George Kennedy's three volumes on classical rhetoric have long been regarded as authoritative treatments of the subject. This new volume, an extensive revision and abridgment of *The Art of Persuasion in Greece*, *The Art of Rhetoric in the Roman World*, and *Greek Rhetoric under Christian Emperors*, provides a comprehensive history of classical rhetoric, one that is sure to become a standard for its time. Kennedy begins by identifying the rhetorical features of early Greek literature that anticipated the formulation of "metarhetoric," or a theory of rhetoric, in the fifth and fourth centuries b.c.e. and then traces the development of that theory through the Greco-Roman period. He gives an account of the teaching of literary and oral composition in schools, and of Greek and Latin oratory as the primary rhetorical genre. He also discusses the overlapping disciplines of ancient philosophy and religion and their interaction with rhetoric. The result is a broad and engaging history of classical rhetoric that will prove especially useful for students and for others who want an overview of classical rhetoric in condensed form.

The author examines the indigenous diatonic and chromatic modes used in Albanian urban music and classifies them under traditional headings and as part of a newly established grouping, here termed south-western Balkan modes. The core of the work is the analysis of Albanian urban lyric songs, seen as an artistic version of the traditional Albanian urban songs.

Roman Ondák represents the Slovak Republic at the 2009 Venice Biennale. In this volume the Slovak artist Roman Ondák has brought together some of his works that deal with time, measurement, and surveying along with those that make visible what evades the visual, namely boundaries and experience. Alongside a complete documentation of the exhibition *Measuring the Universe*, where the museum attendants checked the body size of the visitors throughout its duration, one also finds *Failed Fall* (2008), a greenhouse's floor filled with dried autumn leaves, and *Across that Place* (2008), the story of the no longer existing Canal Zone by the Panama Canal. Whether working with installation, photography, drawing, or performance, Ondák underpins his work with processes, embedding them into the course of an action. The action extends over time, transcribes a scenario rather than explaining it, and can be attached to radically minimalist objects, or as in this case, to extremely narrative books. Anything that plays a role in his work has its place in this book: the displacement of people and places, presence and absence, the economy of time. This publication is part of the series of artists' projects by Christoph Keller Editions in collaboration with BAWAG Foundation. English text.

This book illustrates how to use description logic-based formalisms to their full potential in the creation, indexing, and reuse of multimedia semantics. To do so, it introduces researchers to multimedia semantics by providing an in-depth review of state-of-the-art standards, technologies, ontologies, and software tools. It draws attention to the importance of formal grounding in the knowledge representation of multimedia objects, the potential of multimedia reasoning in intelligent multimedia applications, and presents both theoretical discussions and best practices in multimedia ontology engineering. Readers already familiar with mathematical logic, Internet, and multimedia fundamentals will learn to develop formally grounded multimedia ontologies, and map concept definitions to high-level descriptors. The core reasoning tasks, reasoning algorithms, and industry-leading reasoners are presented, while scene interpretation via reasoning is also demonstrated. Overall, this book offers readers an essential introduction to the formal grounding of web ontologies, as well as a comprehensive collection and review of description logics (DLs) from the perspectives of expressivity and reasoning complexity. It covers best practices for developing multimedia ontologies with formal grounding to guarantee decidability and obtain the desired level of expressivity while maximizing the reasoning potential. The capabilities of such multimedia ontologies are demonstrated by DL implementations with an emphasis on multimedia reasoning applications.

The tender plant of Albanian literature grew in a rocky soil. It was late to evolve and its development, indeed its very existence, was threatened in many periods. "Albanian Literature: A Short History" tells the story of the survival and growth of Albanian creative writing beginning with the earliest thirteenth century texts of Theodor of Shkodra, tracing the development of the modern literature of Buzuku, Budi and Bogdani, the incorporation of the Muslim influences of Frakulla and Kycyku and continuing with the works of Cajuqi and Kadare during the reign of King Zog and the Hoxha administration. A unique book that illuminates an under-researched subject, "Albanian Literature" is an essential reference guide for all those interested in Balkan cultures, in comparative literature and in European cultural history in general.

"The age of multimedia constitutes a great challenge for libraries as they have to reinvent themselves to meet the constantly growing demands of digital applications. As a result, within the past decade, libraries have evolved from introverted hoards of knowledge to globally networked information and communication hubs. The architectural implementation of this transformation process has resulted in sophisticated buildings that succeed in combining impressive architecture with the complex contemporary requirements. The new edition of 'Masterpieces: Library Architecture + Design' shows that this process of transformation is far from over. Whether new building, conversion or extension, it presents new masterpieces of library design from around the world. The successful combination of contemporary architecture and cutting-edge technology is evidence that in the digital age, this type of building is as topical as never before."--Web page for this work.

Since the early twentieth century, 'balkanization' has signified the often militant fracturing of territories, states, or groups along ethnic, religious, and linguistic divides. Yet the remarkable similarities found among contemporary Balkan popular music reveal the region as the site of a thriving creative dialogue and interchange. The eclectic interweaving of stylistic features evidenced by Albanian commercial folk music, Anatolian pop, Bosnian sevDAH-rock, Bulgarian pop-folk, Greek ethniki mousike, Romanian muzica orientala, Serbian turbo folk, and Turkish arabesk, to name a few, points to an emergent regional popular culture circuit extending from southeastern Europe through Greece and Turkey. While this circuit is predicated upon older cultural confluences from a shared Ottoman heritage, it also has taken shape in active counterpoint with a variety of regional political discourses. Containing eleven ethnographic case studies, *Balkan Popular Culture and the Ottoman Ecumene: Music, Image, and Regional Political Discourse* examines the interplay between the musicians and popular music styles of the Balkan states during the late 1990s. These case studies, each written by an established regional expert, encompass a geographical scope that includes Albania, Bosnia and Herzegovina, Bulgaria, the Republic of Macedonia, Croatia, Slovenia, Romania, Greece, Turkey, Serbia, and Montenegro. The book is accompanied by a VCD that contains a photo gallery, sound files, and music video excerpts.

"Distinguished in the market by its ability to mesh accessibility and intellectual rigor, How to

Interpret Literature offers a current, concise, and broad historicist survey of contemporary thinking in critical theory. Ideal for upper-level undergraduate courses in literary and critical theory, this is the only book of its kind that thoroughly merges literary studies with cultural studies, including film. Robert Dale Parker provides a critical look at the major movements in literary studies since the 1930s, including those often omitted from other texts. He includes chapters on New Criticism, Structuralism, Deconstruction, Psychoanalysis, Feminism, Queer Studies, Marxism, Historicism and Cultural Studies, Postcolonial and Race Studies, and Reader Response. Parker weaves connections among chapters, showing how these different ways of thinking respond to and build upon each other. Through these exchanges, he prepares students to join contemporary dialogues in literary and cultural studies. The text is enhanced by charts, text boxes that address frequently asked questions, photos, and a bibliography"--

This volume offers a new insight into the development of a great historian, as well as giving an exciting and immensely readable new approach to late Republican and early Imperial Roman history. Drafted in 1934-35, but laid aside in favour of 'The Roman Revolution' (1939), 'The Provincial at Rome' was to have been Ronald Syme's first book. It is a brilliantly written study of the enlargement of the Roman élite in the early empire, an analysis, in thirteen chapters, of the Emperor Claudius' enrolment of 'Gallic chieftains' into the Senate in AD 48. The edition also includes five unpublished papers dealing with Rome's conquest of the Balkans, a region Syme knew intimately.

The Sciences of the Soul is the first attempt to explain the development of the disciplinary conception of psychology from its appearance in the late sixteenth century to its redefinition at the end of the seventeenth and its emergence as an institutionalized field in the eighteenth. Fernando

Vidal traces this development through university courses and textbooks, encyclopedias, and nonacademic books, as well as through various histories of psychology. Vidal reveals that psychology existed before the eighteenth century essentially as a "physics of the soul," and it belonged as much to natural philosophy as to Christian anthropology. It remained so until the eighteenth century, when the "science of the soul" became the "science of the mind." Vidal demonstrates that this Enlightenment refashioning took place within a Christian framework, and he explores how the preservation of the Christian idea of the soul was essential to the development of the science. Not only were most psychologists convinced that an empirical science of the soul was compatible with Christian faith; their perception that psychology preserved the soul also helped to elevate its rank as an empirical science. Broad-ranging and impeccably researched, this book will be of wide importance in the history and philosophy of psychology, the history of the human sciences more generally, and in the social and intellectual history of eighteenth-century Europe.

Long Life to Your Children! Writer's Digest Books

In the past decade the work of Jurgen Habermas has sparked off a series of lively debates over modernity and post-modernity, the nature of language, the interplay of law and politics and the dilemmas of morality. Significantly, these debates unfold in the context of his particular reading of the modern philosophical tradition from the German enlightenment to the present period. In this original interpretation, David Rasmussen provides both guide and critique to the later Habermas encountered in the context of the best of the critical literature that has emerged in recent years. Reading Habermas argues that Habermas' concept of modernity provides the context for the theory of language as well as his approaches to law and ethics. This book, as its title implies, offers a reading. It explores philosophical options chosen in the light of other, rejected readings. It is a distinctive, readable contribution to the current controversy surrounding the most recent developments in critical theory.
