Engaging and Empowering Families in Secondary Transition Teachers College Press

This Security Sector Reform (SSR) Paper offers a universal and analytical perspective on the linkages between Security Sector Governance (SSG)/SSR (SSG/R) and Sustainable Development

Goal-16 (SDG-16), focusing on conflict and post-conflict settings as well as transitional and consolidated democracies. Against the background of development and security literatures traditionally maintaining separate and compartmentalized presence in both academic and policymaking circles, it maintains that the contemporary security- and development-related challenges are inextricably linked, requiring effective measures with an accurate understanding of the nature of these challenges. In that sense, SDG-16 is surely a good step in the right direction. After comparing and contrasting SSG/R and SDG-16, this SSR Paper argues that human security lies at the heart of the nexus between the 2030 Agenda of the United Nations (UN) and SSG/R. To do so, it first provides a brief overview of the scholarly and policymaking literature on the development-security nexus to set the background for the adoption of The Agenda 2030. Next, it reviews the literature on SSG/R and SDGs, and how each concept evolved over time. It then identifies the puzzle this study seeks to address by comparing and contrasting SSG/R with SDG-16. After making a case that human security lies at the heart of the nexus between the UN's 2030 Agenda and SSG/R, this book analyses the strengths and weaknesses of human security as a bridge between SSG/R and SDG-16 and makes policy recommendations on how SSG/R, bolstered by human security, may help achieve better results on the SDG-16 targets. It specifically emphasizes the importance of transparency, oversight, and accountability on the one hand, and participative approach and local ownership on the other. It concludes by arguing that a simultaneous emphasis

on security and development is sorely needed for addressing the issues under the purview of SDG-16.

IEP Goal Writing for Speech-Language Pathologists Council For Exceptional Children

This book describes a method of teaching that fosters autonomous learning in all students, including students with disabilities. The pedagogy is based on decades of research on strategy instruction as well as on a theory of learning that claims these four conditions promote self-determined learning in all learners: (1) opportunities to choose expectations for gaining something from a learning challenge, (2) strategies that regulate responses to meet those expectations, (3) comparisons between results and expectations that provoke additional adjustment in expectations and responses, and (4) persistent engagement and adjustment until results match expectations. The pedagogy of self-instruction described in this book anchors these conditions in everyday instruction so students can learn by adjusting to their own expectations. Chapter 1 compares this approach to the teacher-directed methods of direct instruction that require teachers to set expectations for students, control how students respond to them, evaluate the outcomes they produce, and then prescribe adjustments students must make to improve. Chapter 2 provides evidence that too much of special education instruction reflects this teacher-directed approach and as a

consequence discourages students from learning how to learn on their own. Chapters 3-6 identify four ways to shift learning control from teachers to students and Chapters 7 and 8 identify the obstacles to achieving this instructional shift in special education. The appendices of the book provide a bibliography of research on self-instruction and direct instruction pedagogies and a validated self-assessment that can evaluate the directedness of your teaching.
