A psychiatrist travels to a world of magic and gods in this take on "Jason and the Argonauts" from the Hugo Award-nominated author of Earth's Last Citadel. Jay Seward remembers a former life in a land of magic, gods, and goddesses—a time when he was Jason of Iolcus, sailing in the enchanted ship Argo to steal the Golden Fleece from the serpent-temples of Apollo. But one night the memories become startlingly real, as the Argo itself sails out of the spectral mists and a hauntingly beautiful voice calls: "Jason . . . come to me!" "For some moments distant Vesuvius had

beguiled my thoughts from the still more distant mountain of the secret, when suddenly a white girl in a white hood and a long white cloak passed me on the white deck: whereupon I forgot mountains of reality and dreams. She was one of those tall, slim, long-limbed, dryad-sort of girls they are running up nowadays in England and America with much success." Lord Ernest Borrow and Captain Anthony Fenton think they know a secret - a secret that could make them both rich - but they are interrupted on their quest between Naples and Alexandria by Sir Marcus Antonius Lark, by a woman who thinks she is the reincarnation of Cleopatra, an American Heiress, and Mrs. Jones, a mysterious Irish woman with a past. Will they ever find the secret? Or will their adventure lead them to another discovery altogether? Charles Norris Williamson (1859-1920) and Alice Muriel Williamson (1858-1933) were a married couple of writer. Charles was originally from Exeter in the United Kingdom and Alice was from Cleveland, Ohio. Alice moved to the Britain in 1892, working as a correspondant for the

Boston Evening. There she met Charles, who was then a renowned magazine editor, and the pair married in 1894. She convinced him to appear as the co-author of many of her novels, although she later said she was their sole author.

The Crimson Hand Harper

George Eliot's more than  
fifty long and short  
journeys within England  
took her to dozens of sites  
scattered around the  
country. Revising the  
traditional notion that  
George Eliot drew her  
settings and characters  
only from the areas of her  
Warwickshire childhood,  
Kathleen McCormack  
demonstrates that English  
travel furnished the  
novelist with a wide  
variety of originals for the  
composite characters and  
settings she would so  
memorably create.

McCormack traces the  
way in which George Eliot  
gathered material during  
her travels and also  
drafted long sections of  
the novels while away  
from her London home.  
She argues that by  
examining the choices  
George Eliot made in  
transforming, discarding  
or directly describing her

English originals, we might take a significant step forward in the interpretation of her writings. Where other critics have tried to interpret characters as one-to-one renderings of living or dead models, for example, this study reveals more elaborate blendings of what George Eliot called the 'widely sundered elements' that made up her fiction. McCormack also reaches the fascinating conclusion that the novels were a form of coded communication between the author and people in her life, including other prominent Victorians such as Edward Burne-Jones, Robert Lytton and Barbara Bodichon. Presenting fresh biographical information and original insights into George Eliot's writing strategies, *George Eliot's English Travels* promises a decisive shift in our understanding of one of the most important figures in Victorian literature.

Winston Churchill, Britain's great statesman, and Clementine, his beautiful, stalwart wife, went together through many crises to command center stage in their country's finest hour during World War II. This double biography tells the story of this celebrated couple whose marriage endured, without scandal, for 57 years, until Churchill's death in 1965. Their intense relationship would make tabloid headlines, but the public didn't see the conflicts and clashes of two strong-

willed, stubborn individuals whose love for each other withstood the tests of war and family tragedy — and whose fierce differences were essential to their triumph. "A grand profile in charisma." — Chris Goodrich, Los Angeles Times "A grand historical romance." — Booklist "A splendidly told tale... Hough is a charming writer and his admiration for his subject so genuine that readers will find his work irresistible." — Publishers Weekly

A sonnet to science presents an account of six ground-breaking scientists who also wrote poetry, and the effect that this had on their lives and research. How was the universal computer inspired by Lord Byron? Why was the link between malaria and mosquitos first captured in the form of a poem? Who did Humphry Davy consider to be an 'illiterate pirate'?

Written by leading science communicator and scientific poet Dr Sam Illingworth, A sonnet to science presents an aspirational account of how these two disciplines can work together, and in so doing aims to inspire both current and future generations of scientists and poets that these worlds are not mutually exclusive, but rather complementary in nature.
