In recent years the issue of boys and literacy, namely that they are worse at it compared to girls, has become a key area of interest to all those concerned with the education of our children. This book highlights the key factors causing this divide and discusses the implementation of new strategies to overcome it, which have been the result of extensive qualitative research made by the author. Trisha Maynard reports case study findings of a primary school whose staff wanted to explore and improve boys' attitudes towards and attainment in literacy, and in particular their difficulties with writing. The book highlights issues concerning the reading and writing of stories, what teachers understand by 'good story writing' and the importance of teachers exploring boys' and girls' difficulties with literacy by themselves. It provides significant insight into boys' difficulties with writing as well as informing teachers how to find out about

children's attainment.

The assessment of the National Curriculum has evolved from the first blueprint of the TGAT Report through a series of policy decisions and early experience of implementation. The pace of change, the complexity of the proposed assessment system and the political rhetoric associated with it have served to confuse and so obscure the trends in policy and practice. This book offers an account of that system and explains why it is now emerging in a substantially different form from that envisaged by its originators.

The A-Z of Learning Routledge

This book of practice test papers can be used by parents to prepare their child for school tests in three subject areas at Key Stage 1 – reading, writing and spelling, and mathematics. There are eight sets of practice papers in all, providing 10-12 hours of test practice, plus answers and notes for parents. These practice test papers give children the confidence of knowing the sort of questions they will experience in school tests towards the end of Key Stage 1. The papers also enable parents to assess their child's progress at school, identify strengths and weaknesses, and help improve their child's confidence and ability. The three subject areas are covered as follows: Reading: two papers, each including a level 2 and a level 3 test. Writing and spelling: three papers, each including two writing tasks (one longer and one shorter). These tasks cover different styles of writing and enable parents to assess their child's handwriting skills. Each paper also includes a spelling test. Mathematics: three papers, the first of which is aimed at levels 1-2 and the remaining two at level 3. Parents can mark their child's work using the pull-out answers and mark schemes provided. The marks can then be

used to assess the child's National Curriculum level.

One day, a boy drops his sandwich in a sandpit, and the race is on! A very hungry badger wants it, but he's just not quick enough. The sandwich is dropped, squashed and slithered over by everyone from a squirrel, to a fox, to a band of slugs. Will the badger ever get his paws on that sandwich?

Handbook for Education - Bristol Guide 2021-2022

Routledge

This book is a useful addition to any staff library. What makes it different to many other similar books is that it shows teachers that speaking, listening and reading create the foundations for writing. Tested in schools, staff said: "It is a very useful framework for action-research based upon secure theory. When deciding classroom strategies, it is easy to find what you are looking for and the chapter summaries are very helpful. Some of the staff development and training suggestions are very practical and we are trying them out. We found the emphasis upon class novels and the class discussion that follows, very important, especially when linked to the excellent examples of children's writing." This book may appear to some as theoretical and 'academic', but this is why it will be valuable. It does what the title says because it shows how children learn to write. It starts at the beginning and saves diving into the latest trend. Perhaps its best recommendation is that every school that was asked to look at it said, 'It's good and we have ordered a copy' - John Lilly, independent education consultant. The chapter on the Taxonomy of Writing Purposes will be useful for planning and those on

extending and enhancing writing will definitely be helpful in many day-to-day situations' - Nicholas Bielby, Times Educational Supplement This book outlines the processes which are involved when children learn to write. The author shows how certain strategies can improve children's progress in writing. Dealing with the age range three to 13, the book addresses issues to do with: - the gender gap - children with English as an additional language - left-handedness Dorothy Latham includes ideas for sound and easy ongoing assessment of writing. The book is written in line with the requirements of the English National Curriculum and The National Literacy Strategy Framework for England, but is not limited to them. Topics also covered include: - brain development and structures - the acquisition of speech - language and thinking - working memory - secretarial skills - stages in compositional development - writing purposes and cross-curricular applications - strategies for improving self-generated writing - using reading to improve writing - using speech and drama to improve writing and - ten ways to improve children's writing. This book is for serving teachers in schools wishing to study the subject in further depth, and as a source book for students. Useful for school-based staff INSET, it provides simple activities for teachers to do and discuss.

Children's achievements in writing lag behind their achievements in reading, speaking and listening. National tests are beginning to expose this gap and inevitably, it is raising concerns. The issue is not without controversy but regardless of the politics of the situation, national progress in children's writing is both needed and possible. This new book from Eve Bearne makes a valuable

contribution towards helping teachers close this gap. Uniquely, it follows the structure of the National Literacy Strategy, whilst examining key areas such as bridging KS2 and KS3 writing, and writing skills beyond the Literacy Hour. Such a structure makes the book incredibly practical and easy to use, providing essential information for both practitioners and academics.

Now comes with: A new chapter on Multi-modal texts A new chapter on Mastery in English

Young Researchers Nelson Thornes

This core text for primary trainee teachers is a clear introduction to the different kinds of assessment and their purposes. Throughout the book, tasks encourage the reader to practise assessment skills and to reflect on planning, listening, questioning, observing, diagnosing and target-setting. This second edition is referenced throughout to the 2007 QTS Standards and has been fully updated to reflect the Primary National Strategy and key initiatives such as Every Child Matters.

There is increased emphasis on peer assessment and target-setting linked to personalised learning. In addition, new material on Early Years observation and foundation/core subjects has been added.

What Teachers Do Psychology Press

Since 1989, initial teacher training courses in England and Wales have recognized the need for teachers to take a lead in a school subject area in their first appointment. There is no longer a place for a primary school teacher (newly qualified or not) whose sole responsibility is his or her own class. Further, a teacher must have specific specialist knowledge and expertise in particular subjects which must be disseminated to the rest of the staff. A teacher also needs to develop the skills of communication, leadership and persuasion.

Consulting Pupils Psychology Press

The guide is an essential resource for trainee teachers working towards the Teachers' Standards for qualified teacher status (QTS). It also helps newly qualified teachers (NQTs) and more experienced teachers have an 'understanding of, and always act within, the statutory frameworks which set out their professional duties and responsibilities' Teachers' Standards. Higher Level Teaching Assistants (HLTAs) and Teaching Assistants (TAs) working towards HLTA status will find the guide invaluable in developing knowledge of how 'other frameworks that support the development and well-being of children and young people impact upon their practice' HTLA Professional Standards.

The Really Practical Guide to Primary English The Stationery Office

Full of practical help and guidance, this is a must have for

primary trainees on school experience, whether they are in a school-based or university-based teacher training programme. It begins by helping trainees to plan their own journey through training and beyond. Taking control of their own training in this way supports student teachers to approach the course with confidence, and secure their first teaching job. The book provides guidance on: adapting to working in school observing, planning and evaluating in school teaching on placement assessing, monitoring and reporting on children's progress self-evaluation and how to pre-empt and resolve issues securing the first teaching job and succeeding in the NQT year For student teachers, the experience of school-based training is exciting but also challenging - this book supports them throughout and prepares them for the journey ahead. Student feedback on this book: "Having been on a variety of teaching placements myself, I know just how daunting and overwhelming experiences in school can be at times - even with a supportive mentor by your side!

Hence, I felt that this book can smooth out and rectify those worries one may face during a school placement, and offers the reader a realistic insight into school experiences. In my opinion, the most useful chapter by far is the 'Moving On' chapter near the end of the book. This explains how to conclude a school placement, what to expect from an interview, and even how to set out a CV for a teaching position. This was not something I expected to find in this book however it was very much welcomed and is, in fact, a very important, valuable part of the book. This is the type of book you can buy on your very first day of teacher training and use well into your days as a newly qualified teacher." - Jasmin, Primary Teacher Trainee (University of Northampton)
