Steve and Susan Zumdahl's texts focus on helping students build critical thinking skills through the process of becoming independent problem-solvers. They help students learn to "think like a chemists" so they can apply the problem solving process to all aspects of their lives. In CHEMISTRY: AN ATOMS FIRST APPROACH, 1e, International Edition the Zumdahls use a meaningful approach that begins with the atom and proceeds through the concept of molecules, structure, and bonding, to more complex materials and their properties. Because this approach differs from what most students have experienced in high school courses, it encourages them to focus on conceptual learning early in the course, rather than relying on memorization and a "plug and chug" method of problem solving that even the best students can fall back on when confronted with familiar material. The atoms first organization provides an opportunity for students to use the tools of critical thinkers: to ask questions, to apply rules and models and to

This book is an in-depth analysis of three of the most crucial years in twentieth-century Italian history, the years 1943-46. After more than two decades of a Fascist regime and a disastrous war

experience during which Italy changed sides, these years saw the laying of the political and cultural foundations for what has since become known as Italy's First Republic. Drawing on texts from the literature, film, journalism, and political debate of the period, *Antifascisms* offers a thorough survey of the personalities and positions that informed the decisions taken in this crucial phase of modern Italian history.

The book provides an in-depth knowledge on how a product is designed and developed by Product Designers. This has been achieved through a case study of one product – the Post Box. This product was chosen for the study primarily due to its simple and non-technical nature as that would make it easy for the readers to comprehend the design process. At the same time the Post Box posed all the challenges a designer would face while creating a new product. Through a step by step process the book gradually takes the reader through the design and development journey – right from understanding the product, identifying the user need through market research, comprehending client's brief, generating product ideas and concepts to development of prototype, manufacturing and final performance of the product. Interestingly, the book also includes how the product had to be modified after its initial launch as a large section of the public failed to identify it as a Post Box! To make the book more stimulating, innovative case studies with interesting facts, figures and pictures on related issues like origin and evolution of Post Boxes in India and abroad are included. They are presented separately in boxes and columns without interrupting the flow of the core subject matter. The narrative and the language is simple and lucid and possibly balanced with a vivid formatting and layout that is easy on the eye.

"Boelts lays out Ruben's ethical dilemma and emotional turmoil without preaching, and his struggle toward the moral choice . . . is both dramatic and genuine." — Publishers Weekly (starred review) Ruben feels like he is the only kid without a bike. His friend Sergio reminds him that his birthday is coming, but Ruben knows his family can't afford that. So when Ruben sees a dollar bill fall out of someone's purse, he picks it up and puts it in his pocket. But when he gets home, he discovers it's not one dollar or even five or ten — it's a hundred-dollar bill, more than enough for a new bike just like Sergio's! Finders keepers, right? Presenting a relatable story with subtlety and heart, the creative team behind *Those Shoes* pairs up again for a story about how hard it can be to do the right thing.
