KNOX JOYCE

Billboard Basic Books

Part historical essay, part scientific article, and part enthralling diary-Roald Amundsen's (1872-1928) book presents intriguing documentation about how his expedition reached the South Pole on December 14, 1911, just one month ahead of his rival, Robert Scott. Amundsen organized his gripping account using what is referred to in the film industry as the zooming technique. It starts in the past,

examining the history of Antarctic exploration in different eras, and then moves ahead to describe how his own expedition was created, its organization, the slow stages involved in preparing for departure and, finally, the heart-stopping excitement of the race to the South Pole. Supplementing the vivid first-person text are black-and-white archival photographs illustrating the actual expedition, and color photographs depicting the landscape of Antarctica.

Race to the South Pole Naval Institute Press

Told in two voices, Luli and Yun, raised in

an orphanage to age sixteen, work together in a factory until Yun, pregnant, disappears and Luli must confront the dangers of the outside world to find her. Includes facts about China's One-Child Policy and its effects.

Girls on the Line Ten Speed Press
Saloon-keepers and street preachers, gypsies and steel-walking Mohawks, a bearded lady and a 93-year-old "seafoodetarian" who believes his specialized diet will keep him alive for another two decades. These are among the people that Joseph Mitchell immortalized in his reportage for *The New*

Yorker and in four books—McSorley's Wonderful Saloon, Old Mr. Flood, The Bottom of the Harbor, and Joe Gould's Secret—that are still renowned for their precise, respectful observation, their graveyard humor, and their offhand perfection of style. These masterpieces (along with several previously uncollected stories) are available in one volume, which presents an indelible collective portrait of an unsuspected New York and its odder citizens—as depicted by one of the great writers of this or any other time.

A General History of the Burr Family

University of Georgia Press

ONE OF THE NEW YORK TIMES 10 BEST CRIME NOVELS OF THE YEAR February 9, 1942. Disgraced Southern cop Woodrow Cain arrives in New York City for a new position with the NYPD and is greeted with smoke billowing out from the SS Normandie, engulfed in flames on the Hudson. On Cain's first day on the job, a body turns up in the same river. Unfamiliar with the milieu of mob bosses and crooked officials in the big city, Cain's investigation stalls, until a strange man who calls himself Danziger enters his life. Danziger looks like a miscreant, but speaks five

languages, has the manners of a gentleman, and is the one person who can help Cain identify the body. A letter writer for illiterate European immigrants, Danziger has a seemingly boundless knowledge of the city's denizens and networks—and possesses information that extends beyond the reach of his clients, hinting at an unfathomable past. As the body count grows, Cain and Danziger inch closer toward an underground web of possibly traitorous corruption . . . but in these murky depths, not even Danziger can know what kind of danger will await them.

From agriculture to big business, from

medicine to politics, *The Cigarette Century* is the definitive account of how smoking came to be so deeply implicated in our culture, science, policy, and law. No product has been so heavily promoted or has become so deeply entrenched in American consciousness. *The Cigarette Century* shows in striking detail how one ephemeral (and largely useless) product came to play such a dominant role in so many aspects of our lives—and deaths.

Love, Sex, Death and Words Rowman & Littlefield

I walked on the moon. This is my journey. But it didn't begin when I stepped on board Apollo 11 on July 1, 1969. It began the day I was born. Becoming an astronaut took more than education, discipline, and physical strength. It took years of determination and believing that any goal is possible—from riding a bike alone across the George Washington Bridge at age ten to making a footprint on the Moon. I always knew the Moon was within my reach—and that I was ready to be on the team that would achieve the first landing. But it was still hard to believe when I took my first step onto the Moon's surface. We all have our own dreams. This is the story

of how mine came true.

This open access book describes the serious threat of invasive species to native ecosystems. Invasive species have caused

and will continue to cause enormous ecological and economic damage with ever increasing world trade. This multi-disciplinary book, written by over 100 national experts, presents the latest research on a wide range of natural science and social science fields that explore the ecology, impacts, and practical tools for management of invasive species. It covers species of all taxonomic groups from insects and pathogens, to plants, vertebrates, and aquatic organisms that impact a diversity of habitats in forests, rangelands and grasslands of the United States. It is well-illustrated, provides summaries of the most important invasive species and issues impacting all regions of the country, and includes a comprehensive primary reference list for each topic. This scientific synthesis provides the cultural, economic, scientific and social context for addressing environmental challenges posed by invasive species and will be a valuable resource for scholars, policy makers, natural resource managers and practitioners.

The Bricklayer and Mason White Star Publishers

Gretchen Krueger's poignant narrative explores how doctors, families, and the public interpreted the experience of childhood cancer from the 1930s through the 1970s. Pairing the transformation of childhood cancer from killer to curable disease with the personal experiences of young patients and their families, Krueger illuminates the twin realities of hope and suffering. In this social history, each decade follows a family whose experience touches on key themes: possible causes, means and timing of detection, the search for curative treatment, the merit of alternative treatments, the decisions to pursue or halt therapy, the side effects of treatment, death and dying—and cure. Recounting the complex and sometimes contentious interactions among the families of children with cancer, medical researchers, physicians, advocacy organizations, the media, and policy makers, Krueger reveals that personal odyssey and clinical challenge are the simultaneous realities of childhood cancer. This engaging study will be of interest to historians, medical practitioners and researchers, and people whose lives have been altered by cancer.

A General History of the Burr Family Icon Books Ltd

In 2018 almost half of all vehicles made in North America were produced at foreign-owned plants, and the sector was on track to monopolize the market. Despite this, the industry has been overlooked compared with its domestic counterpart, both in scholarship and popular memory. Redressing this neglect, *America's Other Automakers* provides a new history of the foreign-owned auto sector, the first to extensively draw on archival sources and to articulate the human agency of participants, including workers, managers, and industry recruiters. Timothy J. Minchin challenges the view that the industry's growth primarily reflected incentives, stressing human agency and the complexity of individual stories instead. Deeply human in its approach, the book also explores the industry's impact on grassroots communities, showing that it had more costs than supporters acknowledged. Drawing on a wide range of primary and secondary sources, *America's Other Automakers* uncovers significant tensions over unionization, reports of discriminatory hiring, and

unease about the industry's rapid growth, critically exploring seven large assembly facilities and their impact on the communities in which they were built.

The United States Army and Navy Journal and Gazette of the Regular and Volunteer Forces Springer Nature

At the age of five, Shirley Temple became the world's most famous and acclaimed child—the most talented, beautiful child performer ever to capture the public's imagination. By the time she was ten, she had either met or had received words of admiration from almost everyone of distinction. Nine-tenths of the world could recognize her on sight. She single-handedly cheered an entire nation caught in the firm grip of a depression. Her films saved a major studio from bankruptcy. She earned more than the President of the United States and lived in her own junior-sized San Simeon. As lionized, idolized and protected as royalty, Shirley Temple was the one and only American Princess. Shirley Temple is brought into focus in this definitive, intimate portrait of her as a child and as the woman that child became: a woman forced to live her entire life in the shadow of her own past glory. We

follow the tumultuous events and disappointments that marked Shirley Temple's meteoric rise to unprecedented fame as a child star, her fall as an adolescent who had outgrown her appeal, and her surprising ascent into a word figure as ambassador to the United Nations, Chief of Protocol for the United States, and Ambassador to Ghana; her "princess in the tower" upbringing that isolated her from friends and real child's play and from studio co-workers as well; her obsessive relationship with her mother, Gertrude, who lived her life through her famous daughter; her power over one of Hollywood's greatest despots—Darryl Zanuck; her fairy-tale marriage to John Agar that became a nightmare filled with flaunted infidelities and alcoholism; her romance with Charles Black and her transformation from film start to society matron, television tycoon, to American diplomat; her courageous battle with cancer; and her ever-present realization that "little Shirley Temple's" greatness would always exceed that of the grown woman. Shirley Temple's most notable diplomatic achievement was her appointment by President H.W. Bush as

the first and only female ambassador to Czechoslovakia. She was present during the Velvet Revolution, which brought about the end of Communism in the country, and she played a critical role in hastening the end of the Communist regime by openly sympathizing with anti-Communist dissidents and later establishing formal diplomatic relations with the newly elected government led by Václav Havel. She took the unusual step of personally accompanying Havel on his first official visit to Washington, riding along on the same plane. Anne Edwards has had the cooperation of those who have been closest to Shirley Temple in all stages of her unique life. She has written a book that does not spare the truth, and is as glittering an expose of Hollywood and its power brokers as any bestselling novel of that genre. Shirley Temple: American Princess is a moving and inspirational story that gives great insight into the privileged corridors of fame and glory where only the legendary figures of our times have walked.

Weekly Commercial News National Academies Press
Published to coincide with the ACLU's

centennial, a major new book by the nationally celebrated journalist and bestselling author For a century, the American Civil Liberties Union has fought to keep Americans in touch with the founding values of the Constitution. As its centennial approached, the organization invited Ellis Cose to become its first ever writer-in residence, serving as an "embedded journalist" with complete editorial independence. The result is Cose's groundbreaking *Our Democracy, If We Can Keep It: The ACLU and Its 100-Year Battle for Our Rights*, the most authoritative account ever of America's premier defender of civil liberties. A vivid work of history and journalism, *Our Democracy, If We Can Keep It* is not just the definitive story of the ACLU but also an essential account of America's rediscovery of rights it had granted but long denied. Cose's narrative begins with World War I and brings us to today, chronicling the ACLU's role through the horrors of 9/11, the saga of Edward Snowden, and the phenomenon of Donald Trump. A chronicle of America's most difficult ethical quandaries from the Red Scare, the Scottsboro Boys' trials, Japanese American

internment, McCarthyism, and Vietnam, *Our Democracy, If We Can Keep It* weaves these accounts into a deeper story of American freedom--one that is profoundly relevant to our present moment.

Congressional Record JHU Press

This is the 22nd Volume in the series Memorial Tributes compiled by the National Academy of Engineering as a personal remembrance of the lives and outstanding achievements of its members and foreign associates. These volumes are intended to stand as an enduring record of the many contributions of engineers and engineering to the benefit of humankind. In most cases, the authors of the tributes are contemporaries or colleagues who had personal knowledge of the interests and the engineering accomplishments of the deceased. Through its members and foreign associates, the Academy carries out the responsibilities for which it was established in 1964. Under the charter of the National Academy of Sciences, the National Academy of Engineering was formed as a parallel organization of outstanding engineers. Members are elected on the basis of significant contributions to engineering theory and

practice and to the literature of engineering or on the basis of demonstrated unusual accomplishments in the pioneering of new and developing fields of technology. The National Academies share a responsibility to advise the federal government on matters of science and technology. The expertise and credibility that the National Academy of Engineering brings to that task stem directly from the abilities, interests, and achievements of our members and foreign associates, our colleagues and friends, whose special gifts we remember in this book.

Reaching for the Moon

Love, sex, death, boredom, ecstasy, existential angst, political upheaval - the history of literature offers a rich and varied exploration of the human condition across

the centuries. In this absorbing companion to literature's rich past, arranged by days of the year, acclaimed critics and friends Stephen Fender and John Sutherland turn up the most inspiring, enlightening, surprising or curious artefacts that literature has to offer. Find out why 16 June 1904 mattered so much to Joyce, which great literary love affair was brought to a tragic end on 11 February 1963 and why Roy Campbell punched Stephen Spender on the nose on 14 April 1949 in this sumptuous voyage through the highs and lows of literature's bejewelled past.

The Cigarette Century

First published in 1994, this stirring autobiography of a fighter and test pilot takes readers full throttle through Carl's imposing list of "firsts." Beginning with his World War II career, he gained such commendations as first Marine Corps ace, among the first Marines ever to fly a helicopter, and first Marine to land aboard an aircraft carrier. His combat duty included the momentous battles at Midway and Guadalcanal. Not one to rest on his laurels, however, he participated in photoreconnaissance operations over Red

China in 1955 and flew missions in Vietnam. In peacetime he gained fame for "pushing the envelope" as a test pilot, adding the world's altitude and peace records to his wartime feats and becoming

the first U.S. military aviator to wear a full pressure suit. Such achievements also led to Carl's being the first living Marine admitted to the Naval Aviation Hall of

Honor, as well as the first Marine to be named to the Navy Carrier Aviation Test Pilots Hall of Honor. This very readable memoir is as forthright and compelling as the man it chronicles.
