Designed to help you excel at every stage of your leadership path, this unique and practical text is organized around a nursing and health care leadership trajectory of three core areas — The Strategies, The Personal, and The Environment. The Strategies covers necessary actions that you need to take to become more influential in any environment to move yourself and your people to greater contributions. The Personal relates to the concepts that you must develop and hone to increase your influence. The Environment reinforces how you can exercise the strategies and personal factors in this leadership model through assessing the situations in which you find yourself. Reflection questions in each chapter emphasize the importance of the process being discussed as a strategy for growth and to facilitate active reading. LL Alert! boxes cite examples of actions and statements to avoid. LL Lineup summaries at the end of each chapter help you create an action plan related to the chapter topic. Practical approach features straightforward, concise content that addresses only the most relevant information on the subject of each chapter. The Strategies covers necessary actions that you need to take to become more influential in any environment to move yourself and your people to greater contributions. Realities of Canadian Nursing Lippincott Williams & Wilkins

The community/population health/public health nurse is charged with promoting the health of populations, not only the individuals within populations. This requires advocacy on the part of the nurse, for entire communities as well as for the individuals within. This text has been thoroughly updated with an even stronger population-based nursing approach. This text continues to approach population-based/community health nursing from an aggregate perspective, clearly showing how nurses can serve to improve the health of populations within a community by functioning as advocates on many levels. To illustrate how that can be manifested, real-life vignettes begin every chapter, showing students what advocacy looks like in the public health context. In each chapter, clinical reasoning exercises are woven throughout in boxed features.
