Chilton's Motor/age Professional Automotive Service Manual Routledge
Antistatic sprays from several different manufacturers are examined. The sprays are examined for contamination potential (i.e., outgassing and nonvolatile residue), corrosiveness on an aluminum mirror surface, and electrostatic effectiveness. In addition, the chemical composition of the antistatic sprays is determined by infrared spectrophotometry, mass spectrometry, and ultraviolet spectrophotometry. The results show that 12 of the 17 antistatic sprays examined have a low contamination potential. Of these sprays, 7 are also noncorrosive to an aluminum surface. And of these, only 2 demonstrate good electrostatic properties with respect to reducing voltage accumulation; these sprays did not show a fast voltage dissipation rate however. The results indicate that antistatic sprays can be used on a limited basis where contamination potential, corrosiveness, and electrostatic effectiveness is not critical. Each application is different and proper evaluation of the situation is necessary. Information on some of the properties of some antistatic sprays is presented in this document to aid in the evaluation process. Ming, James E. Goddard Space Flight

This study chronicles the success of the Japanese car in America. Starting with Japan's first gasoline-powered car, the Takuri, it examines early Japanese inventors and automotive conditions in Japan; the arrival of Japanese cars in California in the late 1950s; consumer and media reactions to Japanese manufacturers; what obstacles they faced; initial sales; and how the cars gained popularity through shrewd marketing. Toyota, Honda, Datsun (Nissan), Mazda, Subaru, Isuzu, and Mitsubishi are profiled individually from their origins through the present. An examination follows of the forced cooperation between American and Japanese manufacturers, the present state of the industry in America, and the possible future of this union, most importantly in the race for a more environmentally-sound vehicle.

In James Patterson's dazzling thriller, two secret agents hunt down a serial killer targeting honeymoon couples in Rome. A newlywed couple steps into the sauna in their deluxe honeymoon suite-and never steps out again. When another couple is killed while boarding their honeymoon flight to Rome, it becomes clear that someone is targeting honeymooners, and it's anyone's guess which happy couple is next on the list. FBI Agent John O'Hara is deep into solving the case, while Special Agent Sarah Brubaker is hunting another ingenious serial killer, whose victims all have one chilling thing in common. As wedding hysteria rises to a frightening new level, John and Sarah work ever more closely together in a frantic attempt to decipher the logic behind two rampages. From "The Man Who Can't Miss," Second Honeymoon is the most mesmerizing, most exciting, and most surprising thriller ever (Time).

Colin Burgess offers a comprehensive yet personal look at the 1962 orbital mission of Wally Schirra aboard the spacecraft Sigma 7, the first book about this popular pioneering astronaut which explores his entire life and accomplishments. This continues the Pioneers in Early Spaceflight series, the volumes of which form an excellent record of Project Mercury's pioneering early phase of the Space Age. Schirra's pre-NASA life is examined, as well as his training as a NASA astronaut and for his Mercury MA-8 flight. The 6-orbit flight of Sigma 7 is fully covered from its origins through to the spacecraft's safe recovery from the ocean after a highly successful Mercury mission. Schirra's participation on the Gemini 6 and Apollo 7 missions is also told, but in brief, and the book also relates his post-NASA life and activities through to his passing in 2007. The Mercury Seven occupy a unique spot in the history of human spaceflight, and Schirra is at last given his due as one of the contributing astronauts in this painstakingly researched book.

Transatlantic relations have been among the most crucially important areas for US foreign policy since 1945. For reasons of self-interest and with regard to common transatlantic values and political, economic and security interests, every American Secretary of State to date has dedicated a considerable period of time to America's relations with Europe. This book assesses the transatlantic policy which America's most important post-Second World War Secretaries of State pursued.

Brief profiles of each Secretary's political philosophy and his/her policy towards Europe provide insights into the continuities and changes US foreign policy towards Europe has displayed from 1945 to the present. The book provides a synopsis of America's relations with Europe during the last six decades. It establishes an overview of the crucial problems in American-European relations and indeed in America's global role. Each chapter embeds an assessment of the respective Secretaries of State within a general survey of American foreign policy during both the Cold War and the post-Cold War world. This book was published as a special issue of the Journal of Transatlantic Studies.
