The Corruption of Ethos in
Fortress America:
Billionaires, Bureaucrats,
and Body Slams argues

that authoritarian strains of U.S. governance violate the idea of ethos in its ancient, collectivist sense. Christopher Carter posits that this corrupts the cultural “dwelling place” through public relations strategies, policies on race and immigration, and a general disregard for environmental concerns. Donald Trump’s presidency provides a signal instance of the problem, refashioning the dwelling place as a fortress while promoting sweeping forms of exclusion and appealing

to power for power’s sake. Carter’s analysis shows that, emboldened by the purported flexibility of truth, Trump’s authoritarian rhetoric underwrites unrestrained policing, militarized borders, populist nationalism, and relentless assaults on investigative journalism. These trends bode ill for human rights and critical education as well as progressive social movements and the forms of life they entail. Worse yet, the corruption of ethos threatens life in

general by privileging corporate prerogatives over ecological attunement. In response to those tendencies, Carter highlights modes of activism that merge antiracist and labor rhetoric to offer a more fluid, unpredictably emergent vision of social space, allying with ecofeminism in ways that make that vision durable. Scholars of rhetoric, political science, history, ecology, race studies, and American studies will find this book particularly useful.

 Conrad von der Rosen, my fool, when I am free again what wilt thou do ? I shall then buy myself new bells to sew to my cap. And how shall I reward thy fidelity ? Ah my dear master, only do not have me put to death. jprom fl)f Sngltsf) National love of

the Germans feel no need either for free- om- dom or for equality. They are a speculative people ? ideologists ? a race of dreamers that look before and after ? that live only in the past and the future, and who have no present. Englishmen and Frenchmen have a present: to them every day brings its conflict, its resistance, and its history. The German has nothing for which to combat; and no sooner does he begin to suspect that there may possibly be things the possession of which is

desirable, than philosophical wiseacres teach him to doubt the existence of such things. It cannot be denied that even Germans love freedom, but they love it after a different fashion than do other nations. An Englishman loves freedom as he loves his lawfully wedded wife. He regards her as a possession; and, if he does not treat her with special tenderness, yet, if need be, he knows how to defend her as a man should. A Frenchman loves freedom as he does his chosen bride. His love

is ardent and fervent; he throws himself at her feet with the most exaggerated protestations; he will fight for her to the death; he will commit a thousand follies for her sake. A German loves freedom as he does his old grandmother. But the splenetic Briton, tired of his wife, is capable of some day putting a halter round her neck and leading her off to Smithfield for sale. The fickle Frenchman may perhaps become faithless to his bride, and will then

desert her to go dancing and singing after the courtesans of the Palais Royal. But the German will...

The English-speaking World

World Scientific The growth of the Pentecostal movement is often most evident among the poor and disenfranchised of society, as, for example, among the Hispanic-American community. As this community continues to develop, will Pentecostal theology be able to incorporate into its hermeneutics those

issues that especially concern it? Solivan looks at relevant issues to this debate from a Hispanic-American perspective, presenting an overview of Hispanic diversity, and its common roots and struggles. He talks of four critical issues in Hispanic theology (religious experience, suffering, the work of the Holy Spirit and the importance of language and culture) and other issues including acculturation and assimilation. He shows how a community's suffering and oppression

can be transformed by the Holy Spirit into a liberating life, full of hope and promise.

(1874–1936) was an

English writer. He wrote

on philosophy, ontology,

poetry, plays, journalism,

public lectures and

debates, literary and art

criticism, biography,

Christian apologetics, and

fiction, including fantasy

and detective fiction.

Chesterton is often

referred to as the "prince

of paradox". Whenever

possible, Chesterton

made his points with

popular sayings, proverbs,

and allegories—first

carefully turning them

inside out. Chesterton is

well known for his

reasoned apologetics and

even some of those who

disagree with him have

recognized the universal

appeal of such works as

Orthodoxy and The

Everlasting Man.

Chesterton, as a political

thinker, cast aspersions

on both progressivism and

conservatism, saying,

"The whole modern world

has divided itself into

Conservatives and

Progressives. The

business of Progressives

is to go on making mistakes. The business of the Conservatives is to prevent the mistakes from being corrected."

Chesterton routinely referred to himself as an "orthodox" Christian, and came to identify such a position more and more with Catholicism, eventually converting to Roman Catholicism from High Church Anglicanism. George Bernard Shaw, Chesterton's "friendly enemy" said of him, "He was a man of colossal genius". INCLUDED BOOKS: GILBERT KEITH

 Thirteen tales of

 acclaimed author of Home
 Cooking and Happy All the
 Time In the title story of
 this elegant and insightful
 collection, a book
 illustrator meets the man
 of her dreams and
 struggles to say good-bye

to her old self: the perfect houseguest who delighted in the dinner parties of her married friends and always went home alone. "A Mythological Subject" is the tale of an adulterous affair that arrives unexpected and unwanted, like a natural disaster, but is no mistake. In "The Smile Beneath the Smile," Rachel Manheim, an ardent and intelligent young woman, must finally decide what to do about her unavailable lover. "A Girl Skating" is a delicate and haunting

portrait of the unbridgeable divide between life and art, poetry and nature. The warmth, humor, and emotional honesty that characterize Laurie Colwin's writing are on full display in *The Lone Pilgrim*. Each of these sublime stories is a celebration not just of Colwin's remarkable talent, but of the beautiful mysteries of the human heart. This ebook features an illustrated biography of Laurie Colwin including rare photos and never-before-seen documents

Kenosis, a Greek word meaning "depletion" or "emptying" and a concept borrowed from Christian theology, has deeply profound implications for understanding and ordering life in a world marked by suffering and death. Whereas the divine kenosis was voluntary, human beings experience an involuntary kenosis which is characterized by the inevitable losses experienced during the lives of mortal creatures.

How one chooses voluntarily to respond to this involuntary kenosis, regardless of faith commitments, in effect defines us, both in our relationships with other suffering creatures and with the entire cosmos. This book offers a unique perspective on how the losses of involuntary kenosis choreograph the suffering which is such a defining aspect of the lives of persons, communities, and the environment in which they live, and how the kenotic process, rather

than being a source of despair, can be a source of hope presenting opportunities for extraordinary personal growth.

As the digital economy changes the rules of the game for enterprises, the role of software and IT architects is also transforming. Rather than focus on technical decisions alone, architects and senior technologists need to combine

organizational and technical knowledge to effect change in their company's structure and processes. To accomplish that, they need to connect the IT engine room to the penthouse, where the business strategy is defined. In this guide, author Gregor Hohpe shares real-world advice and hard-learned lessons from actual IT transformations. His anecdotes help architects, senior developers, and other IT professionals prepare for a more complex but rewarding

role in the enterprise. This book is ideal for: Software architects and senior developers looking to shape the company's technology direction or assist in an organizational transformation Enterprise architects and senior technologists searching for practical advice on how to navigate technical and organizational topics CTOs and senior technical architects who are devising an IT strategy that impacts the way the organization works IT managers who want to learn what's worked and

Thriving in the Face of Mortality "O'Reilly Media, Inc."
 A comprehensive study of ephemera in twentieth-century literature—and its relevance to the twenty-first century “Nothing ever really disappears from the internet” has become a common warning of the digital age. But the twentieth century was filled with ephemera—items that were designed to disappear forever—and these objects played

crucial roles in some of that century's greatest works of literature. In The Death of Things, author Sarah Wasserman delivers the first comprehensive study addressing the role ephemera played in twentieth-century fiction and its relevance to contemporary digital culture. Representing the experience of perpetual change and loss, ephemera was central to great works by major novelists like Don DeLillo, Ralph Ellison, and Marilynne Robinson.

Following the lives and deaths of objects, Wasserman imagines new uses of urban space, new forms of visibility for marginalized groups, and new conceptions of the marginal itself. She also inquires into present-day conundrums: our fascination with the durable, our concerns with the digital, and our curiosity about what new fictional narratives have to say about deletion and preservation. *The Death of Things* offers readers fascinating, original angles on how objects

shape our world. Creating an alternate literary history of the twentieth century, Wasserman delivers an insightful and idiosyncratic journey through objects that were once vital but are now forgotten.

Desiring the Good

defends a novel and

distinctive approach in

ethics that is inspired by ancient philosophy. Ethics, according to this approach, starts from one question and its most immediate answer: "what is the good for human beings?"--"a well-going human life." Ethics thus conceived is broader than moral philosophy. It includes a range of topics in psychology and metaphysics. Plato's *Philebus* is the ancestor of this approach. Its first premise, defended in Book I of Aristotle's *Nicomachean Ethics*, is that the final agential

good is the good human life. Though Aristotle introduces this premise while analyzing human activities, it is absent from approaches in the theory of action that self-identify as Aristotelian. This absence, Vogt argues, is a deep and far-reaching mistake, one that can be traced back to Elizabeth Anscombe's influential proposals. And yet, the book is Anscombian in spirit. It engages with ancient texts in order to contribute to philosophy today, and it takes questions about the

human mind to be prior to, and relevant to, substantive normative matters. In this spirit, Desiring the Good puts forward a new version of the Guise of the Good, namely that desire to have one's life go well shapes and sustains mid- and small-scale motivations. A theory of good human lives, it is argued, must make room for a plurality of good lives. Along these lines, the book lays out a non-relativist version of Protagoras's Measure Doctrine and defends a

new kind of realism about good human lives.

Equally important to our understanding of history and humanity are the great works of literature. The Nobel Prize for literature recognises modern classics and the efforts of authors to bridge gaps between different cultures, time-periods and styles; the prizewinners between 1968 and 1995 are from four continents. These

volumes are collections of the Nobel lectures delivered by the prizewinners, together with their biographies, portraits and presentation speeches for the period 1968 - 1995. Each Nobel lecture is based on the work that won the laureate his prize. New biographical data of the laureates, since they were awarded the Nobel prize, are also included. These volumes of inspiring lectures by outstanding individuals should be on everyone's bookshelf.

In this book the author explores the shifting philosophical boundaries of modern medical knowledge and practice occasioned by the crisis of quality-of-care, especially in terms of the various

humanistic adjustments to the biomedical model. To that end he examines the metaphysical, epistemological, and ethical boundaries of these medical models. He begins with their metaphysics, analyzing the metaphysical positions and presuppositions and ontological commitments upon which medical knowledge and practice is founded. Next, he considers the epistemological issues that face these medical models, particularly those

driven by methodological procedures undertaken by epistemic agents to constitute medical knowledge and practice. Finally, he examines the axiological boundaries and the ethical implications of each model, especially in terms of the physician-patient relationship. In a concluding Epilogue, he discusses how the philosophical analysis of the humanization of modern medicine helps to address the crisis-of-care, as well as the question of "What is medicine?" The

book's unique features include a comprehensive coverage of the various topics in the philosophy of medicine that have emerged over the past several decades and a philosophical context for embedding bioethical discussions. The book's target audiences include both undergraduate and graduate students, as well as healthcare professionals and professional philosophers. "This book is the 99th issue of the Series Philosophy and Medicine...and it can be

considered a crown of thirty years of intensive and dynamic discussion in the field. We are completely convinced that after its publication, it can be finally said that undoubtedly the philosophy of medicine exists as a special field of inquiry."

Sniper is the behind-the-scenes story of one of the most frightening

rampages to occur in U.S. history—and how it was stopped. For more than three weeks, the nation watched in disbelief as Washington, D.C., and its surrounding suburbs were held hostage by anonymous gunmen shooting innocent civilians at random. Sniper is the definitive account of those alleged gunmen, John Muhammad and Lee Boyd Malvo, and the massive manhunt that ended with their capture by a heavily armed SWAT team in an early-morning raid at an interstate highway rest

stop. Two Washington Post reporters, Sari Horwitz and Michael E. Ruane, retrace the steps of Muhammad and Malvo from their first meeting on the island of Antigua to Malvo's defiant confession in a Virginia jail. Drawing on exclusive reporting about that confession, internal police documents, and a wide range of law-enforcement sources, Horwitz and Ruane track in remarkable detail the murderous trail Muhammad and Malvo are accused of having followed to the

Washington area and reconstruct the eerie way in which the two moved invisibly around the nation's capital in the midst of one of the largest police investigations in U.S. history. Horwitz and Ruane also take you inside the police command center where local and state police, joined by the federal government's most experienced crime fighters, worked desperately to stop the killings, unaware that a fundamental error—investigators were

wrongly fixated on a white van—was allowing Muhammad and Malvo to slip through the dragnet. We meet FBI negotiators, veteran detectives, forensics experts, prosecutors, and politicians who faced perhaps the biggest challenge of their careers as they confronted frustrating setbacks, logistical nightmares, and the overwhelming pressure of a high-stakes investigation. In a fast-paced narrative that outdoes even the most acclaimed television cop

shows, Sniper recounts the extraordinary police work that enabled investigators to quickly exploit the clues handed to them by Muhammad and Malvo that finally led to their arrest. Part gripping drama, part real-life portrait of law enforcement at work, Sniper is also a cautionary tale about the vulnerability of American society in an age of terrorism.

The aim of this book is to provide an account of

modernist painting that follows on from the aesthetic theory of Theodor W. Adorno. It offers a materialist account of modernism with detailed discussions of modern aesthetics from Kant to Arthur Danto, Stanley Cavell, and Adorno. It discusses in detail competing accounts of modernism: Clement Greenberg, Michael Fried, Yve-Alain Bois, and Thierry de Duve; and it discusses several painters and artists in detail: Pieter de Hooch, Jackson Pollock, Robert Ryman, Cindy

Sherman, and Chaim Soutine. Its central thesis is that modernist painting exemplifies a form of rationality that is an alternative to the instrumental rationality of enlightened modernity. Modernist paintings exemplify how nature and the sociality of meaning can be reconciled.

'Moral character, so to say, constitutes the most effective means of proof.' In ancient Greece, rhetoric was at the centre of public life. Many writers attempted to provide manuals to help improve debating skills, but it was

not until Aristotle produced *The Art of Rhetoric* in the 4th century bc that the subject had a true masterpiece. As he considered the role of emotion, reason, and morality in speech, Aristotle created essential guidelines for argument and prose style that would influence writers for more than two millennia. Brilliantly explained and carefully reasoned, *The Art of Rhetoric* remains as relevant today as it was in the assemblies of ancient Athens.

This book takes the formidable 100,000-word classic *Zen Training* by the great master Katsuki Sekida and extracts its finest gems. Student Marc Allen has carefully chosen the passages most relevant to today, producing a readable work of six chapters covering the basics of posture and breathing, stages in training, and Katsuki Sekida's brilliant commentary on the classic series of pictures called "In Search of the

written, building to a tremendous conclusion: "Zen is a matter of

training yourself to return to being a Buddha, for you are one from the beginning."
