### **The Paradox of Choice**

Penguin Books India

The best-selling favorite, now available as a board book! Whimsical rhyme and imaginative illustrations affirm that every child is God's unique creation and

beloved by Him. YOU, you... God thinks about you. God was thinking of you long before your debut. From early on, children are looking to discover their place in the world and longing to understand how their personalities, traits, and talents fit in. The assurance that they are deeply loved and a unique creation in our big universe is certain to help them spread their wings and fly. Through

playful, charming rhyme and vivid, fantastical illustrations, When God Made You inspires young readers to learn about their own special gifts and how they fit into God's divine plan as they grow, explore, and begin to create for themselves. 'Cause when God made YOU, somehow God knew That the world needed someone exactly like you! I Am a Strange Loop

Harper Collins "We were tired of living in a house. So we packed a bag with sweaters and socks and scarves and mittens and woolen caps. And we moved to a tree...." So begins this whimsical tale of four small children, a dog and a cat who decided they were tired of living in a house. They try a tree, a pond, a cave and the seashore, but in each place something unusual happens to make them

move on to the next place-and finally home. Each appealing moment and every small detail are captured by Doris Burn's original drawings from 1969.

**Out Of Control** Your Own World, Inc. Whether we're buying a pair of jeans, ordering a cup of coffee, selecting a long-distance carrier, applying to college, choosing a doctor, or setting up a 401(k),

everyday decisions—both big and small—have become increasingly complex due to the overwhelming abundance of choice with which we are presented. As Americans, we assume that more choice means better options and greater satisfaction. But beware of excessive choice: choice overload can make you question the decisions you make before you even make them, it can set you up for

unrealistically high expectations, and it can make you blame yourself for any and all failures. In the long run, this can lead to decision-making paralysis, anxiety, and perpetual stress. And, in a culture that tells us that there is no excuse for falling short of perfection when your options are limitless, too much choice can lead to clinical depression. In *The Paradox of Choice*, Barry

Schwartz explains at what point choice—the hallmark of individual freedom and self-determination that we so cherish—becomes detrimental to our psychological and emotional well-being. In accessible, engaging, and anecdotal prose, Schwartz shows how the dramatic explosion in choice—from the mundane to the profound challenges of balancing career, family,

and individual needs—has paradoxically become a problem instead of a solution. Schwartz also shows how our obsession with choice encourages us to seek that which makes us feel worse. By synthesizing current research in the social sciences, Schwartz makes the counterintuitive case that eliminating choices can greatly reduce the stress, anxiety, and busyness of

our lives. He offers eleven practical steps on how to limit choices to a manageable number, have the discipline to focus on those that are important and ignore the rest, and ultimately derive greater satisfaction from the choices you have to make. All citizens of Malvena are born with a genetic abnormality such that none should survive past the age of 40, this is known as Fortitude. Part of the Young Parenting Series Second Edition** Lulu.com At once a pioneering study of evolution and

an accessible and lively reading experience, *The Mating Mind* marks the arrival of a prescient and provocative new science writer. Psychologist Geoffrey Miller offers the most convincing—and radical—explanation for how and why the human mind evolved. Consciousness, morality, creativity, language, and art: these are the traits that make us human. Scientists have

traditionally explained these qualities as merely a side effect of surplus brain size, but Miller argues that they were sexual attractors, not side effects. He bases his argument on Darwin's theory of sexual selection, which until now has played second fiddle to Darwin's theory of natural selection, and draws on ideas and research from a wide range of fields, including

psychology, economics, history, and pop culture. Witty, powerfully argued, and continually thought-provoking, *The Mating Mind* is a landmark in our understanding of our own species. *Practical Research* North Atlantic Books This early work by Edith Wharton was originally published in 1928 and we are now republishing it with a brand new introductory

biography. 'The Children' is a comic novel about the seven Wheeler children and their association with a bachelor that leads to several misadventures. Edith Wharton was born in New York City in 1862. Wharton's first poems were published in Scribner's

Magazine. In 1891, the same publication printed the first of her many short stories, titled 'Mrs. Manstey's View'. Over the next four decades, they - along with other well-established American publications such as Atlantic Monthly, Century Magazine, Harper's and

Lippincott's - regularly published her work. The Magnificent Adventure Harper Collins Out of Control chronicles the dawn of a new era in which the machines and systems that drive our economy are so complex and autonomous as to be indistinguishable from living things.
