As newspapers and broadcast news outlets direct more resources toward online content, print reporters and photojournalists are picking up video cameras and crafting new kinds of stories with their lenses. Creating multimedia video journalism requires more than simply adapting traditional broadcast techniques: it calls for a new way of thinking about how people engage with the news and with emerging media technologies. In this guide, Kurt Lancaster teaches students and professional journalists how to shoot better video and tell better stories on the web, providing a strong understanding of cinematic storytelling and documentary production so their videos will stand out from the crowd. Video Journalism for the Web introduces students to all the basic skills and techniques of good video journalism and documentary storytelling, from shots and camera movements to sound and editing—as well as offering tips for developing compelling, character-driven narratives and using social media to launch a successful career as a "backpack journalist." Shooting, editing, and writing exercises throughout the book allow students to put these techniques into practice, and case studies and interviews with top documentary journalists provide real-world perspectives on a career in video journalism. This book gives aspiring documentary journalists the tools they need to get out in the field and start shooting unforgettable multimedia stories.

"Video Shooter takes you to a new level of competence and expertise by presenting the camera as a potent storytelling tool. Sure, you will learn the basics of HD formats, the fundamentals of compression and color space, but only so much as these technical areas serve your craft, which includes more fundamentally camera placement and eyeline, choice of lens focal length and the power of the triangle in creating powerful compositions. Throughout the book you will come to understand the master shooter's guiding principle, that story is the conduit through which all creative and technical decisions flow."--Publisher's description.

Feature and Narrative Storytelling for Multimedia Journalists is the first text that truly focuses on the multimedia and documentary production techniques required by professional journalists. Video and audio production methods are covered in rich detail, but more importantly, various storytelling techniques are explored in depth. Likewise, author Duy Linh Tu tackles the latest topics in multimedia storytelling, including mobile reporting, producing, and publishing, while also offering best practices for using social media to help promote finished products. Whether you're a student, a professional seeking new techniques, or simply looking to update your skills for the new digital newsroom, this book will provide you with the information and tools you need to succeed as a professional journalist. Integrated: The lessons in this book deftly combine traditional media production principles with storytelling craft. It is written with the perspective of modern professional journalists in mind. Practical: While rich with theory, this text is based on the real-world work of the author and several of his colleagues. It features Q&As with some of the best editors and video producers from top publications, including NPR, Vice, and Detroit Free Press, as well as profiles of leading video news organizations such as Frontline, Mediastorm, and Seattle Times. Proven: The author uses pedagogy from the world-renowned Columbia Journalism School as well as case studies from his own award-winning work. Interactive: The text is exercise- and drill-based, and the companion website provides multimedia examples and lesson files, as well as tutorials, case studies, and video interviews.

Video Shooter is a guide to both the mechanics of the video camera and the craft of shooting. Written by a veteran in the industry and utilizing an engaging, conversational style (including illustrative anecdotes from the author's many years of experience), the book takes the reader beyond "button pushing" to teach the complete range of skills required to capture compelling images. Topics include equipment selection, camera setup and operation, shooting techniques, and working with lighting and audio. Although the techniques illustrated in Video Shooter are appropriate for users of a wide range of camera models, the book focuses on the most popular 3-CCD DV and HDV cameras. A chapter on issues and techniques relating to DVD output makes the book especially suitable for industrial, educational, and government video producers. The book also features a companion DVD with tutorials, footage demonstrating storytelling techniques, and technical matter such as a comparison of various filters.

Unlike traditional animation techniques that use specialized 3D animation software, machinima—a term derived from the words "machine" and "cinema"—records the action in real-time interactive 3D environments, such as those found in video games, to create a cinematic production. No longer solely the province of hard-core gamers, machinima has become central to the convergence between animation, television, and film, but retains its own identity as a unique media format. It has evolved quickly within massive multi-player gaming and virtual platforms such as Second Life, The Sims, World of Warcraft, and virtual worlds under development. These interviews, essays, and discussions with leading machinima producers, reviewers, performers, and advocates discuss scripting basics, character development, and set design, as well as tips on crafting machinima through creative use of sound, lighting, and post-production.
