In August 1963, one of the best-selling aircraft of British civil aviation, the BAC One-Eleven, took to the skies for the first time. With an order book for sixty aircraft, more than half were from the United States, which was an unprecedented situation for a British civil aircraft. The first project for the newly formed British Aircraft Corporation, the One-Eleven was wholly designed and built by BAC, and remained in production throughout the entire seventeen-year history of the

organisation, performing strongly even when profits were at a low. After flying commercially in Europe for the last time in March 2002, here the One-Eleven is celebrated in style.

This new directory is the first to present a database of significant companies, throughout Europe, which provide equipment or services for the identification, assessment, and remediation of contaminated land. Such land is now recognised in Europe as suffering major planning and economic blight. Which are the companies that are able to offer effective technology for the remediation of

contaminated land? Which manufacturers have products suitable for the cleanup of certain particularly hazardous contaminants? The directory presents detailed information on the contaminated land remediation industry in Europe, with typical data for companies including: Name of organisation; Address; Telephone, telex, fax; Senior management contact names; Number of employees; Number of branches; 7. Sales value; 8. Parent company; 9. Holding company. 10. Year of foundation; Subsidiaries; Membership of national and trade associations; Quality standards attained; Main business activities; Description of activities; Zones of contamination

dealt with; Basic types of contaminant products; Forms of contaminant handled; Treatment: handling and disposal facilities provided; Contaminated site management: types of contaminant and treatment methods used; Products: equipment, plant and materials; Services; Client sector. Shorter entries covering some companies include less detailed information. It is extensively indexed. Northern Spotted Owl Management Plan in the National Forests (CA,OR,WA) Routledge Project Management for Engineering, Business and Technology is a highly regarded textbook that addresses project management across all industries. First covering the essential background, from origins and philosophy to methodology, the bulk of the book is dedicated to concepts and techniques for practical application. Coverage includes project initiation and proposals, scope and task definition, scheduling, budgeting, risk analysis, control, project selection and portfolio management, program management, project organization, and all-important "people" aspects—project

leadership, team building, conflict resolution, and stress management. The systems development cycle is used as a framework to discuss project management in a variety of situations, making this the go-to book for managing virtually any kind of project, program, or task force. The authors focus on the ultimate purpose of project management—to unify and integrate the interests, resources and work efforts of many stakeholders, as well as the planning, scheduling, and budgeting needed to accomplish overall project goals. This sixth edition features: updates throughout to cover the latest developments in project management methodologies; a new chapter on project procurement management and contracts; an expansion of case study coverage throughout, including those on the topic of sustainability and climate change, as well as cases and examples from across the globe, including India, Africa, Asia, and Australia; and extensive instructor support materials, including an instructor's manual, PowerPoint slides, answers to chapter review questions and a

test bank of questions. Taking a technical yet accessible approach, this book is an ideal resource and reference for all advanced undergraduate and graduate students in project management courses, as well as for practicing project managers across all industry sectors. *The Works of Hubert Howe Bancroft: History of Arizona and New Mexico. 1889* AMACOM Div American Mgmt Assn This book constitutes the joint refereed proceedings of six international workshops held as part of OTM 2003 in Catania, Sicily, Italy, in November 2003. Current Concepts in Pulmonary Pathology, An Issue of Surgical Pathology Clinics - E-Book  
BRILL

This book focuses on the modern clinical management of acute and chronic pain syndromes. It not only presents information in a clinically illuminating format, but in a manner that is cognizant of the current prescription opioid epidemic. Divided into seven sections, this book covers acute pain, common pain conditions, regional pain problems, interdisciplinary evaluation and treatment, medical treatments and pain in different stages of life. Concluding with the exploration of several special topics, the last section includes an important discussion on the regulatory and legal issues in the use of controlled substances. Chapters are concise and relevant, with an emphasis on treatment based upon evidence

from clinical trials and interpretation by practitioners in the field. Expertly written text is further supplemented by high-quality figures, images and tables outlining proven treatments with drug, dose or other information describing details of treatment. Timely, informative, and socially conscious, *Pain Management for Clinicians: A Guide to Assessment and Treatment* is a valuable reference for clinicians who manage patients with chronic and common pain problems.

Toczek provides the first description of the entire battle of Ap Bac and places it in the larger context of the Vietnam War. The study thoroughly examines the January 1963 battle, complete with detailed supporting

maps. Ironically, Ap Bac's great importance lies in American policymakers' perception of the battle as unimportant; for all their intelligence and drive, senior American government officials missed the early warning signs of a flawed policy in Southeast Asia by ignoring the lessons of the defeat of the South Vietnamese Army (ARVN) on 2 January 1963. The outcome of Ap Bac was a direct reflection of how the U.S. Army organized, equipped, and trained the ARVN. With all the ARVN

officer corps's shortcomings, the South Vietnamese Army could not successfully conduct an American combined arms operations against a smaller, less well-equipped enemy. American leadership, both military and civilian, failed to draw any connection between ARVN's dismal performance and American policies toward South Vietnam. Although certain tactical changes resulted from the battle, the larger issue of American policy remained

unchanged, including the structure of the advisory system.
