This invaluable guidebook covers the different types of threads or cords available, and shows a range of clasps and other findings and beads to use in your knotwork. It also includes tons of expert tips like how to set up your work board or how to

keep track of the cord ends for less confusion. Thirty-three projects featured in the book range from simple jewelry like a classic friendship bracelet and watch straps to more complex ones like bags and baskets.

Crime control continues to be a growth industry, despite the drop in crime indicators throughout the nation. This volume shows how state-of-the-art geographic information systems (GIS) are

revolutionizing urban law enforcement, with an award-winning program in New York City leading the way. Electronic "pin mapping" is used to display the incidence of crime, to stimulate effective strategies and decision making, and to evaluate the impact of recent activity applied to hotspots. The expert information presented by 12 contributors will guide departments without such tools to understand the latest technologies and successfully employ them. Besides describing and

assessing cutting-edge techniques of crime mapping, this book emphasizes: * the organizational and intellectual contexts in which spatial analysis of crime takes place, * the technical problems of defining, measuring, interpreting, and predicting spatial concentrations of crime, * the common use of New York City crime data, and * practical applications of what is known (e.g., a review of mapping and analysis software packages using the same

data set). Students, academics, researchers, practitioners, and policymakers in the areas of criminal justice, corrections, geography, social problems, law and government, public administration, and public policy analysis will need to look at the interdisciplinary nature of both GIS and spatial dimensions of crime in order to comprehend the variety of different approaches address important analytic problems, reassess public facilities and resources,

and prepare to respond more quickly to emerging hotspots.

Twist and Tweed Abrams An ardent collector of knit patterns, Rita Weiss was always fascinated with the beautiful Aran sweaters

that supposedly came from the Aran Islands off the coast of Ireland. She loved the stories that accompanied them and the idea that each stitch had a special meaning. Even though historians now are saying the stories were all a myth used as a marketing tool, Rita never stopped loving the patterns. She shares 50 favorites here. Each can be worked in any yarn you choose, either in multiples (the number of stitches needed to complete one unit of the pattern) or in panels with a specific

stitch count. Patterns include Cathedral Cables, Rapunzel's Cable, Tied Ropes, Desert Sand, Blarney Kiss, Quilted Cables, Diamond Windows, and more. 50 Fabulous Knit Aran Stitches (Leisure Arts #4530)
