Collecting is usually understood as an activity that bestows permanence, unity, and meaning on otherwise scattered and ephemeral objects. In *The Redemption of Things*, Samuel Frederick emphasizes that to collect things, however, always entails displacing, immobilizing, and potentially disfiguring them, too. He argues that the dispersal of objects, seemingly antithetical to the collector's task, is essential to the logic of gathering and preservation. Through analyses of collecting as a dialectical process of preservation and loss, *The Redemption of Things* illustrates this paradox by focusing on objects that challenge notions of collectability: ephemera, detritus, and trivialities such as moss, junk, paper scraps, dust, scent, and the transitory moment. In meticulous close readings of works by Gotthelf, Stifter, Keller, Rilke, Glauser, and Frisch, and by examining an experimental film by Oskar Fischinger, Frederick

reveals how the difficulties posed by these fleeting, fragile, and forsaken objects help to reconceptualize collecting as a poetic activity that makes the world of scattered things uniquely palpable and knowable.

Communist and capitalist states alike were scarred by the economic shocks of the 1970s. Why did only communist governments fall in their wake? Fritz Bartel argues that Western democracies were insulated by neoliberalism. While austerity was fatal to the legitimacy of communism, democratic politicians could win votes by pushing market discipline.
