Meet the Corleys: Mom and Pop and their three grown kids--Jeff, Ida, and Junior--a zany but lovable

family living in a changing neighborhood in Albuquerque, New Mexico. Mom wants to fix each of her children's problems--Jeff's gambling, Ida's promiscuity, Junior's drinking--and to create a normal family. She convinces Pop to sell the family land and give \$500,000 to each of their children, believing the money will solve their woes. However, hundreds of prairie dogs and the City Council's animal ordinance stop the sale. blowing them up, rounding them up and

trucking them away--but they all fail. Immersed in conflict, humor, and irony, the prairie dogs come up out of their holes and into each of the Corleys' hearts, mysteriously softening their hard edges, helping them to find healing deep in Mother Nature. As disease befalls the prairie dogs, and just as it seems the Corleys will get rich, they discover that it is love, not money that is the true wealth of their family. MARK CONKLING--teacher, homebuilder, realtor, finance manager, retired

Methodist pastor--returns to his writing career with this first novel. Mark lives in Rio Rancho, New Mexico, works with his wife Patricia (Meadowlark Family Healthcare), walks his dog in the Bosque near the Rio Grande, frequents the recovery community (AA), writes fiction, and seeks daily peace of mind. His short fiction was published in the "Minnetonka Review and Diverse Voices Quarterly." Years ago, as a university professor (PhD, philosophy and psychology), Mark

published several academic articles in existential philosophy and psychology, including "Consciousness and the Unconscious in William James' "Principles of Psychology," "Human Inquiries)," "Sartre's Refutation of the Freudian Unconscious," ("Review of Existential Psychology and Psychiatry"), and "Ryle's Mistake About Consciousness" ("Philosophy Today").

Il grande libro delle domande e risposte - Volumi singoli Lerner Publications

Cosa significa essere umani? Noi, animali sostiene che all'origine della nostra psicologia ci sia un profondo conflitto con la nostra natura animale. Oltre a ricostruire la misteriosa evoluzione di questa idea, esamina gli effetti capillari che ha sulle nostre vite, dalla politica ai modi con cui prendiamo le distanze dalle altre specie. In un viaggio che inizia dalle origini dell'Homo sapiens e passa per le rivoluzioni agricola e industriale e per l'era di Internet, fino ad arrivare all'intelligenza

artificiale e alle interfacce uomo-macchina, esamina come la tecnologia influenza il significato che diamo alla nostra natura animale e il rapporto che abbiamo con le altre specie con cui condividiamo questo fragile pianeta. Attingendo a una molteplicità di discipline, Challenger propone l'idea che essere un animale sia un processo bellissimo e imprevedibile, e che abbiamo l'opportunità di scrivere una nuova storia in cui, se noi contiamo, allora conta anche tutto il

resto.

Treatment and Utilization of Flood-damaged Lands

EDIZIONI DEDALO

A program was undertaken to develop zinc phosphide as a replacement for the more hazardous toxicants currently available to control black-tailed prairie dogs (*Cynomys ludovicianus*). Four field trials at 15 black-tailed prairie dog colonies in Montana, Colorado, and Nebraska resulted in consistently high reductions in prairie dog

activity when colonies were prebaited and the bait was applied in surface bait spots at the low rate of 4 g per burrow. Extensive surveys during these trials revealed no primary or secondary hazards to any nontarget species. Experiments to measure zinc phosphide residues in range vegetation demonstrated that baiting, even at a much higher rate than 4 g per burrow, caused virtually no environmental contamination. This series of studies produced a

recommended method for control of black-tailed prairie dogs: prebaiting followed by one surface application, at 4 g per burrow, a bait formulated from steam-rolled oats, 2% zinc phosphide, and 1% corn oil. All evidence from laboratory and field tests indicates that this treatment is effective and safe, and that the risk of its resulting in either primary or secondary intoxication of nontarget vertebrates, including black-footed ferrets, is remote.

This authoritative dictionary has been compiled with the aim of

giving an overview of the English, German, French and Italian names of mammals. The Basic Table contains, in alphabetical order, the scientific names of families, genera, species and sub-species and synonyms with the identified names detailed in all four languages. These are given in the singular for species and sub-species and in the plural for other terms. The synonyms and subspecies are offered in detail. The editor offers numerous alternative spellings of

vernacular names. This dictionary is an outstanding guide for every researcher in mammalogy. *Prairie Dogs* Edizioni Sonda Explore a prairie dog's town, built entirely underground! Prairie dogs create elaborate burrows with a system of connected chambers, tunnels, and entrances. Using communication and teamwork, these social animals cooperate to build their homes, guard their territory, and stay safe from predators. Jaw-

dropping photos, a habitat map, and fascinating information will captivate young readers as they learn about these truly spectacular animal towns. *Prairie Dog's Hideaway* Editoriale Jaca Book Cane della prateria: Immagini incredibili e fatti divertenti per i bambini *Issue Identification for Prairie Dog Management* Alpha Test Sullo sfondo della Seconda Guerra mondiale si intrecciano le sorti di due insoliti personaggi i quali, loro malgrado, intraprendono un

rocambolesco viaggio su un aereo biposto attraverso l'Europa martoriata dal conflitto. Il folle volo, paradossale per gli scopi e assurdo nel programma, li porterà dalla Francia alla Sicilia, attraverso Spagna e Sardegna. Di lì i due proseguiranno a piedi o con mezzi di fortuna alla volta di Milano. Mario e Paco, gli strampalati avventurieri, arriveranno a conoscersi molto bene, ma senza mai comprendersi fino in fondo. Intanto andranno chiarendosi il mistero delle loro identità e lo

strano obiettivo della missione, ma a quel punto saranno proprio loro ad avere perso le convinzioni originarie e ad abbandonarsi fatalmente nelle mani del destino.

Proxmire and the Exodus of Prairieville is a story told through the eyes of prairie dogs. Taking on human characteristics, these remarkable creatures are forced from their home on the Kansas prairie. Under the leadership of one called by the Great Creator,

Proxmire is told to prepare to lead his doomed village to a Promised Land of peace and safety. Feeling inability in his leadership qualities, he is sent an atypical sidekick, a rabbit known as Potrella. As the group crosses into the Sandhills of Nebraska, there are moments of concern not unlike the Jewish people experienced upon entering their desert under the leadership of Moses. Emotions of mystery, terror, heartbreak, anxiety, and

physical pain are balanced with those of joy, happiness, trust, and a growing respect for each other. Having taught at the fifth grade level for many years, I always felt an awareness of the need for literature which would stimulate the young reader into thinking about the importance of placing faith in a Higher Being, as well as raising thought to one's responsibility to live a life of morality and serving others. Prairie dogs seemed to be the perfect animals to form my story around since

they are in actuality high on the list of helpless creatures facing extinction. Therefore my purpose is twofold - - bringing to surface their present day plight as well as fulfilling my other intentions. It is my sincere hope that young and old alike will find a blessing in the reading of this story: that it may fill hearts with hope and souls with contentment, both of which I have personally found in serving the One they call The Great Creator.

In *The Black-Tailed Prairie Dog*, John L. Hoogland draws on sixteen years of research at Wind Cave

National Park, South Dakota, in the United States to provide this account of prairie dog social behavior. Through comparisons with more than 300 other animal species, he offers new insights into basic theory in behavioral ecology and sociobiology. Hoogland documents interactions within and among families of prairie dogs to examine the advantages and disadvantages of coloniality. By addressing such topics as male and female reproductive success, inbreeding, kin

recognition, and infanticide, Hoogland offers a broad view of conflict and cooperation. Among his surprising findings is that prairie dog females sometimes suckle, and at other times kill, the offspring of close kin. Enhanced by more than 100 photographs, this book illuminates the social organization of a burrowing mammal and raises fundamental questions about current theory. As the most detailed long-term study of any social rodent, *The Black-Tailed Prairie Dog*

will interest not only mammalogists and other vertebrate biologists, but also students of behavioral and evolutionary ecology.
