Aeronautical Chart Users Guide

Simon and Schuster

Designed for pilots, flight crew, and aviation maintenance technicians, this manual collects the latest civil aviation directives from the Federal Aviation Administration (FAA). Full-color graphics. *The Pilot's Reference to ATC Procedures and Phraseology* Arco

A critical reference tool for any aeronautical navigator, the ninth edition of the Aeronautical Chart User's Guide presents the most up-to-date information on charts adhering to Visual Flight Rule (VFR) and Instrument Flying Rule (IFR). Hundreds of color images throughout the book are paired with easy-to-understand explanations and definitions. This concise guide allows pilots and students to successfully pre-plan flight paths through any type of environment from man-made obstacles to natural terrain. In addition, the updated Aeronautical Chart User's Guide is a great study aid for current pilots who are preparing for additional certification and for potential pilots who are interested in applying for their first license.

As mass air transport shrinks the world and requires airport complexes large enough to be regarded as self-contained cities, this book argues that airspace – that transitional area stretching from terminal to terminal, across time zones or between the check-in desk and the baggage carousel – must be regarded as a discrete destination on any map of our age. At the hub of this exclusive enclave, which rises from the runway to an altitude of several thousand feet and which calmly accommodates the dangers of take-off and landing procedures, lies the airport – the concrete manifestation of airspace. The airport is a locale of anxiety and chance where, in order to expedite air traffic, authority is absolute, time is relative and liberties are always taken. David Pascoe's wide-ranging book blends personal observation with detailed discussions of social history, air accidents, landscape, architecture, politics, aesthetics, literature and film to provide a striking account of the airport as a unique space and singular form of modernity, a place fundamental to any accurate sense of what we are now, and where we are going. "eclectic and intelligent ... a thought-provoking

analysis"—Financial Times "the scope of Mr Pascoe's rumination is impressive"—The Economist
