DANIKA DESIREE

The Autonomy Paradox: Teachers' Perceptions of Self-Governance Across Europe OECD Publishing

What do we mean when we speak about teacher autonomy? How free are teachers to go about their work? To answer these complex questions the authors asked thousands of teachers in four national contexts: in Finland, Ireland, Germany and Sweden, what they think autonomy looks like. The resulting book examines teacher autonomy theoretically and empirically, comparing teachers' perceptions of their professional autonomy. Utilizing a mixed method approach the authors combine data from a large-scale questionnaire study, teacher interviews, lesson and meeting observations, and workshops that brought together teachers from the four participating countries. All this engagement with teachers revealed that simply increasing their professional autonomy might not lead to desired outcomes. This is because, from a teachers' point of view, increased decision-making capacity brings further complexity and risk to their work, and it may instead lead to anxiety, self-restriction, and the eventual rejection of autonomy. These surprising conclusions challenge the increasingly orthodox view that increased autonomy is a desirable end in itself. This is what the authors call the autonomy paradox.

Anthropologists have written a great deal about the coastal adaptations and seafaring traditions of Pacific Islanders, but have had much less to say about the significance of rivers for Pacific island culture, livelihood and identity. The authors of this collection seek to fill that gap in the ethnographic record by drawing attention to the deep historical attachments of island communities to rivers, and the ways in which those attachments are changing in response to various forms of economic development and social change. In addition to making a unique contribution to Pacific island ethnography, the authors of this volume speak to a global set of issues of immense importance to a world in which water scarcity, conflict, pollution and the degradation of riparian environments afflict growing numbers of people. Several authors take a political ecology approach to their topic, but the emphasis here is less on hydro-politics than on the cultural meaning of rivers to the communities we describe. How has the cultural significance of rivers shifted as a result of colonisation, development and nation-building? How do people whose identities are fundamentally rooted in their relationship

to a particular river renegotiate that relationship when the river is dammed to generate hydro-power or polluted by mining activities? How do blockages in the flow of rivers and underground springs interrupt the intergenerational transmission of local ecological knowledge and hence the ability of local communities to construct collective identities rooted in a sense of place?

Bend It Like Beckham Waxmann Verlag

In modernen Wissensgesellschaften ist Bildung die zentrale Voraussetzung sowohl für die demokratische Teilhabe als auch für wirtschaftliches Wachstum und Wohlstand. Eine sich zunehmend rascher wandelnde, globalisierte Welt erfordert die Bewältigung neuer Anforderungen im privaten Leben und in der Berufs- und Arbeitswelt. Um mehr über den Bildungserwerb und seine Folgen für individuelle Lebensverläufe zu erfahren, um zentrale Bildungsprozesse und -verläufe über die gesamte Lebensspanne zu beschreiben und zu analysieren, wird in Deutschland aktuell das Nationale Bildungspanel aufgebaut.

Separation Routledge

This book investigates the contexts of gender segregation in vocational education (VET) from a cross-national, comparative perspective. It tackles questions about occupational expectations, gendered pathways to applied fields of study, feminization of occupations and the relationship between educational choice and opportunity structures.

Mathematik 10. Klasse Hauptschule Typ B, Gesamtschule EK, Sekundarschule Nordrhein-Westfalen 2016 OECD Publishing

Education at a Glance is the authoritative source for information on the state of education around the world. It provides data on the structure, finances and performance of education systems across OECD countries and a number of partner economies. The 2019 edition includes a focus on tertiary education with new indicators on tertiary completion rates, doctoral graduates and their labour market outcomes, and on tertiary admission systems, as well as a dedicated chapter on the Sustainable Development Goal 4.

G20 members bring together the world's major advanced and emerging economies, as well as the European Union. Together they represent some 90% of global GDP, 80% of global trade and two-thirds of the world's population. In recognition of educational development as a key driver of

economic development, the G20 members have put education reform high on their policy agenda in order to meet the challenges and embrace the opportunities ahead. Their experiences and lessons in education reform will not only showcase the global trend of education development, but also will provide valuable reference and inspiration for undertaking education reform to advance national development in China as well as other countries. This book documents recent policy reform in G20 members' systems, showcases the global trends in education policy, serves as a valuable reference tool and also provide inspiration for undertaking education reform to advance development in related countries.

PISA 2018 Results (Volume I) What Students Know and Can Do Springer Nature

Originally published in 1979, this reader presents an industrialist view of the labour market and economics as they stood at the time in the United States. The essays collated aim to answer macroeconomic questions on this topic as well as exploring issues related closely to employment and inflation. This title will be of interest to students of business and economics.

Education Policy Reform Trends in G20 Members Ember

One of the liveliest areas of research in the social sciences is reading. Scholarly activity is currently proceeding along a number of different disciplinary lines, addressing a multitude of questions and issues about reading. A short list of disciplines involved in the study of reading would include linguistics, psychology, education, history, and gerontology. Among the important questions being addressed are some long-standing concerns: How are reading skills acquired? What are the basic components of reading skill? How do skilled readers differ from less skilled ones? What are the best ways to approach instruction for different groups of readers-young beginning readers, poor readers with learning problems, and teenage and adult illiterates? How can reading skill best be measured-what standardized instruments and observational techniques are most useful? The large volume of textbooks and scholarly books that issue forth each year is clear evidence of the dynamic nature of the field. The purpose of this volume is to survey some of the best work going on in the field today and reflect what we know about reading as it unfolds across the life span. Reading is clearly an activity that spans each of our lives. Yet most accounts of it focus on some narrow period of development and fail to consider the range of questions that serious scholarship needs to address for us to have a richer understanding of reading. The book is divided into four parts.

STARK Training Mittlerer Schulabschluss 2020 - Deutsch - NRW Hodder Children's Books

Hanna and Andreas will do anything to leave oppressive East Germany behind. There's one escape route open to them, but can they survive it? Hanna and Andreas have always been friends. When

they're expelled from school for activism directly challenging the socialist state in East Germany, they end up doing factory work. But what kind of life do they have to look forward to without education or opportunity? Especially when they aren't allowed a voice? The choice to risk imprisonment or death by escaping to the democratic West seems like a risk worth taking. They set out to swim twenty-five hours across the choppy waters of the Baltic Sea. Linke's storytelling achieves a delicate balance between heightened moments of danger--searchlights, jellyfish, a Russian helicopter, a violent summer storm--and the monotony, ineffable fatigue, physical pain, cramping, fear, and hope that fill the rest of the journey. A memorable tale of two people risking all for a chance at freedom.

The Muscular Ideal OECD Publishing

This edited book draws on new research to provide an overview of the muscular ideal, including historical and present socioeconomic trends, assessment and measurement issues, and clinical presentation of disorders such as muscle dysmorphia. Chapters also cover related issues such as steroid use, repeated cosmetic surgery, and prevention issues.

The Psychology of Extremism Cambridge University Press

An all-new edition of the tragicomic smash hit which stormed the New York Times bestseller charts, now featuring an introduction from Markus Zusak. In his first book for young adults, Sherman Alexie tells the story of Junior, a budding cartoonist who leaves his school on the Spokane Indian Reservation to attend an all-white high school. This heartbreaking, funny, and beautifully written tale, featuring poignant drawings that reflect the character's art, is based on the author's own experiences. It chronicles contemporary adolescence as seen through the eyes of one Native American boy. 'Excellent in every way' Neil Gaiman Illustrated in a contemporary cartoon style by Ellen Forney.

Education at a Glance 2019 OECD Indicators Random House

This is one of six volumes that present the results of the PISA 2018 survey, the seventh round of the triennial assessment. Volume I, What Students Know and Can Do, provides a detailed examination of student performance in reading, mathematics and science, and describes how performance has changed since previous PISA assessments.

Looking for Alaska Routledge

While Nelson Mandela spends the second year of his life sentence in prison, wealthy and privileged Jessica is out shopping with her best friend, unaware of the suffering around her. But when the mysterious Ben walks into her life, love changes her world in ways she couldn't possibly have imagined... A story of conflict, friendship, loss and hope, *Separation* is the powerful debut novel from author Babette Brown, an authentic portrayal of the turmoil and intensity of teenage life set against the brutal South African apartheid regime. "Babette Brown's depiction of white South African society in the 1960s is uncomfortably realistic, mirroring the insanity of apartheid. Thank goodness for

Jessica's grandmother, an unobtrusive heroine." Beverley Naidoo, Carnegie Medal Winner for 'The Other Side of Truth'

Education as a Lifelong Process Emerald Group Publishing

One of the central features in current educational reforms is a focus on learning outcomes. Many countries have established or revised standards to describe what teachers are supposed to teach and students are expected to learn. More recently, the emphasis has shifted to considerations of how standards can be operationalized in order to make the outcomes of educational efforts more tangible. This book is the result of a symposium held in Kiel, that was arranged by two science education groups, one at the IPN (Leibniz-Institute for Science and Mathematics Education at the University of Kiel) in Germany and the other at the University of York, UK. The seminar brought together renowned experts from 12 countries with different notions of the nature and quality of learning outcomes. The aim was to clarify central conceptions and approaches for a better understanding among the international science education community. The book is divided into five parts. In Part A, the organizers set the scene, describing the rationale for arranging the symposium.

Part B provides a broad overview about different approaches, challenges, and pitfalls on the road to the clarification of meaningful and fruitful learning outcomes. The set of papers in Part C provides deep insights into different, although comparable approaches which aim to frame, to assess, and to promote learning and learning outcomes in science education. Smaller projects are presented as well as broad, coordinated national programs. The papers in Part D outline the individual historical development from different national perspectives, reflecting the deficits and problems that led to current reforms. Finally, a summary of the organizers analyses the conclusions from different vantage points.

Portals to the Past and to the Future OECD Publishing

The OECD Programme for International Student Assessment (PISA) examines what students know in reading, mathematics and science, and what they can do with what they know. This is one of six volumes that present the results of the PISA 2018 survey, the seventh round of the triennial assessment. Volume V, *Effective Policies, Successful Schools*, analyses schools and school systems and their relationship with education outcomes more generally.
