In *The Fictions of Translation*, emerging and seasoned scholars from a range of cultures bring fresh perspectives to bear on the age-old practice of translation. The current movement of people, knowledge and goods around the world has made intercultural communication both prevalent and indispensable.

Consequently, the translator has become a more prominent figure and translation an

increasingly present theme in works of literature. Embedding translation in a fictional setting and considering its most extreme forms – pseudotranslation or self-translation, for example – are fruitful ways of conceptualizing the act of translating and extending the boundaries of translation studies. Taken together, the various translational fictions examined in this collection yield new insights into questions of displacement, migration and hybridity, all characteristic of the modern world. *The Fictions of Translation* will thus be of interest to practising translators, students and scholars of translation and literary studies, as well as a more general readership.

The Interval of Freedom was first published in 1960. Minnesota Archive Editions uses digital technology to make long-unavailable books once again accessible, and are published unaltered from the original University of Minnesota Press editions. When Boris Pasternak's *Doctor Zhivago* was published in Europe and America in 1957 and 1958, the Western world was astonished and elated. But *Doctor Zhivago* is not the only significant literary work to come out of Soviet Russia recently. During four extraordinary years, 1954 to 1957, from Stalin's death to the aftermath of the Hungarian revolt, Soviet Russian authors were able to express their minds with

unusual freedom. In this volume Professor Gibian examines various revelations made in Soviet literature during this interval of comparative freedom. Nearly a score of contemporary Soviet writers are considered in detail. The authors and their works are grouped according to three major subjects to which Soviet writers have devoted much attention: science, love and sex, and the literary villain or "negative" character. Works of the following writers are discussed in depth: Alexander Bek, Leonid Leonov, Daniel Granin, Venyamin Kaverin, Vladimir Dudintsev, Semen Kirsanov, S. Aleshin, Viktor Nekrasov, Nikolai Pogodin, Galina Nikolaeva, Alexander Korneichuk, Alexander Shtein, Alexander Volodin, Nikolai Gorbunov, Nikolai Zhdanov, and Alexander Yahin. An entire chapter is devoted to *Doctor Zhivago*. In an introductory chapter, the author provides a survey of literary developments during the interval of freedom. In a final chapter he draws conclusions about the nature of the thinking of Soviet literary intelligentsia, comparing it with Western literary thought. The book is illuminating from social and political as well as literary viewpoints.

Contact between Islam and the West is 1400 years old. Both sides have had more than adequate time to become familiar with the other. Yet the world is still arguing about Islam's teachings. Is Islam peaceful? Does it commend violence? Does Islam respect "the other"? Does Islam abuse women? Is Islam anti-Semitic? Does Islam teach the Torment of the Grave? Does Islam recommend the beating of wives? Do Muslim Scriptures commend Temporary Marriage of Pleasure? Did Zayd divorce Zaynab because he had no further need of her? All these questions are easy to settle for anyone who can read Islamic Scripture in Arabic. The author of this book is such a person. However, to answer all these questions in the affirmative would do the image of Islam much damage in the West, where Islam is keen to present a polished image, especially in the light of much violence committed in its name against westerners. Muslim leaders, and their allies in the West, have popularised a distinction between Muslims and Islamists, in order to distance Islam from thousands of heinous Muslim crimes such as the Charlie Hebdo massacre. Are the English translations of the Qur'an faithful to the

original Arabic? Or are they part of the charm offensive Muslim Petro-dollars have financed for years, through sponsorship of university departments of Islamic studies, investing in western media and publishing, building Islamic centres and financing Islamic societies and pressure groups throughout the West. This work gives English readers the ability to access the original Arabic of the Qur'an and hadith, and see the true face of Islam, without its face powder. It is hoped that this work will assist free thinkers to form their own opinion of Islam, based on the true Qur'an, without interference from Muslim propaganda or any agenda driven discourses.

The celebrated bestselling author of The

House on Mango Street “is back with her first work of fiction in almost a decade, a story of memory and friendship [and] the experiences young women endure as immigrants worldwide” (AP). In this masterfully written dual-language edition, a long-forgotten letter sets off a charged encounter with the past. As a young woman, Corina leaves her Mexican family in Chicago to pursue her dream of becoming a writer in the cafés of Paris. Instead, she spends her brief time in the City of Light running out of money and lining up with other immigrants to call home from a broken pay phone. But the months of befriending panhandling artists in the métro, sleeping on crowded floors, and dancing the tango at underground parties are given a lasting glow by her intense friendships with Martita and Paola. Over the years the three women disperse to three continents, falling out of touch and out of mind—until a rediscovered letter brings Corina’s days in Paris back with breathtaking immediacy. Martita, I Remember You is a rare bottle from Sandra Cisneros’s own special reserve, preserving the smoke and the sparkle of an exceptional year. Told with intimacy and searing tenderness, this tribute to the life-changing power of youthful friendship is Cisneros at her vintage best, in a beautiful dual-language edition. A VINTAGE ORIGINAL

A fascinating exploration of the intricacies of how we remember, why we forget, and what we can do to protect our memories, from the Harvard-trained neuroscientist and bestselling author of Still Alice. Have you ever felt a crushing wave of panic when you can't remember the name of that actor in the movie you saw last week, or when you walk into a room only to forget why you went there in the first place? If you're over forty, you're probably not laughing. You might even be worried that these lapses in memory could be an early sign of Alzheimer's or dementia. In reality, for the vast majority of us, these examples of forgetting are completely normal. Why? Because while memory is amazing, it is far from perfect. Our brains aren't designed to remember every name we hear, plan we make, or day we experience. Just because your memory sometimes fails doesn't mean it's broken or succumbing to disease. Forgetting is actually part of being human. In Remember, neuroscientist and acclaimed novelist Lisa Genova delves into how memories are made and how we retrieve them. You'll come to appreciate the clear distinction between normal forgetting (where you parked your car) and forgetting due to Alzheimer's (that you own a car). And you'll see how memory is profoundly impacted by meaning, emotion, sleep, stress, and context. Once you understand the language of memory and how it functions, its incredible strengths and maddening weaknesses, its natural vulnerabilities and potential superpowers, you can both vastly improve your ability to remember and feel less rattled when you inevitably forget. You don't have to fear your memory anymore. And that can be life-changing. Praise for Remember: 'Using her expertise as a neuroscientist and her gifts as a

storyteller, Genova explains the nuances of human memory. As with her previous books, this is an engaging and edifying read.' Steven Pinker, Johnstone Professor of Psychology, Harvard University, author of How the Mind Works 'No one writes more brilliantly about the connections between the brain, the mind, and the heart. Remember is a beautiful, fascinating, and important book about the mysteries of human memory--what it is, how it works, and what happens when it is stolen from us. A scientific and literary treat that you will not soon forget.' Daniel Gilbert, Edgar Pierce Professor of Psychology, Harvard University, New York Times bestselling author of Stumbling on Happiness 'In Remember, Lisa Genova provides easy-to-follow, no nonsense advice on how to maximize one of the greatest outputs of your brain--memory. But, more important, she also lets us know that while memory is a tremendous gift, the real you is much more than just what you can remember!' Rudolph E. Tanzi, PhD, professor of neurology, Harvard Medical School, coauthor of The Healing Self 'Neuroscientist and novelist Genova (Still Alice) delivers a solid primer on the way memory works and fails to work...Genova blends popular science and self-help, providing lay reader-friendly descriptions of the function of memory and sharing tips for better memory in a helpful appendix ...This accessible survey is an easy entry point for anyone wondering how and why they keep forgetting where they left their car keys.'
