UK

Featuring the work of

more than 28 writers from

upwards of 20 countries,

this collection transports

us to the frontiers of twenty-first century literature. In these pages,

some of the most

accomplished writers in

world literature—among

them Edwidge Danticat,

Ha Jin, Cynthia Ozick,

Javier Marias, and Nobel

laureates Wole Soyinka,

Günter Grass, Czeslaw

Milosz, Wislawa

Szyborska, and Naguib

Mahfouz—have stepped

forward to introduce us to

dazzling literary talents

virtually unknown to

readers of English. Most of

their work—short stories,

poems, essays, and

excerpts from

novels—appears here in

English for the first time.

The Chilean writer Ariel

The Routledge Reader on the Sociology of Music offers the first collection of source readings and new essays on the latest thinking in the sociology of music. Interest in music sociology has increased dramatically over the past decade, yet there is no anthology of essential and introductory readings. The volume includes a comprehensive survey of the field's history, current state and future research directions. It offers six source readings, thirteen popular contemporary essays, and sixteen fresh, new contributions, along with an extended Introduction by the editors. The Routledge Reader on the Sociology of Music represents a broad reference work that will be a resource for the current generation of sociologically inclined musicologists and musically inclined sociologists, whether researchers, teachers or students.

Julius Caesar in Egypt SAGE

The humanities offer insights into the highest (and lowest) capabilities of our own natures and, at their best, they function as prophetic champions of human dignity and as inspired celebrants of beauty. Envisioning God in the Humanities pays tribute to the career of Melissa Harl Sellew, a scholar and teacher who embodies the ideals of these academic disciplines. The collaboration of these essays attests to the potentialities for transcendence that emerge from rigorous and collective reflection on the texts, images, and ideas produced in ancient societies. Taking its cue from Professor Sellew's own distinguished scholarship, this collection of studies begins with analyses of the New Testament Gospels, then moves more broadly

toward the religious life of the ancient world as attested both in literature and materiality, among Jews and Christians, Greeks and Romans. Just as Sellew has done throughout her career, so this volume invites us into the joy of exploring distant societies and, in so doing, into the fuller discovery of one's own self.

Brimming with life maps, life history calendars, and extracts from transcripts and diaries, this book illustrates by example the unique principles, challenges, and applications of qualitative longitudinal research. Synthesizing current literature on qualitative longitudinal research, it brings together sociological theory and empirically driven longitudinal studies while also highlighting a range of possible research approaches. With a consistent balance of conceptual discussions with hands-on advice, it provides readers with the foundation to adapt lessons-learned from other researchers to fit their own qualitative longitudinal studies.

Supported by research tools such as conceptual road maps, short data extracts, consent forms, and other data organization tools, this book provides everything postgraduate researchers need to transition from the classroom to the field. Women Adventurers, 1750-1900 Routledge

The past quarter-century has seen a number of biographies and anthologies on women travelers but to date there has been little comprehensive reference work done on the travelers themselves. Some of the women were eccentric, many were very adventurous, some were in search of a different world... British women make up the largest portion of the book's focus—these particular adventurers being backed in many cases by family money, scientific inquiry, and the ready availability of the British seafaring tradition. Entries include the woman's family background, her educational history, and a summary of her world travels, with in many cases evocative extracts from their writings (many are literary gems).

In 48 BC the armies of Julius Caesar and Pompey

the Great fought a decisive battle at Pharsalus in Greece. Pompey was comprehensively defeated and fled to the last power in the Mediterranean world that was independent of Rome, Ptolemaic Egypt. Caesar pursued Pompey and was presented with his severed head, which the Egyptians hoped would make Caesar leave them in peace. Instead, Caesar – as if he did not have enough to do already – plunged gleefully into the world of Egyptian palace politics, riven by dynastic dispute. He quickly sided with the beguiling Queen Cleopatra (after her famous carpet trick), despite having little more than a bodyguard with him. Most of his army was still in Greece, leaving him massively outnumbered by the Egyptian forces. The Romans were besieged in Alexandria for seven months before reinforcements could get through to them. Julius Caesar in Egypt is a true story of double-cross, assassination and intrigue accompanied by lively battles, daring escapes, disastrous fires (the Great Library of Alexandria was largely destroyed in one fracas) and, if not a love story, at least a tale of

sex and power as Caesar and Cleopatra's relationship shaped these world-changing events. *Tradition, Transmission, and Transformation from Second Temple Literature through Judaism and Christianity in Late Antiquity* Gale Cengage

An examination of the uses of data within a changing knowledge infrastructure, offering analysis and case studies from the sciences, social sciences, and humanities. "Big Data" is on the covers of *Science*, *Nature*, the *Economist*, and *Wired* magazines, on the front pages of the *Wall Street Journal* and the *New York Times*. But despite the media hyperbole, as Christine Borgman points out in this examination of data and scholarly research, having the right data is usually better than having more data; little data can be just as valuable as big data. In many cases, there are no data—because relevant data don't exist, cannot be found, or are not available. Moreover, data sharing is difficult, incentives to do so are minimal, and data practices vary widely across disciplines. Borgman, an often-cited authority on scholarly communication, argues

that data have no value or meaning in isolation; they exist within a knowledge infrastructure—an ecology of people, practices, technologies, institutions, material objects, and relationships. After laying out the premises of her investigation—six “provocations” meant to inspire discussion about the uses of data in scholarship—Borgman offers case studies of data practices in the sciences, the social sciences, and the humanities, and then considers the implications of her findings for scholarly practice and research policy. To manage and exploit data over the long term, Borgman argues, requires massive investment in knowledge infrastructures; at stake is the future of scholarship. Shofar Random House (NY)

The genocide of Jewish and non-Jewish civilians perpetrated by the German regime during World War Two continues to confront scholars with elusive questions even after nearly seventy years and hundreds of studies. This multi-contributory work is a landmark publication that sees experts renowned in their field addressing these questions in light of

current research. A comprehensive introduction to the history of the Holocaust, this volume has 42 chapters which add important depth to the academic study of the Holocaust, both geographically and topically. The chapters address such diverse issues as: continuities in German and European history with respect to genocide prior to 1939 the eugenic roots of Nazi anti-Semitism the response of Europe's Jewish Communities to persecution and destruction the Final Solution as the German occupation instituted it across Europe rescue and rescuer motivations the problem of prosecuting war crimes gender and Holocaust experience the persecution of non-Jewish victims the Holocaust in postwar cultural venues. This important collection will be essential reading for all those interested in the history of the Holocaust.

The discovery of the Dead Sea Scrolls in Qumran, Palestine, in 1947 was one of the greatest archaeological finds of all time. Written in Hebrew, Aramaic and Greek, and hidden in caves by an

ancient Jewish sect, these mysterious manuscripts revolutionized our understanding of the Bible, of Judaism and the early Christian world. Geza Vermes is the world's leading Dead Sea Scrolls scholar, whose English translations brought these extraordinary documents to thousands, and whose life has been inextricably interwoven with the scrolls for over sixty years. In this illuminating book he relates the controversial story of their discovery and publication around the world, revealing cover-ups, blunders and academic infighting, but also the passion and dedication of many of those involved. He shares what he has learned about the scrolls and, evaluating passages from them, gives his views on their true significance and what they can teach us, as well as those areas where scholarly consensus has not yet been reached. Few scholars have been as closely associated with the Dead Sea Scrolls as Vermes. Writing with candour and unique authority, he has created an ideal introduction to understanding these miraculous documents. A Savage Order Delta

This is the first substantial reference work in English on the various forms that constitute "life writing." As this term suggests, the Encyclopedia explores not only autobiography and biography proper, but also letters, diaries, memoirs, family histories, case histories, and other ways in which individual lives have been recorded and structured. It includes entries on genres and subgenres, national and regional traditions from around the world, and

important auto-biographical writers, as well as articles on related areas such as oral history, anthropology, testimonies, and the representation of life stories in non-verbal art forms.

The most violent places in the world today are not at war. More people have died in Mexico in recent years than in Iraq and Afghanistan combined. These parts of the world are instead buckling under a maelstrom of gangs, organized crime, political conflict, corruption, and state brutality. Such devastating violence can feel hopeless, yet some places—from Colombia to the Republic of Georgia—have been able to recover. In this powerfully argued and urgent book, Rachel Kleinfeld examines why some democracies, including our own, are crippled by extreme violence and how they can regain security. Drawing on fifteen years of study and firsthand field research—interviewing generals, former guerrillas, activists, politicians, mobsters, and law enforcement in

countries around the world—Kleinfeld tells the stories of societies that successfully fought seemingly ingrained violence and offers penetrating conclusions about what must be done to build governments that are able to protect the lives of their citizens.

Taking on existing literature and popular theories about war, crime, and foreign intervention, *A Savage Order* is a blistering yet inspiring investigation into what makes some countries peaceful and others war zones, and a blueprint for what we can do to help.
Communities in Dispute Pulp Hero Press

This book suggests a new approach to the social history of Jewish religious movements in the Second Temple and early Rabbinic periods. It argues that most of these movements and their traditions emerged within the context of complex interaction between traditional families and disciple circles.

The Story of the Scrolls
JHU Press

A sweeping history of how writing has preserved cultural practices, traditions, and knowledge throughout human history. In *How Writing Made Us Human*, 3000

BCE to Now, Walter Stephens condenses the massive history of the written word into an accessible, engaging narrative. The history of writing is not merely a record of technical innovations—from hieroglyphics to computers—but something far richer: a chronicle of emotional engagement with written culture whose long arc intimates why the humanities are crucial to society. For five millennia, myths and legends provided fascinating explanations for the origins and uses of writing. These stories overflowed with enthusiasm about fabled personalities (both human and divine) and their adventures with capturing speech and preserving memory. Stories recounted how and why an ancient Sumerian king, a contemporary of Gilgamesh, invented the cuneiform writing system—or alternatively, how the earliest Mesopotamians learned everything from a hybrid man-fish. For centuries, Jews and Christians debated whether Moses or God first wrote the Ten Commandments. Throughout history, some myths of writing were

literary fictions. Plato's tale of Atlantis supposedly emerged from a vast Egyptian archive of world history. Dante's vision of God as one infinite book inspired Borges's fantasy of the cosmos as a limitless library, while the nineteenth century bequeathed Mary Shelley's apocalyptic tale of a world left with innumerable books but only one surviving reader. Stephens presents a comprehensive history of the written word and demonstrates how writing has preserved and shaped human life since the Bronze Age. These stories, their creators, and their preservation have inspired wonder and an endless appetite for historical revelation.
