This comprehensive text explains the principles and practice of Web services and relates all concepts to practical examples and emerging standards. Its discussions include: Ontologies Semantic web technologies Peer-to-peer service discovery Service selection Web structure and link analysis Distributed transactions Process modelling Consistency management. The application of these technologies is clearly explained within the context of planning, negotiation, contracts, compliance, privacy, and network policies. The presentation of the intellectual underpinnings of Web services draws from several key disciplines such as databases, distributed computing, artificial intelligence, and multi-agent systems for techniques and formalisms. Ideas from these disciplines are united in the context of Web services and service-based applications. Featuring an accompanying website and teacher's manual that includes a complete set of transparencies for lectures, copies of open-source software for exercises and working implementations, and resources to conduct course projects, this book makes an excellent graduate textbook. It will also prove an invaluable reference and training tool for practitioners.

How Service Orientation Will Change Your Business "The real value of this book is that it makes SOA and Webservices, which are critical and business-transforming, crystal-clear to the layman, both business and IT leaders. The book stays focused on the real-world issues facing business and government institutions today. In an industry full of experts of many stripes, Ron and Jason are the real thing: savvy, experienced, and realistic. They have produced a must-read book for management." —Paul Lipton, Senior Architect, Unicenter Web Services and Application Management Computer

Associates "This is by far the finest publication on SOA of our time. From cover to back, Service Orient or Be Doomed! strips away the layers of confusion most IT stakeholders face when confronted with enterprise architecture, and illustrates pragmatic and practical paths towards a sustainable and efficient enterprise architecture. Both the technically savvy and the bean counters will enjoy this book that speaks to the critical points they need to understand." —Duane A. Nickull Senior Standards Strategist, Adobe Systems, Inc. Chair, OASIS SOA Reference Model Technical Committee Vicechair, United Nations CEFAC (UN/CEFACT) "If you're looking for a guide that's based on reality, this is it. These guys know how you can service-orient your enterprise and have the best chance of success. This book is the best SOA tool you can buy. I'm recommending it to everyone." —Dave Linthicum, CEO, BRIDGEWERX "Jason and Ron are experts on Service-Oriented Architecture (SOA) and have written the first book that is aimed at helping a non-technical businessperson understand why the SOA computing revolution is critical to business. Rather than provide a nerdy death via buzzword book, Jason and Ron take a humorous, clever, and insightful romp through this new technology and how it impacts business in general." —Brad Feld, Mobius Venture Capital Authors Jason Bloomberg and Ronald Schmelzer—senior analysts for highly respected IT advisory and analysis firm ZapThink—say it all in the title of their new book, Service Orient or Be Doomed!: How Service Orientation Will Change Your Business. That is, if you fail to service orient your company, you will fail in competing with the organizations that do. This provocative new book takes service orientation out of its more familiar technological surroundings within service-oriented architecture and introduces it as a philosophy that advocates its rightful place within a business context, redefining it as a new way of thinking about organizing your business and its processes. Informal, challenging, and intelligent in style, Service Orient or Be Doomed!: How Service Orientation Will Change Your Business shows you how you can best use technology resources to meet your company's business goals and empower

your company to go from "stuck" to "competitive."
