Published to observe the twelfth centenary of the Battle of Roncevaux, the event that inspired the Chanson de Roland, this edition provides the first systematic analysis of the entire poem. Professor Brault's edition also incorporates the considerable scholarly work done in the half century since the Bedier and Jenkins editions appeared. The underlying theme of this new edition is that the poem is a Christian hero. As imagined by the poet Turoldus&—writing about 1100, at the time of the First Crusade&—Roland, the nephew of Charlemagne, had no faults and accomplished mighty deeds in warring against the Saracens. The introduction compares the known historical facts about the Battle of Roncevaux with the Roland legend, with various versions of the poem, and with the Oxford text. Christian thought and sensibility are shown to permeate the Chanson de Roland, in its character portrayal and narrative development, as well as in its tone and diction&—and to provide its thematic unity and metaphorical consistency. Influences of the oral tradition of the chansons de geste are demonstrated, as are evidences of the accompanying gestures used by the jongleurs in interpreting these works. The Commentary organizes discussion of the 4002 verses into 49 units. The method of analysis is eclectic, combining thematic criticism with philology, exegetical interpretation with iconography. The 66 illustrations, primarily from Romanesque works of art, clarify key passages

The present Reader is a selection of texts on South African music which are chosen not only for their importance or the frequency of citations, but with the express purpose of providing the reader with a deep understanding of the music itself. Consequently, there are readings that are chosen because they have been influential, but there are also many which, though published, have not enjoyed very wide circulation. There are those which are of obvious historic interest, and others which speak to contemporary issues. Among other things, the volume provides an excellent sense of the varying ideologies and approaches that determine the relationship between author and subject. The reader is indispensable to scholars and enthusiasts of South African music and it is of great interest to ethnomusicologists more generally. It is also an excellent resource for those who do not have immediate access to harder-to-find articles, and is perhaps most vital to those who are looking to find a way into the world of South African

music.

This book investigates the Mesopotamian roots of two key monotheist characters, Adam and Noah, and their stories, through an exhaustive reading of relevant texts from the ancient literature; it includes original Arabic transliterations, and Arabic and English translations of sections from Akkadian and Sumerian inscriptions, and the Hebrew Genesis. The common, biblical beliefs in an initial, single human creation, and a subsequent survival of a punishing, catastrophic flood were among the key forming pillars of the Near East monotheist religions. The other key pillar was, arguably, the belief in the existence of a one, supreme god and creator. However, neither the two stories of human creation and catastrophic flood, nor the belief in one supreme god, were originally introduced by these monotheist religions. Key inscriptions from ancient Mesopotamia have clearly indicated that various versions of these beliefs were commonplace for thousands of years before. Despite the differences in details, and at times ambiguities, the monotheist faiths seem to have derived their defining themes from one source: early Mesopotamian mythology. Unfortunately, several key inscriptional facts supporting this hypothesis were lost in the current transliterations, translations, and interpretations of the ancient texts.
