For educational purposes, the authors have split the reasons for photon management into spatial and spectral light management. Bridging the gap between the photonics and the photovoltaics communities, this is an invaluable reference for materials scientists, physicists in industry, experimental physicists, lecturers in physics, Ph.D. students in physics and material sciences, engineers in power technology, applied and surface physicists.

[NUREG/CR. EQUATIONS](#)

Organizations of all types are consistently working on new initiatives, product lines, or implementation of new workflows as a way to remain competitive in the modern business environment. No matter the type of project at hand, employing the best methods for effective execution and timely completion of the task at hand is essential to project success. *Project Management: Concepts, Methodologies, Tools, and Applications* presents the latest research and

practical solutions for managing every stage of the project lifecycle. Emphasizing emerging concepts, real-world examples, and authoritative research on managing project workflows and measuring project success in both private and public sectors, this multi-volume reference work is a critical addition to academic, government, and corporate libraries. It is designed for use by project coordinators and managers, business executives, researchers, and graduate-level students interested in putting research-based solutions into practice for effective project management.

[Recent Threats to the Rajiv Gandhi National Park in Nagarhole, Karnataka, India: Taj Group of Hotels and Others](#) Springer

"The book has relevance to academics, scholars, administrators, policy experts, anthropologists, sociologists, development scientists, environmentalists as well as anyone interested in the welfare of communities residing in the vicinity of a Protected Area. It stands out as a work that will stand the test of time and should be an asset that many would like to keep. Dr. Abhik Ghosh Professor and Chairperson Department of Anthropology Panjab University Chandigarh This book is an excellent compilation of the outcome of the intense research work undertaken in the emerging field of Community Based Ecotourism Management at The UNESCO World Heritage Site, The Great Himalayan National Park and it will certainly be useful to provide necessary information, future research, road map and guidelines for all the stakeholders for effective planning and implementation of sustainable ecotourism. Ajay Srivastav Faculty, Wildlife Institute of India, Dehradun Former Director, Great Himalayan National Park"

Principles of Business Finance ibidem-Verlag / ibidem Press

The COVID-19 pandemic has led to increased strain and mental health problems due to changing working conditions. Given the existential nature of the pandemic, it remains crucial to establish employee effectiveness, resilience, and agility and to particularly understand the long-term psychological impact the pandemic might have on workplaces. It is essential to recognize how workplaces cope with work-from-home challenges and hybrid working beyond the crises. Building a narrative in our understanding of the psychological, cognitive, and physical experiences and

responses of workplaces is critical. It provides the opportunity to help craft the way forward for organizations and employees.

Modeling and Simulation of Social-Behavioral Phenomena in Creative Societies MDPI

Market: project managers, construction managers, business managers, special projects managers, and strategic planner Thirty percent of the book is drawn from international projects Covers non-traditional industries such as health care, educational systems, media and entertainment, and computers and communications

Project Management, Planning and Control John Wiley & Sons

The book brings together high-quality research articles on advanced hydrological analysis, advanced computational methods, and the ecological and sociological aspects of urban watershed management under one umbrella. The rapid pace of urbanization, not accompanied by any farsighted, holistic plan, has reduced many cities in the developing world into multi-hazard areas. The most perceptible consequence of urbanization is the change in land-use and land cover, which in turn impacts hydrological systems. Accordingly, scientific studies on urban hydrology with due emphasis on ecological and sociological aspects under changing climate are vital to the appropriate design of urban landscapes and civil infrastructure works. This book addresses precisely these issues, offering a useful guide for environmentalists, hydrologists, and a broad range of socio-economic scientists exploring the environmental vulnerabilities arising from urbanization.

Management of Nuclear Power Plant Projects Frontiers Media SA

This book presents a rich collection of studies on the analysis of sustainable development from a multiple criteria decision-making (MCDM) perspective, written by some of the most prominent authors in the field of MCDM/A. The book constitutes a unique international reference guide to the analysis, measurement, and management of sustainability in a multidimensional decision analysis context. Chiefly intended for academics and policymakers, it reflects some of the latest methodological advances in decision-making, which are illustrated in real-life applications to sustainability-related topics in both the private and public sector.
