This books sets out to explain how and why religion came into being. Today this question is as fascinating as ever, especially since religion has moved to the centre of socio-political relationships. In contrast to the current, but incomplete approaches from disciplines such as cognitive science and psychology, the present authors adopt a new approach, equally manifest and constructive, that explains the origins of religion based strictly on behavioural biology. They employ accepted research results that remove all need for speculation. Decisive factors for the earliest demonstrations of religion are thus territorial behaviour and ranking, coping with existential fears, and conflict solution with the help of rituals.

These in turn, in a process of cultural evolution, are shown to be the roots of the historical and contemporary religions.

"In his satirically humorous society novel "Frau Jenny Treibel", which was published in 1892, Fontane unmasked the main characters in their selfish intrigues clearly enough as sentimental, conceited or downright pragmatic. Nevertheless, one can smile with sympathy towards the characters who come to such refreshing conclusions as: "Money is nonsense."-- Goodreads

Up to now, the focus in the field of language documentation has been predominantly on North American and Australian languages. However, the greatest genetic diversity in languages is found in Latin America, home to over 100 distinct language families. This book gives the Latin American context the attention it requires by consolidating the work of field researchers experienced in the region into one volume for the first time.

This text examines the boundary between logic and philosophy in Kant and Hegel. Through a detailed analysis of 'quantity', it highlights the different ways Kant and Hegel handle this boundary. Kant is consistent in maintaining this boundary, but Hegel erases it and in the process transforms both logic and philosophy. First Steps in SAP Fiori University Press of America

Experimental and innovative, Karl Otto Götz had a significant impact on the German Art Informel style from the very beginning. The fact that Götz never works without a clear concept has wide-ranging consequences for his artistic practice. The pictorial composition is always determined, but the execution is rapid, spontaneous, and dynamic. This bilingual catalog published on the occasion of his 100th birthday provides an overview of his epochal artistic oeuvre with a selection of more than 80 works of art.

Scorned by her own kind for her mixed-breed elf status, Julija lives a lonely existence as an outcast among her Ivory elf kin. When a magical book in elfin lore is stolen, she's directed by her King to retrieve the book. Little of the heist goes as planned, and nothing about the vampire is as it appears. Landau is fascinated by the elf stalking him and baffled by the hunger she elicits from him after ten thousand years of celibacy. Discovering she's a pawn in a dangerous game orchestrated by none other than his reviled enemy, he's determined to thwart their plans to pilfer the Book from his control. When truths are revealed, Julija and Landau must decide if what the heart desires is more important than bloodlines. Cambridge IGCSE and O Level Accounting Springer

Logical Inquiries G.P. Putnam's Sons
Leading scholars discuss whether some of the main tenets or theses that are currently or traditionally ascribed to Wittgenstein are still both theoretically and exegetically viable, by focusing on three well-established Wittgensteinian themes: mind, meaning, and metaphilosophy.

Logic is of course a general resource for

reasoning at large. But in the first half of the twentieth century, it developed particularity with a view to mathematical applications, and the field of mathematical logic came into being and flourished. In the second half of the century, much the same happened with regard to philosophical applications. Hence philosophical logic. The deliberations of this book cover a varied but interrelated array of key issues in the field. They address the representation of information in linguistic formulation, and modes of cogent demonstration in logic, mathematics, and empirical investigation, as well as the role of logic in philosophical deliberations. Overall, the book seeks to demonstrate and illustrate the utility of logic as a productive resource for rational inquiry at large.

Wittgenstein: Mind, Meaning and Metaphilosophy

John Wiley & Sons
Julian Wuerth offers a radically new interpretation of Kant's theories of mind, action, and ethics. As the author of a Copernican turn in philosophy, Kant places the mind at the center of his philosophy, and yet his theory of the mind remains an enigma. Wuerth begins with a revolutionary new interpretation of this theory of mind. This new interpretation considers a far wider range of Kant's recorded thought from across his philosophical corpus than previous interpretations and advances in tandem with an interpretation of the foundations of Kant's transcendental idealism and his metaphysics of substance. Against traditional empiricist approaches, Wuerth demonstrates that Kant argues that we are conscious of our own noumenal substantiality and simplicity. But against rational psychologists, Kant draws on the teachings of his transcendental idealism to strip the conclusions of our noumenal substantiality and simplicity of their "usefulness." In the Paralogisms and elsewhere, Kant thus argues that we are not licensed to conclude our substantiality and simplicity in a sense that entails our permanence, our incorruptibility, or our immortality. Wuerth goes on to undertake a ground-breaking study of Kant's notoriously vast, complex, and opaque account of the mind's powers, and argues that Kant structures his system of philosophy on this system of the mind's powers. He next confronts the persisting stumbling block of interpretations of Kant's ethics--Kant's theory of action--and shows that Kant rejects intellectualist theories of action that reduce practical agents to pure reason. He argues that Kant's practical agent is shown to exercise a power of choice, or Willkur, subject to two

irreducible conative currencies: moral motives and sensible incentives. While our intellectual nature provides us with insight into morality and in turn with moral motives, our sensible nature provides us with distinct-in-kind sensible incentives. Immoral choices at odds with the former can thus nonetheless be coherent choices in harmony with the latter. Finally, Wuerth applies these new findings about Kant's theory of mind and action to an analysis of the foundations of Kant's ethics. He rejects the dominant constructivist interpretation in favor of a moral realist one. At the heart of Kant's Enlightenment ethics is his insistence that the authority of a moral law rests in our recognition of its truth, not in an alleged commitment unfettered by truth. Kant guides us to clarity regarding the moral law, across his writings and across his various formulations of the moral law, using a single elimination of sensibility process that rejects the pretences of sensibility to isolate reason and its insights into moral right and wrong. Because moral authority issues from the cognition of pure practical reason and because sensibility can present coherent alternatives to moral choice, moral virtue requires more than mere clarity in cognition. Kant instead recognizes the centrality to moral living of the ongoing cultivation of our capacities more broadly, including our capacities for cognition, feeling, desire, and character.

A COMPANION TO GLOBAL HISTORICAL THOUGHT A Companion to Global Historical Thought provides an overview of the development of historical thinking from the earliest times to the present, directly addressing issues of historiography in a globalized context. Questions concerning the global dissemination of historical writing and the relationship between historiography and other ways of representing the past have become important not only in the academic study of history, but also in public arenas in many countries. With contributions from leading international scholars, the book considers the problem of "the global" - in the multiplicity of traditions of narrating the past; in the global dissemination of modern historical writing; and of "the global" as a concept animating historical imaginations. It explores the different intellectual approaches that have shaped the discipline of history, and the challenges posed by modernity and globalization, while illustrating the shifts in thinking about time and the emergence of historical thought. Complementing A

Companion to Western Historical Thought, this book places non-Western perspectives on historiography at the center of discussion, helping scholars and students alike make sense of the discipline at the start of the twenty-first century.

The book is aimed at providing the newcomer to Kata as well as the Kata club instructor with up-to-date lessons that can be used immediately on the mat without any other preparation. Nage-no-Kata - the forms of throwing - deals with throwing techniques used in Judo. The Kata are divided into five groups and each of these

has three throwing techniques to carry out on both sides of the body. An introduction covers general matters such as the layout of the mat, body posture, movement, grip and many other features. The next section includes the descriptions of the throws as well as the transition to the next follow-up throw. Numerous photos clearly describe each of the throws as sequences of movement on four consecutive pages. The important points of each throw are highlighted using circles to clarify each point. Starting with the greeting and ending with the final bow, all the picture sequences depict a practically unbroken chain of movements for the Nage-no-Kata. Despite the guidelines for each Kata, their

execution is a personal expression of the performer. Thus, the details in this book reflect the influence of the two authors and these signatures are characteristic of the experienced Judo instructors and Kata experts that have advised them and accompanied them over the past years.
