If you are interested in astrology, numerology, palm reading, psychic readings, clairvoyance etc then you are already aware that life is not one big coincidence, but a series of patterns and puzzles from which we can decipher clues as to our unique potentials and destiny. As many of you know I write books on astrology, however numerology is the perfect complement to astrology in terms of gaining an insight into your personality and life path. Numerology is a simple way of gaining insights into yourself and others via those most fundamental letters and numbers connected to you ie your name and date of birth. The date of birth is key as it is the one constant in life: our name and place we live changes, but as the compass always points North, our date of birth is fixed and fundamental to who we are. The are number associations which you can use to calculate your numbers from your name and derive meaning from that. The purpose of this book is to dive right into numerology with a hands on guide to how to calculate your numbers and what they mean. This is an ideal introduction, but it is not just an introduction but full of revealing information. We will mainly be looking at the numbers 1-9 and the master numbers 11 and 22, but I will go over the exact meanings of the compound numbers in Book 2.

Numerology is the delusion that numbers have power over events. It is a descendent of number mysticism, the belief the contemplation of numbers can give mystical and non-rational insights into life, the universe and everything. 2500 years ago, Pythagoras originated number mysticism, crediting certain numbers with characteristics, through numerology, is a more recent invention that allots numbers, hence characteristics, to individuals. Underwood Dudley outlines here the history of number mysticism and numerology and gives many examples, including biorhythms, Bible-numberists, pyramidologists and a plethora of others. His message is that numbers do indeed have power, but over minds not events. This is the only book that exposes this particular human folly, and requires no mathematical background beyond knowledge of numbers.

The I Ching, also called Book of Changes, is the most comprehensive and oldest oracle originated in ancient China. The I Ching (consists of 64 Hexagrams) signifies all situations and behaviors relating to nature and humans. The I Ching system is the integration of cosmology, philosophy, mathematics, symbolism and divination. It stresses the point of balance of opposites; indicates the changeable and the unchangeable which is that things change inevitably as times and conditions change while the laws of nature never change. Binary Number, the modern computer language, was invented by Gottfried Leibniz in 1679. Leibniz was deeply inspired by the I Ching. He recognized and wrote that his original concept of Binary System (using only the digit 0 and 1 throughout the computation) was corresponded to the I Ching’s Trigram (binary number from 000 to 111) thus the Hexagrams (Gua). Yin (0) and Yang (1) are the basic binary configuration of the I Ching symbols. Furthermore, DNA (the hereditary material of all life) Genetic Code, which consists of 64-Triplet of nucleotides, is exactly analogous to the 64-Triplet System of the I Ching. Isn’t that miraculous? Besides the above stated values, the philosophical and symbolic structures of the I Ching are also infinitely valued. The I Ching originally contains a system of divination. However the Numerology of I Ching, which was derived thousands of years later, significantly enriches the I Ching divinatory methods. It adds values of numeric, time, symbolism and the Five Elements (mutual generation and restriction between Metal, Fire, Water, Wood and Earth) to the original I Ching divination system, makes it simple to learn; swift to be used and miraculous the results. This book will focus on introducing this numerological way of divination. In order to allow beginners to straightforwardly understand this numerology in a short time, this book employs plenty of graphical images and charts to make it easy and simple to learn. All steps of divination are presented as visualized as possible. As a I Ching beginner or a lover, you will enjoy the great fun of using the Numerology of I Ching in life, in problem-solving or decision-making. — David Huang

In this book, the author analyzes a little known article that W.D. Gann wrote for the Milwaukee Sentinel in 1919. Most, if not all of the material on Gann and his techniques are based on some type of astrological interpretation. In this work, you will see that astrology was not the main factor that allowed Gann to make his amazing and pinpoint accurate forecasts. It focuses on another well known aspect of Gann’s work, which is the based on

the numerology of the name. In the 1919 article, Gann makes predictions about the German Kaiser, Wilhelm Hohenzollern, based solely on the numbers associated with his name. Although Gann never outwardly mentions a specific numerology system that he may have utilized, the author provides evidence linking the divinations performed in this article to a specific system as it relates to character analysis. In addition to character analysis, Gann forecasts future periods where he expects critical events to take place in the upcoming year for Wilhelm Hohenzollern. With respect to these forecasts, the author analyzes the periods mentioned in relationship to the method of forecasting taught in the numerology system, and in relationship to another aspect of Gann’s work, which is based on cycles. This is done to show how Gann may have calculated these future periods, which also involves a discussion of the periodic law or law of octaves. Last but not least, there is an analysis of the method employed by Gann to calculate the “key number” for an individual, which is said to govern that person throughout their entire life. As the article implies, this is the whole secret behind Mr. Gann’s discovery.
