A Concrete Introduction to Analysis, Second Edition offers a major reorganization of the previous edition with the goal of making it a much more comprehensive and accessible for students. The standard, austere approach to teaching modern mathematics with its emphasis on formal proofs can be challenging and discouraging for many students. To remedy this situation, the new edition is more rewarding and inviting. Students benefit from the text by gaining a solid foundational knowledge of analysis, which they can use in their fields of study and chosen professions. The new edition capitalizes on the trend to combine topics from a traditional transition to proofs course with a first course on analysis. Like the first edition, the text is appropriate for a one- or two-semester introductory analysis or real analysis course. The choice of topics and level of coverage is suitable for mathematics majors, future teachers, and students studying engineering or other fields requiring a solid, working knowledge of undergraduate mathematics. Key highlights: Offers integration of transition topics to assist with the necessary background for analysis Can be used for either a one- or a two-semester course Explores how ideas of analysis appear in a broader context Provides as major reorganization of the first edition Includes solutions at the end of the book

Skits and Activities for Children on Sunday Mornings is a book designed to share tested and well-received skits, games, and craft activity plans aimed at elementary school age children in church-based programs. In addition: there are also several brief devotionals for both leaders and students present. The purpose behind this book however is not to present church leaders with a full-fledged season's worth of curriculum. Rather, the goal behind this book is to present church leaders with additional and alternative methods to teach scripture-based messages to their already existing curriculum. So if you're searching for fun and creatively different methods to share the Bible's messages on forgiveness, patience, kindness, faith, love, obeying Gods' will, and more with children, then look no further. This is the ultimate alternative for all churches to check out!

Teens have a reputation for being self-absorbed and “all-about-me,” but most of them care deeply about God and others and just wish they knew how to show it. With Sharing Your Faith and Serving Others Uncommon High School Group Study, you can equip the students in your group to make a difference in the world by seeing others as Jesus sees them. Teens will learn how to use their gifts in service to others, how to lead their peers with gentleness and compassion, and how to share their faith by being an encouraging, generous friend. These 12 sessions of youth-friendly Bible study are the newest edition to the Uncommon curriculum series created by veteran youth minister Jim Burns. Action-packed, fun activities and insightful discussion outlines will get your teens thinking about the Great Commission and the Great Commandment, and talking about how they can follow Jesus in love and obedience. Inside the book you'll find a special download link for additional reproducible student handouts and options for every session to tailor each study to your group's unique needs.

Twenty years ago, the Gebusi of the lowland Papua New Guinea rainforest had one of the highest homicide rates in the world. Bruce M. Knauff found then that the killings stemmed from violent scapegoating of suspected sorcerers. But by the time he returned in 1998, homicide rates had plummeted, and Gebusi had largely disavowed vengeance against sorcerers in favor of modern schools, discos, markets, and Christianity. In this book, Knauff explores the Gebusi's encounter with modern institutions and highlights what their experience tells us more generally about the interaction between local peoples and global forces. As desire for material goods grew among Gebusi, Knauff shows that they became more accepting of and subordinated by Christian churches, community schools,and government officials in their attempt to benefit from them—a process Knauff terms “recessive agency.” But the Gebusi also respond actively to modernity, creating new forms of feasting, performance, and music that meld traditional practices with Western ones, all of which Knauff documents in this fascinating study.

Do you have Silly Salad in your back pocket? Silly Salad is a collection of skits, games and ice-breakers that have all been tested on a live audience and have not just proven to be educational, but down right hilarious. Commercials ranging from a specialized pillow that provides comfort to the chafed backside of indecisive individuals (The Fence-Sitters Fanny-Pad) to a pair of glasses that hinder lustful thoughts (The Sin-no-more Spectacles), will provide easy and comical introductions to deeper discussions. Skits involving pirates who discuss hope while in a hopeless situation (Clive the Hopeful Pirate), and a television talk show host who is quick to deliver a spanking (Morals Over Coffee with Dr. Meredith Stein), are just a few of the many diverse and colorful characters you will also meet. Each commercial and skit is complete with a list of corresponding scripture verses as well as a prop list and character analysis to aid in the production and discussion of the material. If you have Silly Salad in your back pocket, you'll have what it takes to entertain and teach any tough crowd of teens. No youth leader should be without it.

Synchrotron radiation (SR) is utilized in most scientific fields. This book will therefore be useful not only for researchers engaged in analytical chemistry, and those studying the basic fields such as physics, chemistry, biology, as well as earth science, medicine, and life science but also for those engaged in research for elucidating structure of material and its function in the application fields including applied physics, semiconductor engineering, and metal engineering. The book has a highly interdisciplinary character. The outstanding characteristics of SR have also contributed to the rapid development of new fields and applications in analytical chemistry. Features of this book:
• Explains the basics of SR
• Facilities and instrumentation are covered to facilitate the planning of experiments using SR.
• Aspects for the future development of SR are included together with an introduction to the latest techniques which are expected to find increasing use in the coming years. This book should stimulate students specializing in analytical chemistry and materials science to have an interest in SR. In addition, it will provide scientists who are beginning analytical chemistry research using SR with instructive and illustrative descriptions. The book can also be used as an explanatory text for advanced research on the application of SR.

#! (pronounced "shebang") consists of poetic texts that are presented alongside the short computer programs that generated them. The poems, in new and existing forms, are inquiries into the features that make poetry recognizable as such, into code and computation, into ellipsis, and into the alphabet. Computer-generated poems have been composed by Brion Gysin and Ian Sommerville, Alison Knowles and James Tenney, Hugh Kenner and Joseph P. O'Rourke, Charles O. Hartman, and others. The works in #! engage with this tradition of more than 50 years and with constrained and conceptual writing. The book's source code is also offered as free software. All of the text-generating code is presented so that it, too, can be read; it is all also made freely available for use in anyone's future poetic projects.
