Innovative contributors bring us a richer understanding of the long-neglected themes of nature that are woven through the biblical creation story, ancient texts, traditional law, the holiday cycles, prayer, mitzvot (good deeds) and community. [Complete Earth Medicine Handbook](#) Grub Street Publishers

What makes ice cubes cloudy? How do shark attacks make airplanes safer? Can a person traveling in a car at the speed of sound still hear the radio? Moreover, would they want to...? Do you often find yourself pondering life's little conundrums? Have you ever wondered why the ocean is blue? Or why birds don't get electrocuted when perching on high-voltage power lines? Robert L. Wolke, professor emeritus of chemistry at the University of Pittsburgh and acclaimed author of *What Einstein Didn't Know*, understands the need to...well, understand. Now he provides more amusing explanations of such everyday phenomena as gravity (If you're in a falling elevator, will jumping at the last instant save your life?) and acoustics (Why does a whip make such a loud cracking noise?), along with amazing facts, belly-up-to-the-bar bets, and mind-blowing reality bites all with his trademark wit and wisdom. If you shoot a bullet into the air, can it kill somebody when it comes down? You can find out about all this and more in an astonishing compendium of the proverbial mind-boggling mysteries of the physical world we inhabit. Arranged in a question-and-answer format and grouped by subject for browsing ease, **WHAT EINSTEIN TOLD HIS BARBER** is for anyone who ever pondered such things as why colors fade in sunlight, what happens to the rubber from worn-out tires, what makes red-hot objects glow red, and other scientific curiosities. Perfect for fans of Newton's Apple, Jeopardy!, and The Discovery Channel, **WHAT EINSTEIN TOLD HIS**

**BARBER** also includes a glossary of important scientific buzz words and a comprehensive index. -->

Drawing on healing systems from around the world, a medical anthropologist and herbalist offers natural and holistic remedies for treating Lyme disease When Dr. Wolfe Storl was diagnosed with lyme disease, he refused standard treatments because of antibiotic intolerance. Instead, he researched healing systems of various cultures—including Traditional Chinese Medicine, American Indian healing practices, homeopathy, and traditional Western herbal lore—and discovered the teasel root. Teasel, a flowering plant that grows throughout Europe and Asia, tonifies the liver and kidneys, promotes blood circulation, and strengthens the bones and tendons. The plant has been documented to help cure chronic conditions marked by arthritis, sore, stiff muscles, and eventual incapacitation—all symptoms associated with Lyme disease. Dr. Storl's approach consists of flushing out toxins and inhibiting bacteria by using teasel root as tincture, powder, or tea (available for purchase online and in natural foods stores); stimulating the immune system and detoxifying the body by exposing it to extreme heat (sweat lodges and Japanese baths); and dietary and naturopathic measures, including fresh natural food, exercise, and sufficient sleep. Written in an encouraging, personal tone but based in science and clinical studies, *Healing Lyme Disease Naturally* offers hope in combating a condition that has stubbornly resisted conventional medical treatment.

**Lichens for Vegetable Dyeing** Julia Bolton Holloway

"I hope that reading this book can become a kind of inner conversation. If this conversation unfolds in such a way that it reveals the hidden inner forces that can be awakened in every soul, then reading this book may lead to genu-ine, inner soul work. As a result you may find yourself gradually impelled to undertake the journey of the soul that truly leads to vision of the spiritual world." --Rudolf Steiner Part one, "A Way of Self-

Knowledge": Eight meditations that take the reader on a journey through human experience. Beginning with ordinary experience, Steiner offers ways to imagine and understand the physical body, the elemental (or etheric) body, the elemental world, the Guardian of the Threshold, the astral body, the I-body (or thought body), the nature of experience in suprasensory worlds, and ways of perceiving previous earthly lives. Part two, "The Threshold of the Spiritual World": Sixteen short chapters in which Steiner provides aphoristic thoughts on trusting one's thinking, cognition of the spiritual world, karma and reincarnation, the astral body and luciferic beings, how to recognize suprasensory consciousness, the true nature of love, and more. These two complete books together represent Steiner's most personal statements about his own spiritual path. He speaks directly from experiences of cognitive research and explorations. Each of the meditations and aphorisms arises from his spiritual research and demonstrates how such spiritual research is to be undertaken. The "content" is Steiner's own, but readers can discover their own "content." Steiner's method of awareness--his path of attention to one's own experience--is universal and truly human. *A Way of Self-Knowledge* is a true sequel and complement to the classic of inner development, *How to Know Higher Worlds*. It lays out in a way that is accessible to anyone the road to self-knowledge and to the world of spirit. This Collected Works edition contains a new introduction, a chronology of Rudolf Steiner's life, and an index. Front cover image: Meditation by Jennifer Thomson

([www.phoenixartsgroup.org](http://www.phoenixartsgroup.org)) *A Way of Self-Knowledge: And the Threshold of the Spiritual World* is a translation of «Ein Weg zur Selbsterkenntnis des Menschen: In acht Meditationen» (GA 16) and «Die Schwelle dre geistigen Welt: Aphoristische Ausführungen» (GA 17).

[Freemasonry of the Ancient Egyptians](#)  
Houghton Mifflin Harcourt

The classic edition is back! First published in 1988, Weiss's *Herbal Medicine* is revered by herbalists and medical

professionals alike as the seminal work in the field of phytotherapy. This book has established itself as an indispensable resource and is widely acknowledged as the key text in the field of medical herbalism. You will find clear, detailed information on treating conditions ranging from colds and influenza to rheumatic problems, metabolic and endocrine disorders, cancer, and much more. Conveniently arranged by organ system, the text provides guidelines for prescribing herbal remedies, with sections on dosage, application, and precautionary measures. Plus, for each plant discussed, you will find lists of their occurrence, botanical features, differentiation from related species, constituents, and medical benefits. Proprietary formulations, full references, and a comprehensive subject index of almost 2,000 entries round out the superb coverage! Weiss's life's work examines the subject of herbal medicine from both a clinical and practical viewpoint, incorporating his personal observations and clinical experience with scientific studies. This material formed the basis of *Herbal Medicine*, 2E, also by Thieme. The second edition, revised, expanded and modernized by Volker Fintelmann, streamlines the work into a more clinical text, incorporating the latest scientific research and Commission E findings on the efficacy of herbs. This edition is recommended for allopathic physicians and other medical professionals who are new to the field of herbal medicine. Professor Rudolf Fritz Weiss (1895-1991) is highly regarded as the founding father of modern German phytotherapy. He studied botany and medicine at the University of Berlin, qualifying as a doctor in 1922 and subsequently taking additional qualifications in internal medicine. A teaching post in herbal medicine was interrupted by war service as an army doctor, followed by seven years in Russian captivity as a doctor in prisoner-of-war camp hospitals. After retiring from clinical practice in 1961, he devoted his life to the scientific development and acceptance of herbal medicine. Weiss was appointed as a member of the German Commission E in 1978. He was founder and editor of the *Zeitschrift fuer Phytotherapie*, and lectured on current advances in the subject at the University of Tuebingen.

**All Pets Go To Heaven** Courier Corporation  
Interprets the Freemasonry of the ancient Egyptians as set forth in the teachings of the State Mysteries. Among the subjects discussed are Egyptian magic, the Osirian cycle, the secret doctrine of Egypt, and

the initiation of Plato. The appendix is *The Crata Repoa*, a restoration of the ancient Egyptian mysteries, describing the initiation ceremonies which took place in the old Egyptian temples. This has been translated into English by Dr. John Yarker from the French edition of 1778.

The Oil-protein Diet Cookbook Harpercollins  
Noted textile designer and lichen expert explains how to create and use dyes derived from lichens. Text covers history of the use of lichen pigments, safe dyeing methods, ecologically sound dyeing, and use of mordants, lichen identification, and more. Text also offers a fascinating history of Asian and European lichen pigments, Scottish, Irish, and Scandinavian domestic lichen dyes, and others.

Create wildlife habitats and attract birds, bees, and other creatures to your very own garden: "A must-have for any gardening library." —Gardeners World Filled with beautiful photos, this book is a practical guide for anyone who wants to make a home for wildlife in their garden—even if they don't have a lot of space. Divided into sections on shelter, food, and water, it includes: \*advice on the best nectar and pollen plants to grow \*dos and don'ts of bird feeding \*information on organic methods of pest control \*ten projects—with step-by-step pictures—that will help encourage wildlife, such as creating a bumblebee nester, making a

green roof, and building a hedgehog box. Also included is a mini field guide, which will help you identify the birds and other creatures you're likely to spot in your garden. The Wildlife Gardener gives tips on particular species, explaining what to look out for and how to cater for specific birds, mammals, bees, butterflies, moths, and pond life. "A joyous book." —Alan Titchmarsh, author of *My Secret Garden*  
**Pigeon Poo, the Universe and Car Paint** Viking Books

Schott's Almanac redefines the traditional almanac to present a record of the year just past and is designed to be read, not merely consulted. Practical and entertaining, it tells the real stories of 2006, from the winner of American Idol to the Supreme Court nominations (including how different justices have voted), from baseball and football statistics to the founder of amazon.com's new private rocketship factory. In an age when information is plentiful but selection is rare, Schott's Almanac offers both the essential facts and the lucid, provocative analysis. It is comprehensive, innovative, endlessly engaging - in short, indispensable.

Earth Education SteinerBooks

For over twenty years the public has been led to believe that there is a serious educational response underway regarding the environmental problems of the earth. It is not true. The environmental movement has been led astray: + trivialized by mainstream education + diluted by those with other agendas + co-opted by the very agencies and industries that have contributed so much to the problems. This book proposes another direction--an alternative that many environmental leaders and teachers around the world have already taken. It is called The Earth Education Path, and anyone can follow it in developing a genuine educational program made up of magical learning adventures. Earth education aims to accomplish what environmental education set out to do, but

didn't: to help people improve upon their cognitive and affective relationship with the earth's natural communities and life support systems, and begin crafting lifestyles that will lessen their impact upon those places and processes on behalf of all the earth's passengers. If you care about the health of our troubled planet, then you should read what this internationally known educator has to say about how we lost a whole generation of teachers and leaders and what you can do to help them find their way again.--Page [4] of cover.

*Heilmittel der Sonne* - eBook North Atlantic Books

You don't have to be an eccentric obsessive to be a scientist, but it helps... In *The Mad Science Book*, Reto Schneider tells the extraordinary tales of 100 of the more unusual experiments conducted across seven centuries of science. From the attempts of the 14th-century Dominican monk Theodoric von Freiberg to discover the cause of the rainbow, to the efforts of the 20th-century psychologist Harry Harlow to be the perfect mother to a family of reluctant rhesus monkeys, these are stories that are often bizarre, sometimes mind-boggling - occasionally stomach-churning - but always diverting, informative and enlightening. Among the myriad delights on display in this cabinet of scientific curiosities are the renowned doctor from Padua who sat in a pair of scales for 30 years, recording the minutest changes in his weight; the sheep, the duck and the rooster who became the world's first air passengers; the disgusting Dr Stubbins Ffirth, who swallowed other people's vomit in an attempt to prove that yellow fever cannot be transmitted from one person to another; the hapless soldier Alexis St Martin, left with a hole in his stomach after an accident with a musket; and the ever-optimistic Charles-Édouard Brown-Séquard, who injected himself with essence of guinea pigs' testicles as an anti-ageing remedy. There is trivia here in

abundance, but also quirky, but genuinely influential, science, notably Merrill Flood's and Melvin Dresher's experiments with choices of outcomes, which have been widely influential as game theory. A fizzing cocktail of fascinating science and rich entertainment, *The Mad Science Book* tells the extraordinary stories of some truly, madly, geeky people. It should be top of every self-respecting science buff's Christmas 2008 wishlist.

**Wild Health** Crown Archetype

Being massaged makes babies relax and cope better with stress, improves their muscular coordination and flexibility and helps them straighten tightly flexed hands and legs. And who better to teach parents how to acquire these essential skills than Peter Walker, the world's best-known baby massage teacher. In this fully revised edition of his best-selling guide, he demonstrates vital new sequences essential for very young babies, which can be done while a baby is clothed.

The Mad Science Book Freya

The first in a new Karl Kruszelnicki series, this book contains 40 bizarre and funny stories about the latest discoveries in science, from sex and forgetting, to the moon and green cheese.

*Lichen Dyes* A. V. Publications Corporation  
 Trace the progress of humanity—from prehistoric times to the present day—through 1,001 ideas that changed how we connect to each other and the world around us. From the ability to control fire to augmented reality, the power of humanity's ideas has revolutionized how we live and experience the world around us. *1001 Ideas That Changed the Way We Think* looks at the innovations and concepts that have played a key role in our progress since before recorded history. Covering a wide range of topics—from political and religious ideas to modern innovations such as social media and clean energy—this captivating volume offers a comprehensive look at how human ideas have evolved over the millennia.
