Coal Age's New Handbook of Surface Mining John Wiley & Sons

Covering New York, American & regional stock exchanges & international companies.

Thomas Register of American Manufacturers

THE GRIT AND GLORY OF RESTAURANT LIFE, AS TOLD BY A SURVIVOR OF KITCHENS ACROSS AMERICA *Cooking Dirty* is a rollicking account of life "on the line" in the restaurants, far from culinary school, cable TV, and the Michelin Guide—where most of us eat out most of the time. It takes the kitchen memoir to a rough and reckless place. From his first job scraping trays at a pizzeria at age fifteen, Jason Sheehan worked on the line at all kinds of restaurants: a French colonial and an all-night diner, a crab shack just off the interstate and a fusion restaurant in a former hair salon. Restaurant work, as he describes it in exuberant, sparkling prose, is a way of life in which "your whole universe becomes a small, hot steel box filled with knives and meat and fire." The kitchen crew is a fraternity with its own rites: cigarettes in the walk-in freezer, sex in the basement, the wartime urgency of the dinner rush. Cooking is a series of personal challenges, from the first perfectly done mussel to the satisfaction of surgically sliced foie gras. And the kitchen itself, as he tells it, is a place in which life's mysteries are thawed, sliced, broiled, barbecued, and fried—a place where people from the margins find their community and their calling. With this deeply affecting book, Sheehan (already acclaimed for his reviews) joins

the first class of American food writers at a time when books about food have never been better or more popular.

Library as Safe Haven

This text shows the reader how to plan and develop a restaurant or foodservice space. Topics covered include concept design, equipment identification and procurement, design principles, space allocation, electricity and energy management, environmental concerns, safety and sanitation, and considerations for purchasing small equipment, tableware, and table linens. This book is comprehensive in nature and focuses on the whole facility—with more attention to the equipment—rather than emphasizing either front of the house or back of the house.
