Universal Design in Higher Education looks at the design of physical and technological

environments at institutions of higher education; at issues pertaining to curriculum and instruction; and at the full array of student services. Universal Design in Higher Education is a comprehensive guide for researchers and practitioners on creating fully accessible college and university programs. It is founded upon, and contributes to, theories of universal design in education that have been gaining increasingly wide attention in recent years. As greater numbers of students with disabilities attend postsecondary educational institutions, administrators have expressed increased interest in making their

programs accessible to all students. This book provides both theoretical and practical guidance for schools as they work to turn this admirable goal into a reality. It addresses a comprehensive range of topics on universal design for higher education institutions, thus making a crucial contribution to the growing body of literature on special education and universal design. This book will be of unique value to university and college administrators, and to special education researchers, practitioners, and activists.

Historical Records of New South Wales: pt.1. Cook, 1762-1780
Glenview, Ill. : Scott, Foresman
Revised and updated,

this third edition of Barbara Johnstone's *Discourse Analysis* encourages students to think about discourse analysis as an open-ended set of techniques. Exploring a variety of approaches, including critical discourse analysis, conversation analysis, interactional and variationist sociolinguistics, ethnography, corpus linguistics, social semiotics, and other qualitative and quantitative methods, the book balances its comprehensive coverage with extensive practical examples, making it the ideal introductory text for students new to the subject. This new edition reflects the increased importance within the field of new media discourse, multi-

modal discourse and the analysis of large corpora of discourse data. Updated material expands the discussion of stancetaking, whilst new material addresses recontextualization, precontextualization, and language and the body. Pedagogical features have been refreshed, including discussion questions, exercises, and ideas for small research projects, with suggested supplementary readings at the end of each chapter to encourage further discovery. Chapters in this book are self-contained, so they can be handled in any order Suggested supplementary readings are featured at the end of every chapter Book is written

specifically for a non-specialist, interdisciplinary audience Examples of computer-aided corpus analysis (reflecting the improvements made to theories and tools) supplement every chapter Discussion questions and ideas for small research projects are interspersed throughout The combination of breadth of coverage, practical examples, and student-friendly pedagogical features ensures Discourse Analysis remains the ideal textbook for students taking their first course in linguistic approaches to discourse.

Keith Johnstone's involvement with the theatre began when George Devine and Tony Richardson, artistic directors of the Royal Court Theatre, commissioned a play from him. This was in 1956. A few years later he was himself Associate Artistic Director, working as a play-reader and director, in particular helping to run the Writers' Group. The improvisatory techniques and exercises evolved there to foster spontaneity and narrative skills were developed further in the actors' studio then in demonstrations to schools and colleges and ultimately in the founding of a company

of performers, called The Theatre Machine. Divided into four sections, 'Status', 'Spontaneity', 'Narrative Skills', and 'Masks and Trance', arranged more or less in the order a group might approach them, the book sets out the specific techniques and exercises which Johnstone has himself found most useful and most stimulating. The result is both an ideas book and a fascinating exploration of the nature of spontaneous creativity.
