U.S. Marine Operations In Korea 1950-1953 Casemate

After surviving savage battles between the U.S. Marines and Red Chinese during the Chosin Reservoir campaign, Marcus Vandemere, an African American man, falls into the abyss of alcoholism. Haunted by the ghost of a Navy Pilot, he takes refuge in a Veterans hospital in 1973, where he dispatches with "headshrinkers" almost as quickly as he did the Chinese. But there he meets John Garrison, "a pretty white boy who got his face shot off in Vietnam". Marcus becomes John's first official patient. But life's twists and turns bring about an exchange of roles that will allow John to tell the story of his disfigurement. The two men forge a relationship that spans thirty years, going to John's last client, Amy O'Neal, who braved the treacherous highways of Iraq to run her convoys with unflinching courage. Disgraced for striking a coward and deprived of her Silver Star, which "only a handful of American women have been awarded" Amy has become deeply embittered while also suffering from Post Traumatic Stress, in addition to being addicted to meth amphetamines. Marcus and Amy meet by coincidence in a hospital chapel, and there is where the meaning of 'The Reservoir' is revealed as being not only a geographical spot on the map but a place in the human soul as well. It is from this other reservoir that Amy finds the strength to carry on with her life. Her asking Marcus "Were you in a war?" sets up the final chapters in which Marcus relives his part in the desperate struggle of the Marines against overwhelming odds at Chosin. And it is here too that the reader learns the identity of the ghost who had haunted Marcus into sobriety. Originally written as a screenplay in which the themes of 'Unforgiven' meet 'Saving Private Ryan' and 'The Bridges at Toko Ri', the characters in 'The Reservoir' staked themselves out a novel. And they got it. *A Fellowship of Valor* iUniverse

"This is the only single-volume, definitive combat history of the United States Marines, covering more than two centuries of battles in the air and on land and sea - literally, "from the Halls of Montezuma, to the shores of Tripoli," from Suribachi to Somalia. It presents graphic narrative of such epic engagements as Belleau Wood, Wake Island, Guadalcanal, Tarawa, Peleliu, Saipan, Okinawa, the Chosin Reservoir, Khe Sanh, and many more." "Here you will meet the Marine sharpshooters in the "fighting tops" of our young country's legendary frigates, as they took on the British navy during the American Revolution; discover the exploits of Marine pilots in the "Banana Wars," in the skies over the Pacific during World War II, and later over Korea and Vietnam; and share the tension and terror of stalking the enemy on a Marine patrol in the jungles of the Pacific islands and Southeast Asia." "An award-winning military historian, the author, a retired Marine colonel who served two tours of duty in Vietnam, tells the Marine combat story in a no-holds-barred narrative, with dozens of sidebars full of fascinating vignettes and Marine lore, accompanied by nearly one hundred rare combat photographs and vivid sketches, plus many maps."--BOOK JACKET. AS I RECALL, is a series of short stories recalling personal experiences of the author when a young Marine serving in Korea. Unlike most memoirs describing the horrors of war Tsegeletos describes the sights, sounds and what is most fascinating, the thoughts that ran through his mind during each incident. An occasional quip added while engaged in life threatening action, brings to the reader lighthearted relief to what at the very least is serious business indeed. At the age of 17, George along with many of his high school friends joined a Marine reserve unit located close to home. 1950 and half way around the globe North Korea invaded South Korea, but to these young Marines it seemed too far away to be of much concern. Looking forward to their graduation, summer vacation and beginning a new career, whether college or work, their world is suddenly turned upside down when they are rushed into a very uncertain military future. From his first step on North Korean soil through each story that follows, including the final narrative describing the experience of survival in the cold frozen environment during the epic Chosin Reservoir Campaign, you will be taking each step with him. Included are illustrations interspersed between stories and copies of actual letters sent home. The book leaves you with a true picture of life in a foxhole as seen through the eyes of a young Marine. Tsegeletos will hold the readers attention and win the hearts of all moms with a young son in the U.S. Marines.

*Includes pictures *Includes a bibliography for further reading "It seems strangely difficult for some to realize that here in Asia is where the Communist conspirators have elected to make their play for global conquest, and that we have joined the issue thus raised on the battlefield; that here we fight Europe's war with arms while the diplomats there still fight it with words; that if we lose the war to communism in Asia the fall of Europe is inevitable, win it and Europe most probably would avoid war and yet preserve freedom. As you pointed out, we must win. There is no substitute for victory." - Douglas MacArthur, 1951. The Korean War is often labeled "the forgotten war," and though it has received renewed attention in recent years, it still pales compared to others in recent history, like the Vietnam War or even the more recent wars in Iraq and Afghanistan. What's mostly overlooked is that the Korean War was one of the most intense conflicts the United States fought, and the soldiers who served in it were arguably in greater peril than in any other war over the last 75 years. While the Truman administration and the Chiefs of Staff had a clear plan for the conflict, seemingly everything went horribly wrong once China entered the conflict, and despite the United Nations coalition forces' technological and logistical superiority, they found themselves on the defensive. The Battle of Chosin Reservoir was a dramatic example of a battle plan gone awry. General Douglas MacArthur had conceived of a triumphant march to the Yalu River, ending the war and uniting Korea. The UN troops, led by the United States, had turned the fight around with the amphibious landing in Inchon, which took place in September 1950. The North Korean People's Army (NKPA) tried to contain the Pusan Perimeter invasion, but they broke through, and before long the coalition troops were headed deep into North Korean territory. Some units had reached the Yalu River, which marks the frontier between North Korea and China. At this point, the mission's goal was to eliminate the NKPA and reunite Korea under a pro-Western regime, but the forces under MacArthur's command found themselves surrounded and beleaguered in sub-zero temperatures. As it turned out, the United States and its allies badly mishandled China's entry into the Korean War, a dramatic and critical development in the conflict that completely changed the balance of power in the theater. The Battle of Chosin Reservoir was one of the most decisive battles that followed, one where both the Americans and the Chinese underestimated their rivals and thought that victory could be achieved easily. As it turned out, nothing was easy at the Chosin Reservoir, and both sides would pay a heavy toll for the miscalculations of their superiors, but the result would mark a major turning point that helped determine how the war ended, and how the map of Asia looks today. The Battle of Chosin Reservoir: The History of the Chinese Victory that Pushed UN Forces Out of North Korea during the Korean War looks at one of the Korean War's most important fights, from its origins to its aftermath. Along with pictures depicting important people, places, and events, you will learn about the Battle of Chosin Reservoir like never before.

War has been the inspiration of such great novels as *The Red Badge of Courage* and *A Farewell to Arms*, and daring feats of courage and tragic mistakes have been the foundation for such classic works. Now, for the first time ever, the Korean War has a novel that captures that courage and sacrifice. When Captain Thomas Verity, USMC, is called back to action, he must leave his Georgetown home, career, and young daughter and rush to Korea to monitor Chinese radio transmissions. At first acting in an advisory role, he is abruptly thrust into MacArthur's last daring and disastrous foray-the Chosin Reservoir campaign-and then its desperate retreat. Time magazine at the time recounted the retreat this way: "The running fight of the Marines...was a battle unparalleled in U.S. military history. It had some aspects of Bataan, some of Anzio, some of Dunkirk, some of Valley Forge, and some of 'the retreat of the 10,000' as described in Xenophon's *Anabasis*." The Marines of Autumn is a stunning, shattering novel of war illuminated only by courage, determination, and Marine Corps discipline. And by love: of soldier for soldier, of men and their women, and of a small girl in Georgetown, whose father promised she would dance with him on the bridges of Paris. A child Captain Tom Verity fears he may never see again. In *The Marines of Autumn*, James Brady captures our imagination and shocks us into a new understanding of war. *Breakout Fort Leavenworth*, Kan. : U.S. Army Command and General Staff College "The authors of the bestselling Halsey's Typhoon do a fine job recounting one brutal, small-unit action during the Korean War's darkest moment." —Publishers Weekly November 1950, the Korean Peninsula. After General MacArthur ignores Mao's warnings and pushes his UN forces deeper into North Korea, his 10,000 First Division Marines find themselves surrounded and hopelessly

outnumbered by 100,000 Chinese soldiers near the Chosin Reservoir. Their only chance for survival is to fight their way south through the Toktong Pass, a narrow gorge that will need to be held open at all costs. The mission is handed to Captain William Barber and the 234 Marines of Fox Company, a courageous but undermanned unit of the First Marines. Barber and his men climb seven miles of frozen terrain to a rocky promontory overlooking the pass, where they will endure four days and five nights of nearly continuous Chinese attempts to take Fox Hill. Amid the relentless violence, three-quarters of Fox's Marines are killed, wounded, or captured. Just when it looks like they will be overrun, Lt. Colonel Raymond Davis, a fearless Marine officer who is fighting south from Chosin, volunteers to lead a daring mission that will seek to cut a hole in the Chinese lines and relieve the men of Fox. This is a fast-paced and gripping account of heroism in the face of impossible odds.

Oliver P. Smith fought at Peleliu and Okinawa and then commanded the 1st Marine Division in Korea during the assault at Inchon, the recapture of Seoul, and the breakout from the Chosin Reservoir. Called one of the twentieth century's great Marine leaders, Smith was known as an outstanding combat commander and a man of great intellect and moral courage. This biography, written by the granddaughter he helped raise, illuminates the general's remarkable life. It draws on interviews, oral histories and a thorough examination of letters held by the family and not previously available to researchers. Gail Shisler's investigation of Smith's relationship with his Army superiors in Korea and with his Marine Corps peers and superiors takes exception to previously published descriptions and adds new insights into the Corps' postwar battle for survival.
