Discover the skiing downhill of the Swiss Val Ferret Mountain in this very detailed and documented book, written

by one of the most talented skiers of his generation. Located at the very heart of the highest mountains of Europe, the majestic Swiss Val Ferret massif stands as a reference among the most sacred skiing places in the world. When winter comes, this snow-addict heaven offers a unique range of dream slopes, from the easiest to the most breathtakingly high ones. Anselme Baud is an extreme skiing leading head and one of the best experts of this mountain. From classic skiing hikes

to mountaineering competitions, this guide book presents a precise description of all the biggest slopes this mythic area could offer. In this volume you can find all the information about the Swiss Val Ferret. Thanks to his charming accounts and instructive advice, Anselme Baud shares with us his precious and wide experience as a high mountain guide and an exceptional skier. ABOUT THE AUTHOR Born in Morzine in 1948, Anselme Baud made a mark on the Alps skiing steep slopes

history. He was a high mountain guide in 1973, and was one the first who skied extreme downhill in the Alps, the Andes, in Antarctica or in the Himalayas. As an ENSA professor, he supervised during several years the mountain guides training in Bolivia and Nepal. EXCERPT Swiss Val Ferret offers a very special collection of ski descents and tours. The numerous heli-drops of skiers in the winter have little affect on the ski-tourers in the area as the classic tours, such as the Three Cols, and the

start of the Chamonix-Zermatt Haute Route don't really get skied until the spring. There are three big huts that are convenient for early morning starts. A fourth hut (smaller and in a wonderful location) is also used by skiers, although it was built with summer climbers and mountaineers in mind and is similar to the La Maye Bivouac on Mont Dolent. [Guide to Switzerland and the Italian Lakes](#), [Illustrated with Maps and Plans](#) Touring Discover the skiing

downhills of the Tour Mountain in this very detailed and documented book, written by one of the most talented skiers of his generation. Located at the very heart of the highest mountains of Europe, the majestic Tour massif stands as a reference among the most sacred skiing places in the world. When winter comes, this snow-addict heaven offers a unique range of dream slopes, from the easiest to the most breathtakingly high ones. Anselme Baud is an extreme skiing leading

head and one of the best experts of this mountain. From classic skiing hikes to mountaineering competitions, this guide book presents a precise description of all the biggest slopes this mythic area could offer. In this volume you can find all the information about Le Tour. Thanks to his charming accounts and instructive advice, Anselme Baud shares with us his precious and wide experience as a high mountain guide and an exceptional skier. ABOUT THE AUTHOR Born in

Morzine in 1948, Anselme Baud made a mark on the Alps skiing steep slopes history. He was a high mountain guide in 1973, and was one the first who skied extreme downhills in the Alps, the Andes, in Antarctica or in the Himalayas. As an ENSA professor, he supervised during several years the mountain guides training in Bolivia and Nepal. EXCERPT The Le Tour ski station is served by the Charamillon-col de Balme lift systems. The skiing here is accessible, 'user-friendly' and good for all

the family. For the more committed off-piste skier, there is also the descent to Les Jeurs in Switzerland on the north face, above Vallorcine. However, as with any area at the head of a valley, Le Tour is subject to frequent changes in the air currents and you should be aware of what they are doing if you are planning to ski the routes here. In fact, although Le Tour has an image as an area for relatively easy 'moyenne montagne' skiing, you should not underestimate the ever-present risks.

The accumulation of snow that occurs as a direct result of these specific conditions is responsible, each year, for a number of accidents and avalanches. The high mountains that overlook this mixture of forests and pastures form the eastern extremity of the Mont Blanc Massif and it has been quite calm here since the snout of the glacier avalanched.
