Music Appreciation for the Elementary Grades Oxford University Press

Discover how, in this curriculum of five books 1, 1A, 2, 3, and 4, music elements (music concepts) are scope-and-sequence taught through the active-participation music skills of listening, singing / chanting, moving, playing / performing, improvising /

creating, composing / arranging, reading / notating, and describing / evaluating. Also discover how music skills begin with discrimination (rote) learning and progress to the limitless creative levels of inferential learning. Discover how every person at any age can sing in tune (tonal skill) and perform a steady beat (rhythm skill). Singing in tune develops into maintaining intonation with an accurate tonal center, and performing a steady beat develops into maintaining a consistent tempo with an accurate meter. These two skills are the Gateway Skills to all of music. When learned, spectators

turn into life-long participators, and the whole realm of music becomes available. Discover how a curriculum, which is not a textbook or music series book, can be your pathway into ultimate teaching freedom and your students' exciting journey into realms of limitless artistic creativity. Discover in Book 2, Grades K-2, how music elements (music concepts of pitches, melodic direction, melody, scales, modality, keyality, beats, meter, rhythm, tempo, form, style, and eras) are scope-and-sequence taught for easy comprehension and artistic musicianship through the active-

participation music skills listed above. (228 pgs.)
