The deaths in and around Dunmanway in 1922 have always been shrouded in rumour and supposition. This book seeks to get to the bottom of them. One thing is certain: Captain Herbert Woods shot Commandant Michael O'Neill of the IRA on the stairs of Ballygroman House at 2.30a.m. on the 26th April and killed him. Who was Herbert Woods and why did shoot an unarmed man? Who was Michael O'Neill and what was he doing inside the house at that hour of the morning? What connection had this event to the killing of ten Protestants in West Cork over the next three nights? Are they connected with the killing of four British soldiers in Macroom on the same day? What was the effect on the local

Protestant minority? What happened after Herbert Woods and his Hornibrook relations were arrested by the Irish Republican Police and disappeared? This book attempts to answer all these questions. Using previously overlooked evidence it proves that the real story is a simple one of revenge. It directly challenges claims of sectarianism and British involvement presenting a true story of these appalling events.

The exercise to fill in the blank, "e;Ethics can \_\_\_\_\_"e;, would no doubt give rise to numerous different responses. Another perspective based on all that workplace ethics can realise and deliver is to recognise that "e;Ethics can"e; is the full sentence. Ethics can build trust; it can create pleasant, productive workplaces that are characterised by high levels of fairness, respect, accountability and responsibility; it can foster sound relationships with internal and external stakeholders; it can position the organisation as an employee of choice, attracting and retaining the best talent, it can boost the organisations reputation and branch equity; it can create a high degree of customer and investor confidence; and it can and should be a key differentiator that accords ethical organisations a unique source of competitive advantage. In short, ethics can make all the difference - which is a difference that is sorely needed. The book includes various practical exercises, checklists and guidelines, suggested workplace discussions, case studies and commentaries, and further reading. The title of this book, "e;Ethics Can"e;, lives up to its promise. In addition to dealing with more recent issues such as cybercrime, social media and supply chain, the content is an illustration of how ethics permeates every aspect of the workplace. The book is packed with practical examples, and each chapter contains useful questions for workplace discussions and recommended reading. That the author eats, sleeps and breathes ethics shines through. If you are uncertain about how to take ethics from concept to implementation, read this book. And keep it for regular future reference.-Ansie Ramalho, Chief Executive Officer, The Institute of Directors, Southern Africa Cynthia Schoeman is at the forefront of promoting business ethics in South Africa. Drawing on her extensive knowledge and experience, she has written an exceptional book. It offers a clear and systematic treatment of business ethics, and is laced with valuable insights and practical suggestions.-Rabbi Gideon Pogrud (MA (Cantab)), Business Ethics Consultant Corporate White-Collar Crime Scandals by Mocktime Publication The globalization of housing finance led to the global financial crisis, which has created new barriers to adequate and affordable housing. It presents major challenges for current housing law and policy, as well as for the development of housing rights. This book examines and discusses key contemporary housing issues in the

context of today's globalized housing systems. The book takes up the challenge of developing a new paradigm, working towards the possibility of an alternative future. Revolving around three constellations of writing by diverse contributors, each chapter sets out a clear and developed approach to contemporary housing issues. The first major theme considers the crisis in mortgage market regulation, the development of mortgage securitization and comparisons between Spain and Ireland, two countries at the epicentre of the global housing market crisis. The second thematic consideration focuses on housing rights within the European human rights architecture, within national constitutions, and those arising from new international instruments, with their particular relevance for persons with disabilities and developing economies. The third theme incorporates an examination of responses to the decline and regeneration of inner cities, legal issues around squatting in developed economies, and changes in tenure patterns away from home-ownership. This topical book will be valuable to those who are interested in law, housing rights and human rights, policy-making and globalization.

In *Hacking Happiness*, futurist and contributing Mashable writer John C. Havens introduces you to your "quantified self"—your digital identity represented by gigabytes of data produced from tracking your activities on your smartphone and computer. Harvested by megacorporations such as Google, Facebook, and Amazon, Havens argues that companies gather this data because of its immense economic value, encouraging a culture of "sharing" as they hoard the information based on our lives for private monetary gain. But there's an alternative to this digital dystopia. Emerging technologies will help us reclaim this valuable data for ourselves, so we can directly profit from the insights linked to our quantified selves. At the same time, sensors in smartphones and wearable devices will help us track our emotions to improve our well-being based on the science of positive psychology. Havens proposes that these trends will lead to new economic policies that redefine the meaning of "wealth," allowing governments to create policy focused on purpose rather than productivity. An issues book highlighting the benefits of an examined life in the digital world, this timely work takes the trepidation out of the technological renaissance and illustrates

how the fruits of the Information Age can improve our lives for a happier humanity.

This volume explores new ground in the area of personal transformation, achieved partly through a person's volition with a guide or catalyst. The authors research and define the dynamics of paradigmatic-thinking, incorporating a series of case vignettes of personal transitions. They describe impediments to such change, as well as the post-transformation state of mind where vulnerabilities may persist. The resultant need for on going commitment may include guidance or coaching in order to sustain the positive effect of a change in paradigm. An important feature of the book is a case study written by "Rex," a participant in Dr. Kreuter's earlier work. Rex has achieved significant change in his thought process, both in how he sees the world (less sinister) and

his self-perspective (worthy and connected). An in-depth view of the "new" Rex shows the extent to which change has been possible in one human being. Combined with other evidence of shifting paradigms drawn from a cross-section of therapeutic practice, the authors connect the clinical data with their own developed philosophy on the subject of human behavior and the ability to change with the assistance of a therapist guide to effectuate and sustain such change.

On any given day nearly 3000 foreign national citizens are detained under immigration powers in UK detention centres alone. Around the world immigrants are routinely detained in similar conditions. The institutions charged with immigrant detention are volatile and contested sites. They are also places about which we know very little. What is their goal? How do they operate? How are they justified? *Inside Immigration Detention* lifts the lid on the hidden world of migrant detention, presenting the first national study of life in British immigration removal centres. Offering more than just a description of life behind bars of those men and women awaiting deportation, it uses staff and detainee testimonies to revisit key assumptions about state power and the legacies of colonialism under conditions of globalization. Based on fieldwork conducted in six immigration removal centres (IRCs) between 2009 and 2012, it draws together a large amount of empirical data including: detainee surveys and interviews, staff interviews, observation, and detailed field notes. From this, the book explores how immigration removal centres identify their inhabitants as strangers, constructing them as unfamiliar, ambiguous and uncertain. In this endeavour, the establishments are greatly assisted by their resemblance to prisons and by familiar racialized narratives about foreigners and nationality. However, as staff and detainee testimonies reveal, in their interactions and day-to-day life women and men find many points of commonality. Such recognition of one another reveals the goal and effect of detention to be incomplete. Denial requires effort. In order to minimize the effort it must expend, the state 'governs at distance', via the contract. It also splits itself in two, deploying some immigration staff onsite, while keeping the actual decision-makers (the caseworkers) elsewhere, sequestered from the potentially destabilizing effects of facing up to those whom they

wish to remove. Such distancing, while bureaucratically effective, contributes to the uncertainty of daily life in detention, and is often the source of considerable criticism and unease. Denial and familiarity are embodied and localized activities, whose pains and contradictions inhere in concrete relationships.

Between 1922 and 1996, over 10,000 girls and women were imprisoned in Magdalene Laundries, including those considered 'promiscuous', a burden to their families or the state, those who had been sexually abused or raised in the care of the Church and State, and unmarried mothers. These girls and women were subjected to forced labour as well as psychological and physical maltreatment. Using the Irish State's own report into the Magdalene institutions, as well as testimonies from survivors and independent witnesses, this book gives a detailed account of life behind the high walls of Ireland's Magdalene institutions. The book offers an overview of the social, cultural and political contexts of institutional survivor activism, the Irish State's response culminating in the McAleese Report, and the formation of the Justice for Magdalenes campaign, a volunteer-run survivor

advocacy group. Ireland and the Magdalene Laundries documents the ongoing work carried out by the Justice for Magdalenes group in advancing public knowledge and research into Magdalene Laundries, and how the Irish State continues to evade its responsibilities not just to survivors of the Magdalenes but also in providing a truthful account of what happened. Drawing from a variety of primary sources, this book reveals the fundamental flaws in the state's investigation and how the treatment of the burials, exhumation and cremation of former Magdalene women remains a deeply troubling issue today, emblematic of the system of torture and studious official neglect in which the Magdalene women lived their lives. The Authors are donating all royalties in the name of the women who were held in the Magdalenes to EPIC (Empowering People in Care).
