This authoritative handbook reviews the breadth of current knowledge about developmental disabilities: neuroscientific and genetic foundations; the impact on health, learning, and behavior; and effective educational and clinical practices. Leading authorities analyze what works in intervening with diverse children and families, from infancy through the school years and the transition to adulthood. Chapters present established and emerging approaches to promoting communication and language abilities, academic skills, positive social relationships, and vocational and independent living skills. Current practices in positive behavior support are discussed, as are strategies for supporting family adaptation and resilience.

The Handbook of Behavior Change Springer Science & Business Media

The New York Times bestseller with more than 1 million copies sold worldwide Inspired by the incredible true story of one Jewish family separated at the start of World War II, determined to survive—and to reunite—*We Were the Lucky Ones* is a tribute to the triumph of hope and love against all odds. “Love in the face of global adversity? It couldn't be more timely.” —*Glamour* It is the spring of 1939 and three generations of the Kurc family are doing their best to live normal lives, even as the shadow of war grows closer. The talk around the family Seder table is of new babies and budding romance, not of the increasing hardships threatening Jews in their hometown of Radom, Poland. But soon the horrors overtaking Europe will become inescapable and the Kurcs will be flung to the far corners of the world, each desperately trying to navigate his or her own path to safety. As one sibling is forced into exile, another attempts to flee the continent, while others struggle to escape certain death, either by working grueling hours on empty stomachs in the factories of the ghetto or by hiding as gentiles in plain sight. Driven by an unwavering will to survive and by the fear that they may never see one another again, the Kurcs must rely on hope, ingenuity, and inner strength to persevere. An extraordinary, propulsive novel, *We Were the Lucky Ones* demonstrates how in the face of the twentieth century's darkest moment, the human spirit can endure and even thrive.

We introduce the theory of chemical reaction networks and their relation to stochastic Petri nets — important ways of modeling population biology and many other fields. We explain how techniques from quantum mechanics can be used to study these models. This relies on a profound and still mysterious analogy between quantum theory and probability theory, which we explore in detail. We also give a tour of key results concerning chemical reaction networks and Petri nets. Contents: Stochastic Petri Nets The Rate Equation The Master Equation Probabilities vs Amplitudes Annihilation and Creation Operators An Example from Population Biology Feynman Diagrams The Anderson–Craciun–Kurtz Theorem An Example of the Anderson–Craciun–Kurtz Theorem A Stochastic Version of Noether's Theorem Quantum Mechanics vs Stochastic Mechanics Noether's Theorem: Quantum vs Stochastic Chemistry and the Desargues Graph Graph Laplacians Dirichlet Operators and Electrical Circuits Perron–Frobenius Theory The Deficiency Zero Theorem Example of the Deficiency Zero Theorem Example of the Anderson–Craciun–Kurtz Theorem The Deficiency of a Reaction Network Rewriting the Rate Equation The Rate Equation and Markov Processes Proof

of the Deficiency Zero Theorem Noether's Theorem for Dirichlet Operators Computation and Petri Nets Summary Table Readership: Graduate students and researchers in the field of quantum and mathematical physics. Keywords: Stochastic;Quantum;Markov Process;Chemical Reaction Network;Petri NetReview: Key Features: It's a light-hearted introduction to a deep analogy between probability theory and quantum theory It explains how stochastic Petri nets can be used in modeling in biology, chemistry, and many other fields It gives new proofs of some fundamental theorems about chemical reaction networks

Post Cinematic Affect Westminster John Knox Press

New York Times bestselling author Christopher Rice brilliantly conjures the shadowed terrors of the Louisiana bayou—where three friends confront a deadly, ancient evil rising to the surface—in this intense and atmospheric new supernatural thriller. It's been a decade since the Delongpre family vanished near Bayou Rabineaux, and still no one can explain the events of that dark and sweltering night. No one except Niquette Delongpre, the survivor who ran away from the mangled stretch of guardrail on Highway 22 where the impossible occurred...and kept on running. Who left behind her best friends, Ben and Anthem, to save them from her newfound capacity for destruction...and who alone knows the source of her very bizarre—and very deadly—abilities: an isolated strip of swampland called Elysium. An accomplished surgeon, Niquette's father dreamed of transforming the dense acreage surrounded by murky waters into a palatial compound befitting the name his beloved wife gave to it, Elysium: “the final resting place for the heroic and virtuous.” Then, ten years ago, construction workers dug into a long-hidden well, one that snaked down into the deep, black waters of the Louisiana swamp and stirred something that had been there for centuries—a microscopic parasite that perverts the mind and corrupts the body. Niquette is living proof that things done can't be undone. Nothing will put her family back together again. And nothing can save her. But as Niquette, Ben, and Anthem uncover the truth of a devastating parasite that has the potential to alter the future of humankind, Niquette grasps the most chilling truths of all: someone else has been infected too. And unlike her, this man is not content to live in the shadows. He is intent to use his newfound powers for one reason only: revenge.

Theory and Practice of Addiction Counseling by Pamela S. Lassiter and John R. Culbreth brings together contemporary theories of addiction and helps readers connect those theories to practice using a common multicultural case study. Theories covered include motivational interviewing, moral theory, developmental theory, cognitive behavioral theories, attachment theory, and sociological theory. Each chapter focuses on a single theory, describing its basic tenets, philosophical underpinnings, key concepts, and strengths and weaknesses. Each chapter also shows how practitioners using the theory would respond to a common case study, giving readers the opportunity to compare how the different theoretical approaches are applied to client situations. A final chapter discusses approaches to relapse prevention.

Named a Best Book of the Year by The Washington Post, Time, NPR, Amazon,Vice, Bustle, The New York Times, The Guardian, Kirkus Reviews, Entertainment Weekly, The AV Club, & Audible A New York Times Bestseller “One of the most compelling protagonists modern fiction has offered in years: a loopy, quietly furious pillhead whose Ambien ramblings and Xanaxed b*tcheries somehow

wend their way through sad and funny and strange toward something genuinely profound.” — Entertainment Weekly “Darkly hilarious . . . [Moshfegh's] the kind of provocateur who makes you laugh out loud while drawing blood.” —Vogue From one of our boldest, most celebrated new literary voices, a novel about a young woman's efforts to duck the ills of the world by embarking on an extended hibernation with the help of one of the worst psychiatrists in the annals of literature and the battery of medicines she prescribes. Our narrator should be happy, shouldn't she? She's young, thin, pretty, a recent Columbia graduate, works an easy job at a hip art gallery, lives in an apartment on the Upper East Side of Manhattan paid for, like the rest of her needs, by her inheritance. But there is a dark and vacuous hole in her heart, and it isn't just the loss of her parents, or the way her Wall Street boyfriend treats her, or her sadomasochistic relationship with her best friend, Reva. It's the year 2000 in a city aglitter with wealth and possibility; what could be so terribly wrong? My Year of Rest and Relaxation is a powerful answer to that question. Through the story of a year spent under the influence of a truly mad combination of drugs designed to heal our heroine from her alienation from this world, Moshfegh shows us how reasonable, even necessary, alienation can be. Both tender and blackly funny, merciless and compassionate, it is a showcase for the gifts of one of our major writers working at the height of her powers.

Inland saline waters are threatened worldwide by diversion and pollution of their inflows, introductions of exotic species and economic development of these ecologically valuable habitats. Since 1979 a series of international symposia on inland saline waters has served to strengthen and expand the scope of limnological research on inland saline waters. The seventh conference continued this tradition and the papers derived from the conference focused on the ecology of microbial communities, the influence of habitat geochemistry on biogeography of flora and fauna, physical and geochemical processes, and the conservation of inland saline waters. Of particular note are papers on Walker Lake, Nevada (USA), and the Salton Sea and Mono Lake, California (USA). Continued local, national and international efforts are required to inform the public and decision-makers about the environmental problems faced by saline waters. The papers in this volume will serve this end and should be of interest to aquatic ecologists, limnologists, aquaculturalists, and water resource managers.

"Can preaching recover a Blues sensibility and dare speak with authority in the midst of tragedy? America is living stormy Monday, but the pulpit is preaching happy Sunday. The world is experiencing the Blues, and pulpiteers are dispensing excessive doses of non-prescribed prosaic sermons with severe ecclesiastical and theological side effects." "€"from chapter 1 Uniquely gifted preacher Otis Moss III helps preachers effectively communicate hope in a desperate and difficult world in this new work based on his 2014 Yale Lyman Beecher Lectures. Moss challenges preachers to preach with a "Blue Note sensibility," which speaks directly to the tragedies faced by their congregants without falling into despair. He then offers four powerful sermons that illustrate his Blue Note preaching style. In them, Moss beautifully and passionately brings to life biblical characters that speak to today's pressing issues, including race discrimination and police brutality, while maintaining a strong message of hope. Moss shows how preachers can teach their congregations to resist letting the darkness find its way into them and, instead, learn to dance in the dark.

“How long do I have to convince you that my brother is not capable of murdering sixty people?”

Christopher Rice, the author of four New York Times bestselling novels by the age of thirty, returns

with his first female protagonist since *The Snow Garden*. In *The Moonlit Earth*, he delivers a

compelling psychological thriller about a young woman who must act to save her brother’s

reputation and life when he is accused of being involved in a terrorist event. When Megan and

Cameron Reynolds’s father walked out on their mother, they forged an unbreakable bond. If their

father could not be there to take care of them, they would always be there to take care of each

other. But life intervenes, and siblings go separate ways . . . until something happens to reforge

that bond. At thirty, faced with disappointments in career and romance, Megan Reynolds returns to

the safety of Cathedral Beach, the home of her mother, who lives among the wealthy with no

money of her own. Cameron worries that his sister will lose herself around their mother’s frivolous

life, but Megan worries more about her brother. She worries that Cameron’s care-free charm,

which makes him popular in both his work as a flight attendant on a luxury airline and the West

Hollywood party scene he enjoys, could lead him into danger. When a bomb goes off in a high-end

hotel in Hong Kong, security-camera footage appears on television showing two men escaping: one

Middle Eastern and one American. Megan and her mother recognize the young American as

Cameron—and find that he has become enmeshed with a mysterious family of wealthy Saudis. In

her desperate journey to save her brother’s life, Megan uncovers a trail of secrets and intrigue that

snakes from the decadent beaches of southern Thailand to the glass skyscrapers of Hong Kong—

and finds herself part of a dark global conspiracy that involves a member of her own family.
