This companion offers a unique introductory study of linguistics in India. Well supplemented with sample problems and linguistic puzzles to bolster analytical skills and logical reasoning, it promotes a unique inquiry-based approach to learning linguistics. The volume looks at all the major subdisciplines of linguistics, including phonetics, phonology, morphology, semantics, syntax, and the interdisciplinary domains of psycholinguistics and neurolinguistics. It provides a wealth of data not only from many Indian languages belonging to the primary language families present in the country – Indo-Aryan, Dravidian, Austro-Asiatic, and Tibeto-Burman – but also from the endangered languages of the Tai-Kadai family of Assam and the Greater Andamanese family. The author gives a holistic view of the linguistic landscape of India and fills a significant gap in the study of the lesser-known languages of South Asia. This volume will be an excellent resource for students and researchers of Indian languages, cultural studies, South Asian studies, and all branches of linguistics.

A verb can be described as transitive or intransitive based on whether it requires an object to express a complete thought or not. A transitive verb is a verb that requires (takes or allows) an object to receive the action. "Object" may be in the form of a noun, phrase, or pronoun that refers to the person or thing that is affected by the action of the verb. A sentence with a transitive verb can generally be changed into passive voice (however, sometimes a transitive verb cannot be used in the passive voice). A transitive verb can't stand alone with only a subject. An intransitive verb does not take an object. However, there may take prepositional phrases or adverbs. Adding adverbs or prepositional phrases modifies the verb but doesn't change its meaning. A sentence with an intransitive verb can never be changed into a passive voice. Some verbs have multiple meanings and can be transitive or intransitive, depending on the sense in which they are used. In some instances, a verb may require an object, while in others it does not require an object. -- Based on their transitive or/and intransitive uses, verbs may be categorized as follows: 01.
