Julius Caesar. Hamlet Cambridge University Press
As both chemist and priest your scribe believes that the current gap between science and religion can be bridged largely by revelation. Revelation is a select part of religion, often beyond the ken or

competence of qualified science. Types of revelation comprise the manifest supernatural and prophecy, fulfilled prophecy supporting what is yet to be fulfilled. The book offers answers and asks a variety of questions. This book is written in four sections, each with chapter-like and numbered subsections: Section 1 the most scriptural and salvational Section 2 the most prophetic or revelatory Section 3 the most scientific and integrative knowledge Section 4 the most semantic and hypothetic Section 1 Scripture, Old and New Testament, appears to be a rich source of revelation and other reliable spiritual reality. Its integrity distinguishes divine and human reporting, also religion versus irreligion. Jesus' early advent fulfilled dozens of Old Testament

prophecies; divine evidence for the reliability of its revelation. Scripture reveals that Jesus of Nazareth walked among us, both man and God. Section 2 Section 2 comprise a commentary upon the Revelation to John. The prophecy concentrated therein is mysterious in part yet relatively ordered and culminating. It helps to organize other prophecy revealed in Scripture. And it serves to guide our ongoing participation with the ascended Christ as Lord. Prophecy reveals that God has operated mightily in and on history, that he has revealed essential parts of his plan and care for mankind. Section 3 Without religion, science, particularly inanimate science, tends to support determinism, also a relatively rigid causation or rationalism. Science develops knowledge more than understanding. Section 3 attempts to assemble salient science together with a minor proportion of related hypotheses. Your scribe believes that God's concern and involvement and control of life is more intimate and profound than most science and philosophy has indicated. Section 4 The relatively hypothetic Section 4 comprises much supposition, some semantically

treated. Suppositions are offered concerning material or systematic structures for said living sub matter in body, mind and soul. Life after first death is a gift from the soul's Creator. Spirits just and unjust await resurrection in the spirit, not in the flesh, not in reincarnation. Tthe soul is foundational to theology and tends to respond to spiritual reality, to living sub matter, particularly to God and other souls.

It is true that mankind itself has probably always been characterized with the main desire to determine just what spiritual truth really is. For centuries and centuries, highly educated philosophers and religious men alike have always stood toe-to-toe, disagreeing on spiritual truth. Since they cannot all be right, this would strongly indicate that education, religious persuasion, or even intelligence has little to do with our discovery of the real spiritual truth. For if these things were truly critical, then obviously, the spiritual/intellectual giants of history would

have agreed on spiritual truth long ago. In this work, author Ted Even endeavors to show that the disagreeing intellectuals/skeptics of the past only serves to reinforce Christ's radical statement about our need to just become like little children in order to discover the spiritual truth and that literally everyone has the same opportunity to enter the kingdom of heaven on that basis. However, while super-intelligence or big degrees may not be necessary, the discovery of spiritual truth does require just one very reasonable quality of heart which little children have always possessed. Find out just what this basic quality of heart is as you continue your search for spiritual truth within this simple to understand work which only leaves the real spiritual truth left standing.
