Myths and Realities of French Imperialism in India, 1763-1783
Paulist Press

From the late fifteenth century onwards, scholars across Europe began to write books about how to read and evaluate histories. These pioneering works grew from complex early modern debates about law, religion and classical scholarship. Anthony Grafton's book is based on his Trevelyan Lectures of 2005, and it proves to be a powerful and imaginative exploration of some central themes in the history of European ideas. Grafton explains why so many of these works were written, why they attained so much insight - and why, in the centuries that followed, most scholars gradually forgot that they had existed. Elegant and accessible, *What Was History?* is a deliberate evocation of E. H. Carr's celebrated Trevelyan Lectures, *What Is History?*.

Khayyam has been the subject of speculation on the part of literary critics ever since Edward Fitzgerald published his own version of the Rubaiyat in 1859. This edition represented the first opportunity to study in English the work of Khayyam by a Persian scholar. There is no conclusive evidence to prove which of the many quatrains attributed to Khayyam are authentic. Ali Dashti therefore constructs a likeness of the poet from references found in the works of writers of his day or immediately after, and from Khayyam's own works on philosophy, mathematics and astronomy, of which the authenticity is not questioned. Khayyam emerges as a widely read and broad-minded scholar, immersed in his own studies, cautious and moderate, averse to committing

himself on controversial questions. Using this portrait Dashti draws up a list of some hundred quatrains which are in keeping with Khayyam's character. Selling point: An elegant and accurate translation which throws light on the nature of Khayyam's religious and philosophical beliefs.

Traditionally, endocrinology textbooks have been either short notes or multi-author, multi-volume monster, all of which present clinical material last and often only briefly. Endocrinology is different and used real cases to lead readers into the text and then describes the biochemistry, physiology, and anatomy they need to understand the case. This book examines two kinds of research, research in social psychology and in clinical psychology, into the effects of physical appearance on person perception. Both are explored with the objective of identifying gender similarities and differences on the effects of physical appearance. The theoretical framework for integrating the two approaches is presented, with implications of this framework for future research, social change, and psychotherapy. The book demonstrates that gender must be considered in research on physical appearance effects.

No work revealed more of the mysterious East to statesmen, explorers, readers, and writers of the late Middle Ages than the Book of John Mandeville. One of the most widely circulated documents of its day, it first appeared in French between 1356 and 1371 and was soon translated into nine other European languages. Ostensibly the account of one English knight's journeys through Africa and Asia, it is, rather, a compilation of travel writings first shaped by an unknown redactor. *Writing East* is a study of how Mandeville's *Travels* came to appear in its various versions, explaining how it went through a series of transformations as it reached new audiences in order to serve as both a response to previous writings about the East and an important voice in the medieval conversation about the nature and limits of the world. Higgins offers a palimpsestic reading of this "multi-text" that demonstrates not only how the original French author overwrote his precursors but also how subsequent translators molded the material to serve their own ideological agendas.

This is an objective and well-documented reinterpretation of the French presence in India during one of the most critical and decisive periods of Anglo-French global relations. A stimulating study based on a careful combing of not readily accessible archival sources as well as contemporary and current printed materials, it unfolds the real nature of French objectives in India in the backdrop of French global policy after 1763. As the author extensively documents, French policy was uniquely non-imperialistic in India after the Seven Years' War. The prevailing belief that the Anglo-French confrontation in India was primarily a conflict for an Indian empire has been clearly revealed for what it always was: a myth.

PREFACE. THE Author of this very practical treatise on Scotch Loch - Fishing desires clearly that it may be of use to all who had it. He does not pretend to have written anything new, but to have attempted to put what he has to say in as readable a form as possible. Everything in the way of the history and habits of fish has been studiously avoided, and technicalities have been used as sparingly as possible. The writing of this book has afforded him pleasure in his leisure moments, and that pleasure would be much increased if he knew that the perusal of it would create any bond of sympathy between himself and the angling community in general. This section is interleaved with blank sheets for the readers notes. The Author need hardly say that any suggestions addressed to the case of the publishers, will meet with consideration in a future edition. We do not pretend to write or enlarge upon a new subject. Much has been said and written-and well said and written too on the art of fishing but loch-fishing has been rather looked upon as a second-rate performance, and to dispel this idea is one of the objects for which this present treatise

has been written. Far be it from us to say anything against fishing, lawfully practised in any form but many pent up in our large towns will bear us out when we say that, on the whole, a days loch-fishing is the most convenient. One great matter is, that the loch-fisher is dependent on nothing but enough wind to curl the water, -and on a large loch it is very seldom that a dead calm prevails all day, -and can make his arrangements for a day, weeks beforehand whereas the stream-fisher is dependent for a good take on the state of the water and however pleasant and easy it may be for one living near the banks of a good trout stream or river, it is quite another matter to arrange for a days river-fishing, if one is looking forward to a holiday at a date some weeks ahead. Providence may favour the expectant angler with a good day, and the water in order but experience has taught most of us that the good days are in the minority, and that, as is the case with our rapid running streams, -such as many of our northern streams are, -the water is either too large or too small, unless, as previously remarked, you live near at hand, and can catch it at its best. A common belief in regard to loch-fishing is, that the tyro and the experienced angler have nearly the same chance in fishing, -the one from the stern and the other from the bow of the same boat. Of all the absurd beliefs as to loch-fishing, this is one of the most absurd. Try it. Give the tyro either end of the boat he likes give him a cast of ally flies he may fancy, or even a cast similar to those which a crack may be using and if he catches one for every three the other has, he may consider himself very lucky. Of course there are lochs where the fish are not abundant, and a beginner may come across as many as an older fisher but we speak of lochs where there are fish to be caught, and where each has a fair chance. Again, it is said that the boatman has as much to do with catching trout in a loch as the angler. Well, we don't deny that. In an untried loch it is necessary to have the guidance of a good boatman but the same argument holds good as to stream-fishing...

Don Juan , also Don Giovanni (Italian), is a legendary, fictional libertine. The first written version of the Don Juan legend was written by the Spanish dramatist Tirso de Molina (nom de plume of Gabriel Téllez).His play, *El burlador de Sevilla y convidado de piedra* (The Trickster of Seville and the Stone Guest), was set in the fourteenth century and published in Spain around 1630. The name "Don Juan" is a common metaphor for a womanizer.

This book traces the relationship between humanism and science from the mid-fifteenth century to the beginning of the modern

period and demonstrates that humanism was neither a simple nor an impractical enterprise, but worked hand-in-hand with science in developing modern learning.

A reconsideration of the problem of time in the Renaissance, examining the complex and layered temporalities of Renaissance images and artifacts. In this widely anticipated book, two leading contemporary art historians offer a subtle and profound reconsideration of the problem of time in the Renaissance.

Alexander Nagel and Christopher Wood examine the meanings,

uses, and effects of chronologies, models of temporality, and notions of originality and repetition in Renaissance images and artifacts. Anachronic Renaissance reveals a web of paths traveled by works and artists—a landscape obscured by art history's disciplinary compulsion to anchor its data securely in time. The buildings, paintings, drawings, prints, sculptures, and medals discussed were shaped by concerns about authenticity, about reference to prestigious origins and precedents, and about the implications of transposition from one medium to another. Byzantine icons taken to be Early Christian antiquities, the *acheiropoieton* (or “image made without hands”), the activities of

spoliation and citation, differing approaches to art restoration, legends about movable buildings, and forgeries and pastiches: all of these emerge as basic conceptual structures of Renaissance art. Although a work of art does bear witness to the moment of its fabrication, Nagel and Wood argue that it is equally important to understand its temporal instability: how it points away from that moment, backward to a remote ancestral origin, to a prior artifact or image, even to an origin outside of time, in divinity. This book is not the story about the Renaissance, nor is it just a story. It imagines the infrastructure of many possible stories.
