Thirty Years of Public Sector Reforms in Africa Oxford University Press

The purpose of this study was to examine sustainable gender equity interventions in selected public universities. The study used descriptive survey and case study research methods to carry out an in-depth analysis of the gender equity interventions in selected public universities in Kenya. The sample consisted of four public universities that were selected because they had established gender centers/institutes that were assumed to be coordinating gender equity intervention. The study has the following objectives: To establish the existing gender inequalities in the formal organisational structure of the selected universities; To identify and assess sustainability of gender equity interventions in the selected public universities; To analyse the national, regional, international and organisational culture and policy contexts that have influenced and supported the introduction of the identified gender equity interventions; To investigate the attitudes of staff, students and management towards the gender equity interventions; and to recommend appropriate institutional strategies to address existing gender inequities.

A Knight without a Castle IGI Global

Includes Proceedings of the Executive council and List of members, also section "Review of books".

Feminist Africa Springer

Uganda has attracted much attention and political visibility for its significant economic recovery after a catastrophic decline. In her groundbreaking book, Aili Mari Tripp provides extensive data and analysis of patterns of political behavior and institutions by focusing on the unique success of indigenous women's organizations. Tripp explores why the women's movement grew so dramatically in such a short time after the National Resistant Movement took over in 1986. Unlike many African countries where organizations and institutions are controlled by a ruling party or regime, the Ugandan women's movement gained its momentum by remaining autonomous.

Gendered Worlds University of Wisconsin Pres

For four decades, Makerere University, known as the "Oxford of Africa," was the sole university-level institution in all of East Africa. A fabled Mecca for aspiring youth, it trained many of the region's first generation of intellectual and political leaders, including the present presidents of Kenya and Tanzania. It remains one of Africa's most important universities today. As one of the first comprehensive look at an African university, this book tells the story of Makerere's colonial beginnings, its efflorescence during the 1950s and 1960s, its calamitous decline during nearly two decades of tyranny and civil war, and its resurgence following the restoration of peace and relative stability.

The Genetic and Environmental Basis for Diseases in Understudied Populations Africa Research and Publications

One of the major issues this book examines is what the African experience and identity have contributed to the debate on citizenship in the era of globalisation. The volume presents case studies of different African contexts, illustrating the gendered aspects of citizenship as experienced by African men and women. Citizenship carries manifold gendered aspects and given the distinct gender roles and responsibilities, globalisation affects citizenship in different ways. It further examines new forms of citizenship emerging from the current era dominated by a neoliberal focus. The book is not exclusive in terms of

theorisation but its focus on African contexts, with an in-depth analysis taking into consideration local culture and practices and their implications for citizenship, provides a good foundation for further scholarly work on gender and citizenship in Africa.

Handbook of Resilience in Children Springer Nature

Today's children face a multitude of pressures, from the everyday challenges of life to the increasing threats of poverty, exploitation, and trauma. Central to growing up successfully is learning to deal with stress, endure hardships, and thrive despite adversity. Resilience – the ability to cope with and overcome life's difficulties – is a quality that can potentially be nurtured in all young people. The second edition of the *Handbook of Resilience in Children* updates and expands on its original focus of resilience in children who overcome adversity to include its development in those not considered at risk, leading to better outcomes for all children across the lifespan. Expert contributors examine resilience in relation to environmental stressors, as a phenomenon in child and adolescent disorders, and as a means toward positive adaptation into adulthood. New and revised chapters explore strategies for developing resilience in the family, the therapist's office, and the school as well as its nurturance in caregivers and teachers. Topics addressed include: Resilience in maltreated children and adults. Resilience and self-control impairment. Relational resilience in young and adolescent girls. Asset-building as an essential component of treatment. Assessment of social and emotional competencies related to resilience. Building resilience through school bullying prevention programs. Large-scale longitudinal studies on resilience. The second edition of the *Handbook of Resilience in Children* is a must-have reference for researchers, clinicians, allied practitioners and professionals, and graduate students in school and clinical psychology, education, pediatrics, psychiatry, social work, school counseling, and public health.

Gender and Citizenship in the Global Age BRILL

Over the course of the last decade, political and mental entities at large have embraced global mental health: the idea that psychiatric health is vital to improved quality of life. Physicians globally have implemented guidelines recommended by the National Institute of Mental Health (NIMH) in 2007, thereby breaking down barriers to care and improving quality of life in areas where these practices have been implemented. Programs for training and education have expanded as a result. Clinicians benefit more from both local resources in some regions as well as in international collaboration and technological advancements. Even amidst all of these positive outcomes, clinicians still face some stumbling blocks. With worldwide statistics estimating that 450 million people struggle with mental, neuropsychiatric, and neurological disorders—25 percent of the world's non-communicable disease burden—rising to these challenges prove to be no small feat, even in wealthy Western nations. Various articles and books have been published on global mental health, but few of them thoroughly cover the clinical, research, innovative, and social implications as they pertain to psychiatry; often, only one of these aspects is covered. A comprehensive text that can keep pace with the rapidly evolving literature grows more and more valuable each day as clinicians struggle to piece together the changes around the world that leave open the possibility for improved outcomes in care. This book seeks to boldly rectify this situation by identifying innovative models of service delivery, training, education, research funding, and payment systems that have proven to be exemplary in implementation and scalability or have potential for scalability. Chapters describe specific barriers and challenges, illuminating effective strategies for improved outcomes. This text is the first peer-reviewed resource to gather prestigious physicians in global

mental health from around the world and disseminate their expertise in the medical community at large in a format that is updateable, making it a truly cutting-edge resource in a world constantly changed by medical, scientific, and technological advances. *Innovations in Global Mental Health* is the ultimate resource for psychiatrists, psychologists, primary care physicians, hospitalists, policy makers, and all medical professionals at the forefront of global mental health and its implications for the future.

Tradition and Transition African Books Collective

Extrait de la couverture : "The phenomenon of globalization has influenced the African social and cultural landscape in a variety of ways. Yet its effect on women's lives has not figured prominently in the scholarship on Africa. ... In this volume, scholars deconstruct important issues and provide perspectives on understanding and transforming women's experiences in Africa. ... Some of the issues highlighted include the education of girls in Kenya, women's role in agriculture and crop production in Africa, women as culture mediators in music, the participation of women in sports, conservation of biodiversity and women in resource management in East Africa, and the informal sector as a survival strategy in Nigeria."

African Studies at Makerere, 1963-1966 Frontiers Media SA

"The author's smooth-flowing prose is laced with poignant details... A quick, inspirational story of overcoming adversity."

—Kirkus Reviews While some would hail Katwe as a den of failures, Robert Katende sees it as a training ground for future kings and queens. His work has started a movement which has caught the attention of world leaders Bill & Melinda Gates and The Obama Foundation, with many more on the horizon. Once too poor to afford the rat poison with which he planned to take his own life, Robert's legacy tells an astonishing true story of resilience and hope. His work was made famous in the Disney movie *Queen of Katwe*, a biographical drama about a 13-year-old girl who became a Uganda National Chess Champion under Robert's mentorship. Now readers will get a first-hand account of how it all started, and the life of the man behind Phiona Mutesi's world-renown accomplishments. This powerful story is presented in two parts. First from Robert's perspective — war refugee turned missionary living the improbable dream to empower kids in Ugandan slums through chess — a game so foreign there is no word for it in their native language. And then by debut author Nathan Kiwere—presenting heartfelt testimonies from Katende's students. You'll ride along the deep valleys and the high mountaintops of Robert's childhood as he beats impossibilities that would have likely crushed anyone else! Robert's life illuminates a situation many will find difficult to imagine. However, his life will inspire you to achieve great things against insurmountable obstacles.

New Encyclopedia of Africa Springer Nature

This book celebrates Chinua Achebe, one of the most profound and famous African writers of our time, and his widely read masterpiece, *Things Fall Apart*. The novel remains a "must read" literary text for reasons the many contributors to this book make clear in their astute readings. Their perspectives offer thought provoking and critically insightful considerations for scholars of all ages, cultures and genders.

Theme Made For Success Publishing

Among the topics considered are the logic of mass higher education, globalization and inequality, the role of research universities, academic freedom, private higher education, and the academic profession and its problems. These topical chapters are accompanied by in-depth discussions of Asia and Africa.

Promises and Realities African Books Collective

Scholars in the Marketplace is a case study of market-based reforms at Uganda's Makerere University. With the World Bank heralding neoliberal reform at Makerere as the model for the transformation of higher education in Africa, it has implications for the whole continent. At the global level, the Makerere case exemplifies the fate of public universities in a market-oriented and capital friendly era. The Makerere reform began in the 1990s and was based on the premise that higher education is more of a private than a public good. Instead of pitting the public against the private, and the state against the market, this book shifts the terms of the debate toward a third alternative than explores different relations between the two. The book distinguishes between privatisation and commercialisation, two processes that drove the Makerere reform. It argues that whereas privatisation (the entry of privately sponsored students) is compatible with a public university where priorities are publicly set, commercialisation (financial and administrative autonomy for each faculty to design a market-responsive curriculum) inevitably leads to a market determination of priorities in a public university. The book warns against commercialisation of public universities as the subversion of public institutions for private purposes.

Uganda Confidential Hodder Wayland

"The Oxford history of Anglicanism" is a major new and unprecedented international study of the identity and historical influence of one of the world's largest versions of Christianity. This global study of Anglicanism from the sixteenth century looks at how was Anglican identity constructed and contested at various periods since the sixteenth century; and what was its historical influence during the past six centuries. It explores not

just the ecclesiastical and theological aspects of global Anglicanism, but also the political, social, economic, and cultural influences of this form of Christianity that has been historically significant in western culture, and a burgeoning force in non-western societies today. The chapters are written by international experts in their various historical fields which includes the most recent research in their areas, as well as original research. The series forms an invaluable reference for both scholars and interested non-specialists. Volume one of The Oxford History of Anglicanism examines a period when the nature of 'Anglicanism' was still heavily contested. Rather than merely tracing the emergence of trends that we associate with later Anglicanism, the contributors instead discuss the fluid and contested nature of the Church of England's religious identity in these years, and the different claims to what should count as 'Anglican' orthodoxy. After the introduction and narrative chapters explain the historical background, individual chapters then analyse different understandings of the early church and church history; variant readings of the meaning of the royal supremacy, the role of bishops and canon law, and cathedrals; the very diverse experiences of religion in parishes, styles of worship and piety, church decoration, and Bible usage; and the competing claims to 'Anglican' orthodoxy of puritanism, 'avant-garde conformity' and Laudianism.

Quality Education and International Partnership for Textile and Fashion Charles Scribner's Sons

This book investigates key issues facing leaders in increasingly complex decision-making environments as a result of globalization. It presents a synthesis and interpretation of academic research in multiple disciplines and integrates it into a practical approach that is readily useable by leaders in government, corporations, and civil society.
