Low-firing and

Burnishing Echo Point
Books & Media
This is the first book in a

European language to make a comprehensive study of the life and works of the astonishingly versatile and accomplished Meiji potter, Makuzu Kozan (1842 - 1916), who was acclaimed as one of the greatest ceramic artists of the Meiji period. The Meiji period, after the opening of Japan to the West in the mid-nineteenth century, was a time of momentous change for Japanese society and Kozan's Makuzu workshop makes an ideal case study to examine the effects of

these changes on the Japanese ceramic industry. This book tells the story of Kozan's Makuzu wares from their origins in a traditional workshop in Kyoto to their maturity in a prolific factory in the newly-opened port of Yokohama, where Kozan's ability to cater to the demands of a new Western export market and to incorporate new Western glaze techniques led to enormous success, both in Japan and abroad at the international exhibitions that flourished from the

1850s. Lavish illustrations highlight Kozan's remarkable and technical and artistic achievements, while ceramic marks and box inscriptions are analysed as a practical guide to dating Makuzu ware. Clare Pollard discusses the role of later generations of the Miyagawa family in the running of the workshop and relates developments in Makuzu ware to the work of other major potters of the era, both in Japan and in Europe and America. Incorporating contemporary sources

(including previously unstudied archival material from the Makuzu workshop itself), recent research and the study of a large corpus of Makuzu wares in museums and private collections all over the world, the book examines the artistic, political, and commercial factors that influenced Kozan and his contemporaries as they strove to come to terms with shifting life-styles and changing attitudes to the arts, and moved towards the creation of a modern ceramic industry.

 This Encyclopedia begins with an introduction

summarizing its scope and content. Glassmaking; Structure of Glass, Glass Physics, Transport Properties, Chemistry of Glass, Glass and Light, Inorganic Glass Families, Organic Glasses, Glass and the Environment, Historical and Economical Aspect of Glassmaking, History of Glass, Glass and Art, and outline possible new developments and uses as presented by the best known people in the field (C.A. Angell, for example). Sections and

chapters are arranged in a logical order to ensure overall consistency and avoid useless repetitions. All sections are introduced by a brief introduction and attractive illustration. Newly investigated topics will be addressed, with the goal of ensuring that this Encyclopedia remains a reference work for years to come.

Ceramic Technology for Potters and Sculptors

The Crowood Press
Ceramics had a far-reaching impact in the second half of the twentieth century, as its

artists worked through the same ideas regarding abstraction and form as those for other creative mediums. *Live Form* shines new light on the relation of ceramics to the artistic avant-garde by looking at the central role of women in the field: potters who popularized ceramics as they worked with or taught male counterparts like John Cage, Peter Voulkos, and Ken Price. Sorkin focuses on three Americans who promoted ceramics as an advanced artistic medium: Marguerite

Wildenhain, a Bauhaus-trained potter and writer; Mary Caroline (M. C.) Richards, who renounced formalism at Black Mountain College to pursue new performative methods; and Susan Peterson, best known for her live throwing demonstrations on public television. Together, these women pioneered a hands-on teaching style and led educational and therapeutic activities for war veterans, students, the elderly, and many others. Far from being an isolated field, ceramics

offered a sense of community and social engagement, which, Sorkin argues, crucially set the stage for later participatory forms of art and feminist collectivism. *How To Make & Use Gas Fired Kilns* Herbert Press Provides a framework for examining, testing, and understanding glaze technology.

"This book made me fall in love with glaze all over again." —Ben Carter,

author of *Mastering the Potter's Wheel* Whether you look forward to glazing your work or are guilty of saying "I hate glazing!" *Amazing Glaze* is for you. Join author and *Odyssey Clayworks* founder Gabriel Kline on a journey that makes glazing less intimidating and more fun. Start in the "glaze kitchen" where you'll set yourself up for success, then move on to learning the tools and techniques for getting your glaze right every time. Along the way, Gabriel shares dozens of

tried-and-true recipes and combinations for both mid-range and high-fire glazes. The recipes and foundational techniques of *Amazing Glaze* are just the beginning. Learn about layering with slip and underglaze, work with resists, and combine techniques to take your glazing above and beyond. Whether you're after crystalline effects, an elusive red, or a crash-course in applying decals it's all here. A variety of artist features and stunning gallery work from today's top artists

will leave you inspired and ready to get glazing.

Wild Clay Oxbow Books

The ultimate illustrated guide for sourcing, processing and using wild clay. Potters around the world are taking to the local landscape to dig their own wild clay, discover its unique properties, and apply it to their craft. This guide is the ideal starting point for anyone – from novices, improvers and experts to educators and students – who wants to forge a closer bond between their art and their

surroundings. Testing and trial and error are key to finding a material's best use, so the authors' tips, drawn from long experience in the US and Japan (but which can be applied to clays anywhere) provide an enviable head-start on this rewarding journey. A clay might be best suited to sculpture and tile bodies, throwing clay bodies, handbuilding and slab bodies, or simply be applied as a glaze or slip. The specific properties of found materials can create a diverse range of

effects and surfaces, or, even when not fired, can be adapted for use as colorful pastels or pigments. Beautiful illustrations and helpful technical descriptions explain the formation of various clays; how to locate, collect and assess them; how to test their properties of shrinkage, water absorption, texture and plasticity; the best ways to test-fire them; and how to adapt a clay's characteristics by blending appropriate materials. From prospecting in the field to

holding your finished product, there is helpful advice through every stage, and a gallery of work by international potters who have embraced the clays found around them.

University of Pennsylvania Press

"Full of surprises [and] evocative." The Spectator
"Passionately written."

Apollo "An extraordinary accomplishment."

Edmund de Waal

"Monumental." Times

Literary Supplement "An epic reshaping of ceramic art." Crafts "An important book." The Arts Society Magazine In his major new history, Paul Greenhalgh tells the story of ceramics as a story of human civilisation, from the Ancient Greeks to the present day. As a core craft technology, pottery has underpinned domesticity, business, religion, recreation, architecture, and art for millennia. Indeed, the history of ceramics parallels the development of human society. This

fascinating and very human history traces the story of ceramic art and industry from the Ancient Greeks to the Romans and the medieval world; Islamic ceramic cultures and their influence on the Italian Renaissance; Chinese and European porcelain production; modernity and Art Nouveau; the rise of the studio potter, Art Deco, International Style and Mid-Century Modern, and finally, the contemporary explosion of ceramic making and the postmodern potter.

Interwoven in this journey through time and place is the story of the pots themselves, the culture of the ceramics, and their character and meaning. Ceramics have had a presence in virtually every country and historical period, and have worked as a commodity servicing every social class. They are omnipresent: a ubiquitous art. Ceramic culture is a clear, unique, definable thing, and has an internal logic that holds it together through millennia. Hence ceramics is the most peculiar and

extraordinary of all the arts. At once cheap, expensive, elite, plebeian, high-tech, low-tech, exotic, eccentric, comic, tragic, spiritual, and secular, it has revealed itself to be as fluid as the mud it is made from. Ceramics are the very stuff of how civilized life was, and is, led. This then is the story of human society's most surprising core causes and effects.
