An intimate look at the
power of intrusive
thoughts, how our brains

can turn against us, and living with obsessive compulsive disorder Have you ever had a strange urge to jump from a tall building or steer your car into oncoming traffic? You are not alone. In this captivating fusion of science, history, and personal memoir, David Adam explores the weird thoughts that exist within every mind, and how they drive millions of us toward obsession and compulsion. Adam, an editor at *Nature* and an accomplished science writer, has suffered from

obsessive-compulsive disorder for twenty years, and *The Man Who Couldn't Stop* is his unflinchingly honest attempt to understand the condition and his experiences. What might lead an Ethiopian schoolgirl to eat a wall of her house, piece by piece, or a pair of brothers to die beneath an avalanche of household junk that they had compulsively hoarded? At what point does a harmless idea, a snowflake in a clear summer sky, become a blinding blizzard of

unwanted thoughts? Drawing on the latest research on the brain, as well as historical accounts of patients and their treatments, this is a book that will challenge the way you think about what is normal and what is mental illness. Told with fierce clarity, humor, and urgent lyricism, this extraordinary book is both the haunting story of a personal nightmare and a fascinating doorway into the darkest corners of our minds.

The Imperial Bible Dictionary, Historical,

Biographical, Geographical, and Doctrinal: Including the Natural History, Antiquities, Manners, Customs and Religious Rites and Ceremonies Mentioned in the Scriptures, and an Account of the Several Books of the Old and New Testaments North Atlantic Books

The Bulletin of the Atomic Scientists is the premier public resource on scientific and technological developments that impact global security. Founded

by Manhattan Project Scientists, the Bulletin's iconic "Doomsday Clock" stimulates solutions for a safer world.

The Smallest Lights in the Universe Sarah Crichton Books

In this dynamic account, award-winning science writer Ann Gibbons chronicles an extraordinary quest to answer the most primal of questions: When and where was the dawn of humankind? Following four intensely competitive international teams of scientists in a heated race

to find the "missing link"—the fossil of the earliest human ancestor—Gibbons ventures to Africa, where she encounters a fascinating array of fossil hunters: Tim White, the irreverent Californian who discovered the partial skeleton of a primate that lived 4.4 million years ago in Ethiopia; French paleontologist Michel Brunet, who uncovers a skull in Chad that could date the beginnings of humankind to seven million years ago; and two other groups—one led by

zoologist Meave Leakey, the other by British geologist Martin Pickford and his French paleontologist partner, Brigitte Senut—who enter the race with landmark discoveries of their own. Through scrupulous research and vivid first-person reporting, *The First Human* reveals the perils and the promises of fossil hunting on a grand competitive scale. [Robo Sapiens](#) Univ of California Press Collects over two hundred images from 125 years of photographs selected

from the magazine's archives, with pictorial representations of Europe. *Williams' Cincinnati (Hamilton County, Ohio) City Directory Taschen* A fun and informative introduction to life in the world's oceans, packed with fascinating facts, puzzles, games, and 100 reusable stickers Written and designed for younger readers, this book contains stickers of fish, mammals, amphibians, and invertebrates, from the great white shark to the tiny seahorse. The stickers are accompanied

by fun learning pages on the behavior and habitats of the different animals, which explain what they look like, where they live, how they move, and what they eat. There are also some exciting puzzles and games, including a spot-the-difference puzzle, and readers can create their own underwater scene by adding stickers to a colorful double-page landscape spread. Perfect for kids who want to know more about the amazing array of creatures that live underwater, the book is fully checked and

approved by the department of zoology at the Natural History Museum, London.

Today's students are tomorrow's leaders and managers. The Management, Fifth Canadian Edition WileyPLUS course helps students discover their true potential and accept personal responsibility for developing career skills to become future leaders in the workplace. New content on topics like disruption, Big Data, AI,

machine learning, and sustainability, plus thought-provoking exercises give students a fundamental understanding of today's world of management while urging them to reflect on their own behavior and decision-making processes. Management provides exciting new student engagement features on key themes of Analysis, Ethics, Choices, Insight, and Wisdom to attract learners' attention and prompt additional reflection, while fresh

author videos, updated video cases accompanying each chapter, and other digital assets bring managerial theory to life. By the end of the course, students will be able to understand and apply management principles, have developed concrete skills for career readiness, gained confidence in critical thinking, and embraced lifelong learning to ensure professional success. Youth's Companion John Wiley & Sons Describes how special

elephants are in the village of Tha Kleng in Thailand and looks at the life of one particular young elephant named Wan Pen.

Children are already learning at birth, and they develop and learn at a rapid pace in their early years. This provides a critical foundation for lifelong progress, and the adults who provide for the care and the education of young children bear a great responsibility for their health, development,

and learning. Despite the fact that they share the same objective - to nurture young children and secure their future success - the various practitioners who contribute to the care and the education of children from birth through age 8 are not acknowledged as a workforce unified by the common knowledge and competencies needed to do their jobs well.

Transforming the Workforce for Children Birth Through Age 8 explores the science of child development,

particularly looking at implications for the professionals who work with children. This report examines the current capacities and practices of the workforce, the settings in which they work, the policies and infrastructure that set qualifications and provide professional learning, and the government agencies and other funders who support and oversee these systems. This book then makes recommendations to improve the quality of professional practice and

the practice environment for care and education professionals. These detailed recommendations create a blueprint for action that builds on a unifying foundation of child development and early learning, shared knowledge and competencies for care and education professionals, and principles for effective professional learning. Young children thrive and learn best when they have secure, positive relationships with adults

who are knowledgeable about how to support their development and learning and are responsive to their individual progress. Transforming the Workforce for Children Birth Through Age 8 offers guidance on system changes to improve the quality of professional practice, specific actions to improve professional learning systems and workforce development, and research to continue to build the knowledge base in ways that will directly advance and

inform future actions. The recommendations of this book provide an opportunity to improve the quality of the care and the education that children receive, and ultimately improve outcomes for children. *Net-mom's Internet Kids & Family Yellow Pages* princeton alumni weekly PANDEMIC presents a 20-year retrospective of AIDS through the work of over 75 artists from 50 nations. These powerful images in the photographic medium document the lives and harsh realities of people

living with AIDS.

An Introduction to Agent-Based Modeling Columbia University Press

In these multidisciplinary essays, academic scholars and animal experts explore the nature of animal minds and the methods humans conventionally and unconventionally use to understand them. The collection features chapters by scholars working in psychology, sociology, history, philosophy, literary studies, and art, as well as chapters by and about

people who live and work with animals, including the founder of a sanctuary for chickens, a fur trapper, a popular canine psychologist, a horse trainer, and an art photographer who captures everyday contact between humans and their animal companions. Divided into five sections, the collection first considers the ways that humans live with animals and the influence of cohabitation on their perceptions of animals' minds. It follows with an examination of

anthropomorphism as both a guide and hindrance to mapping animal consciousness. Chapters next examine the effects of embodiment on animals' minds and the role of animal-human interembodiment on humans' understandings of animals' minds. Final sections identify historical representations of difference between human and animal consciousness and their relevance to pre-established cultural attitudes, as well as the ways that representations

of animals' minds target particular audiences and sometimes produce problematic outcomes. The editors conclude with a discussion of the relationship between the book's chapters and two pressing themes: the connection between human beliefs about animals' minds and human ethical behavior, and the challenges and conditions for knowing the minds of animals. By inviting readers to compare and contrast multiple, uncommon points of view, this

collection offers a unique encounter with the diverse perspectives and theories now shaping animal studies. *Ocean Sticker Book* Internet Kids & Family Yellow Ocean Country is an adventure story, a call to action, and a poetic meditation on the state of the seas. But most importantly it is the story of finding true hope in the midst of one of the greatest crises to face humankind, the rapidly degrading state of our environment. After a near-

drowning accident in which she was temporarily paralyzed, Liz Cunningham crisscrosses the globe in an effort to understand the threats to our dazzling but endangered oceans. This intimate account charts her thrilling journey through unexpected encounters with conservationists, fishermen, sea nomads, and scientists in the Mediterranean, Sulawesi, the Turks and Caicos Islands, and Papua, New Guinea. LOS ANGELES TIMES

BOOK PRIZE WINNER • An MIT astrophysicist reinvents herself in the wake of tragedy and discovers the power of connection on this planet, even as she searches our galaxy for another Earth, in this “bewitching” (Anthony Doerr, *The New York Times Book Review*) memoir. “Sara Seager’s exploration of outer and inner space makes for a stunningly original memoir.”—Abraham Verghese, author of *Cutting for Stone* Sara Seager has always been in love with the stars: so

many lights in the sky, so much possibility. Now a pioneering planetary scientist, she searches for exoplanets—especially that distant, elusive world that sustains life. But with the unexpected death of Seager’s husband, the purpose of her own life becomes hard for her to see. Suddenly, at forty, she is a widow and the single mother of two young boys. For the first time, she feels alone in the universe. As she struggles to navigate her life after loss, Seager takes solace in the alien

beauty of exoplanets and the technical challenges of exploration. At the same time, she discovers earthbound connections that feel every bit as wondrous, when strangers and loved ones alike reach out to her across the space of her grief. Among them are the Widows of Concord, a group of women offering advice on everything from home maintenance to dating, and her beloved sons, Max and Alex. Most unexpected of all, there is another kind of one-in-a-billion match, not in the

stars but here at home. Probing and invigoratingly honest, *The Smallest Lights in the Universe* is its own kind of light in the dark.

Das iPad macht das digitale Leben leichter. Mit den aktuellen Modellen iPad Air 2 und iPad mini 3 werden die Vorteile der Apple-Welt sichtbar: Durch die engere Verzahnung mit dem Rechner lassen sich (auch für Windows-Nutzer) Kommunikation, Arbeit und Unterhaltung noch

flüssiger gestalten. Daniel Mandl hat seine bewährte Anleitung hierzu komplett überarbeitet. Die bebilderten Beispiele helfen in fast jeder digitalen Lebenslage weiter. Der Autor zeigt, wie sich die persönlichen Dateien über die iCloud und iCloud Drive organisieren lassen. Selbstverständlich spielen auch Datenschutz und Sicherheit eine große Rolle. [Über die Zielgruppe] Dieses Buch ist gerade für jene geeignet, die sich zum ersten Mal an ein iPad ab

der 2. Modellgeneration wagen. Doch nicht nur diese, selbst fortgeschrittene Apple-Nutzer können hier mit so mancher – bislang versteckter – Apple-Funktion ihre digitalen Möglichkeiten erweitern. Schließlich eröffnet die Version ab 8.1 an Ihrem iPad neue »digitale Horizonte«. Ein Zusatzkapitel über die Bedienungshilfen gibt es direkt beim Verlag zum kostenfreien Herunterladen.

NATIONAL GEOGRAPHIC DE
A comprehensive and hands-on introduction to

the core concepts, methods, and applications of agent-based modeling, including detailed NetLogo examples. The advent of widespread fast computing has enabled us to work on more complex problems and to build and analyze more complex models. This book provides an introduction to one of the primary methodologies for research in this new field of knowledge. Agent-based modeling (ABM) offers a new way of doing science: by conducting computer-based

experiments. ABM is applicable to complex systems embedded in natural, social, and engineered contexts, across domains that range from engineering to ecology. An Introduction to Agent-Based Modeling offers a comprehensive description of the core concepts, methods, and applications of ABM. Its hands-on approach—with hundreds of examples and exercises using NetLogo—enables readers to begin constructing models immediately, regardless of experience

or discipline. The book first describes the nature and rationale of agent-based modeling, then presents the methodology for designing and building ABMs, and finally discusses how to utilize ABMs to answer complex questions. Features in each chapter include step-by-step guides to developing models in the main text; text boxes with additional information and concepts; end-of-chapter explorations; and references and lists of relevant reading. There is also an accompanying

website with all the models and code.
