An Introduction to

anthropology Greenwood
This volume addresses
the directions that studies

of archaeological human remains have taken in a number of different countries, where attitudes range from widespread support to prohibition. Overlooked in many previous publications, this diversity in attitudes is examined through a variety of lenses, including academic origins, national identities, supporting institutions, archaeological context and globalization. The volume situates this diversity of attitudes by examining past and current tendencies in

studies of archaeologically-retrieved human remains across a range of geopolitical settings. In a context where methodological approaches have been increasingly standardized in recent decades, the volume poses the question if this standardization has led to a convergence in approaches to archaeological human remains or if significant differences remain between practitioners in different countries. The volume also explores the

future trajectories of the study of skeletal remains in the different jurisdictions under scrutiny.

Introducing

Anthropology MacMillan
The *Tapestry of Culture: An Introduction to Cultural Anthropology* provides students and the interested public with a concise picture of the field of cultural anthropology

today. From the first edition of *Tapestry of Culture* published in the early 1980s until now, anthropology has changed greatly, responding to scholarly and political influences as well as changing generations; the ninth edition reflects this ongoing transformation. The influence of postmodernism has generated new debates over theory and practice in anthropology. The content of *Tapestry* explains these debates, as well as what is still

generally accepted and agreed upon by most anthropologists. This edition provides the instructor, student and lay public with the information necessary to enable them to critically read the literature of anthropology, more specifically ethnographic texts which are still the heart of this field. The approach of the book is to accommodate the various points of view in anthropology today. It shows how the concepts, ideas and behavior of other cultures are

translated into our culture's terms. Though today many emphasize each culture's uniqueness, the presence of cultural similarities is compelling. Using a comparative approach, *The Tapestry of Culture* reveals cultural similarities, as well as the cultural differences.

On assiste aujourd'hui en anthropologie à un déplacement d'intérêt des sociétés traditionnelles et exotiques vers la société industrielle moderne.

Qu'en est-il alors de l'objet et de la démarche anthropologiques ? C'est à cette problématique que s'efforce de répondre la présente introduction.

Loin de se limiter à adapter les manuels qui l'ont précédée aux connaissances les plus récentes de la discipline, cette introduction a l'ambition de soumettre le savoir anthropologique à un certain nombre d'interrogations relatives au renouvellement de son champ intellectuel et expérimental. C'est dire que sa première

préoccupation consiste dans la définition même de l'anthropologie. Dans un deuxième temps, l'ouvrage ouvre l'anthropologie sur les autres sciences de l'homme et vise par là même à une compréhension plus fine de ses contenus et de ses fondements épistémologiques. Comment ces différentes disciplines procèdent-elles pour réaliser leur idéal commun de savoir à visée objective ? Comment chacune d'entre elles transforme-t-elle et

rapporte-t-elle les conduites locales et les savoirs indigènes à un savoir scientifique global ? Le détour par les sociétés lointaines semble de ce point de vue conférer à l'anthropologie un certain avantage heuristique. Retenir une telle perspective pour la présentation de cette discipline implique de revenir sur l'histoire de la pensée anthropologique pour renouveler la lecture. Il ne s'agit plus de voir dans cette tradition l'affinement progressif d'un discours qui aurait

débouché sur le savoir moderne. Le discours anthropologique à visée empirique, c'est-à-dire descriptive et explicative, est considéré comme un langage spécifique, historiquement et culturellement déterminée, à l'intérieur du discours général sur l'altérité. Il est interrogé du point de vue de ses fonctions pragmatiques, de la construction de ses objets théoriques et de son mode d'écriture du texte scientifique.

If you want to know what anthropology is, look at what anthropologists do. *This Very Short Introduction to Social and Cultural Anthropology* combines an accessible account of some of the

disciplines guiding principles and methodology with abundant examples and illustrations of anthropologists at work. Peter Just and John Monaghan begin by discussing anthropologys most important contributions to modern thought: its investigation of culture as a distinctively human characteristic, its doctrine of cultural relativism, and its methodology of fieldwork and ethnography. They then examine specific ways in

which social and cultural anthropology have advanced our understanding of human society and culture, drawing on examples from their own fieldwork. The book ends with an assessment of anthropologys present position, and a look forward to its likely future. ABOUT THE SERIES: The Very Short Introductions series from Oxford University Press contains hundreds of titles in almost every subject area. These pocket-sized books are the perfect way to get

ahead in a new subject quickly. Our expert authors combine facts, analysis, perspective, new ideas, and enthusiasm to make interesting and challenging topics highly readable.

Over the course of the past decade, there has been an enormous augmentation in the amount of information available on the lemurs of Madagascar. These advances are closely coupled with an increase in the number of national

and international researchers working on these animals. As a result, Madagascar has emerged as one of the principal sites of primatological studies in the world. Furthermore, the conservation community has a massive interest in the preservation of the natural habitats of the island, and lemurs serve as one of the symbols of this cause. Between 10 and 14 August 1998, the XVIIth International Primatology Society (IPS) Congress was held in Antananarivo,

Madagascar. For a country that about a decade ago was largely closed to foreign visitors, this Congress constituted a massive event for the Malagasy scientific community and was assisted by about 550 primatologists from 35 different countries. Naturally, given the venue and context of the Congress, many of the presentations dealt with lemurs and covered a very wide breadth of subjects.

Les rapports de la pensée critique et de la réflexion anthropologique seront étudiés dans un ouvrage ultérieur. C'est sur cette note que s'achevait la brève Notice historique que Michel Foucault avait placée en tête de l'édition de sa traduction de l'Anthropologie de Kant (Vrin 1964). La note annonçait sans aucun doute l'ouvrage à venir, d'abord caractérisé, dès 1963, comme le livre sur les signes, et qui paraîtra en avril 1966: Les mots et les choses, une archéologie des sciences

humaines. En realite, la courte notice historique, de trois pages, en ouverture de la traduction du texte de Kant ne proposait qu'un extrait fort reduit de ce qui avait constitue l'element principal de la These complementaire soutenue en Sorbonne le 20 mai 1961: Introduction a l'anthropologie de Kant, et dont Jean Hyppolite etait le rapporteur. Si la these complementaire, intitulee Genese et structure de l'anthropologie de Kant, etait restee inedite (a l'exception de la

traduction de Kant), ce n'est pas que Foucault en eut ete insatisfait: suivant les conseils des membres du jury, il allait bientot, des l'automne 1963, en faire le materiau central de son grand livre a venir. D'ou l'interet considerable de la presente edition qui donne pour la premiere fois l'Introduction complete, Genese et structure de l'anthropologie de Kant, et qui permet ainsi au lecteur d'entrer dans l'atelier d'un penseur dont l'oeuvre entier aura ete nourri par un debat

critique avec Kant: qu'est-ce que l'homme? Qui sommes-nous? Comment se constituent le sujet epistemique et le sujet ethique?

Introduction à

l'anthropologie Pearson

This volume brings together an international array of scholars to reconsider the meaning and place of poststructuralism historically and demonstrate some of the ways in which it continues to be relevant, especially for debates in aesthetics,

ethics, and politics. The book's chapters focus on the works of Butler, Deleuze, Derrida, Foucault, Irigaray, Kristeva, Lacan, and Lyotard—in combination with those of Agamben, Luhman, Nancy, and Nietzsche—and examine issues including biopolitics, culture, embodiment, epistemology, history, music, temporality, political resistance, psychoanalysis, revolt, and the visual arts. The contributors use poststructuralism as a

hermeneutical strategy that rejects the traditional affirmation of unity, totality, transparency, and representation to instead focus on the foundational importance of open-ended becoming, difference, the unknowable, and expression. This approach allows for a more expansive definition of poststructuralism and helps demonstrate how it has contributed to debates across philosophy and other disciplines. *Historical Traces and Future Pathways of Poststructuralism* will be

of particular interest to researchers in philosophy, politics, political theory, critical theory, aesthetics, feminist theory, cultural studies, intellectual history, psychoanalysis, and sociology.

This volume presents discussions on a wide range of topics focused on eco-phenomenology and the interdisciplinary investigation of contemporary environmental thought. Starting out with a Tymieniecka Memorial

chapter, the book continues with papers on the foundations, theories, readings and philosophical sources of eco-phenomenology. In addition, it examines issues of phenomenological anthropology, ecological perspectives of the human relationship to nature, and phenomenology of the living body and the virtual body. Furthermore, the volume engages in a dialogue with contemporary behavioral sciences on topics such as

eco-alienation, sustainability, and the human relationship to the earth in the context of the cosmos.
