*It Was All a Dream* Thomas Nelson  
Let's paint a big rainbow to put on

display. When people pass by it and see it, they'll say ... 'All rainstorms must end, and this rainstorm will too.' And they'll feel a bit happier, all thanks to you. Light can't shine without dark. Rainbows can't colour the sky without rain. And the world is always full of hope and possibility, even when we feel lost and alone. Inspired by the rainbows that children across the world have been creating and displaying in their windows, *The World Made a Rainbow* is a beautiful story with a hopeful message of staying connected to the people we love, and a proportion of proceeds will be donated to a leading children's charity. Bestselling author Michelle Robinson was desperate to find a way to help small children navigate their way through the complex emotions caused by the 2020 lockdown.

She has written a story that matters now, but will last for ever. With charming illustrations from new talent Emily Hamilton, *The World Made a Rainbow* will reassure, uplift and is the perfect reminder of fun, hope and togetherness. This audio-enabled edition comes with a gorgeous reading by Sarah Ovens, along with music and sound effects.

*World Made by Hand* Penguin

In the wake of a series of global catastrophes that have destroyed industrial civilization, the inhabitants of Union Grove, a small New York town, do anything they can to get by, as they struggle to deal with a new way of life over the course of an eventful summer, in a novel set several decades in the future. By the author of *The Long Emergency*. Reprint.

### **The World Needs Who You Were Made to Be** MIT Press

A celebration of the richness of figurative painting over the last 100 years and a passionate critique of the accepted history of art in the 20th century.

Figurative painting is due a reappraisal. In this passionately argued volume the distinguished writer and artist Timothy Hyman cuts a new path through the tangle of twentieth-century art. *The World New Made* explores the work of more than fifty individual painters, presenting a collective 'Resistance' who together offer a human-centred alternative to the dominance of the Abstract or the Conceptual in conventional narratives of modern art. Structured not as a survey but as in-depth studies of more than 130 specific

artworks, this lavishly illustrated book brings these often marginalized artists centre-stage: not just Alice Neel and Balthus, Max Beckmann and Frida Kahlo, but also Marsden Hartley and Charlotte Salomon, Bhupen Khakhar and Jacob Lawrence. A rich cast is brought to life, partly through their own writings. As the author argues, 'All across the world, isolated artists found new idioms for human-centred painting in the midst of modern life.'

### *A History of the Future* Houghton Mifflin Harcourt

How memetic media—aggregate texts that are collectively created, circulated, and transformed—become a part of public conversations that shape broader cultural debates. Internet memes—digital snippets that can make

a joke, make a point, or make a connection—are now a lingua franca of online life. They are collectively created, circulated, and transformed by countless users across vast networks. Most of us have seen the cat playing the piano, Kanye interrupting, Kanye interrupting the cat playing the piano. In *The World Made Meme*, Ryan Milner argues that memes, and the memetic process, are shaping public conversation. It's hard to imagine a major pop cultural or political moment that doesn't generate a constellation of memetic texts. Memetic media, Milner writes, offer participation by reappropriation, balancing the familiar and the foreign as new iterations intertwine with established ideas. New commentary is crafted by the mediated circulation and transformation of old

ideas. Through memetic media, small strands weave together big conversations. Milner considers the formal and social dimensions of memetic media, and outlines five basic logics that structure them: multimodality, reappropriation, resonance, collectivism, and spread. He examines how memetic media both empower and exclude during public conversations, exploring the potential for public voice despite everyday antagonisms. Milner argues that memetic media enable the participation of many voices even in the midst of persistent inequality. This new kind of participatory conversation, he contends, complicates the traditional culture industries. When age-old gatekeepers intertwine with new ways of sharing information, the relationship

between collective participation and individual expression becomes ambivalent. For better or worse—and Milner offers examples of both—memetic media have changed the nature of public conversations.

**Law** National Geographic Books

Illuminated by interviews with more than fifty people, including the late Joseph Mitchell, William Steig, Roger Angell, Calvin Trillin, Pauline Kael, John Updike, and Ann Beattie, *About Town* penetrates the inner workings of the New Yorker as no other book has done."--BOOK JACKET.

*The Book that Made Your World*

Convergent Books

In the recent past, enormous creative energy has gone into the study of American slavery, with major

explorations of the extent to which African culture affected the culture of black Americans and with an almost totally new assessment of slave culture as Afro-American. Accompanying this new awareness of the African values brought into America, however, is an automatic assumption that white traditions influenced black ones. In this view, although the institution of slavery is seen as important, blacks are not generally treated as actors nor is their "divergent culture" seen as having had a wide-ranging effect on whites. Historians working in this area generally assume two social systems in America, one black and one white, and cultural divergence between slaves and masters. It is the thesis of this book that blacks, Africans, and Afro-Americans, deeply influenced

white's perceptions, values, and identity, and that although two world views existed, there was a deep symbiotic relatedness that must be explored if we are to understand either or both of them. This exploration raises many questions and suggests many possibilities and probabilities, but it also establishes how thoroughly whites and blacks intermixed within the system of slavery and how extensive was the resulting cultural interaction.

*The Late Great Planet Earth* Angelico Press

Named a Best Book of the Year by NPR and LitHub Winner of the 2021 Science in Society Journalism Book Prize A fascinating and provocative new way of looking at the things we use and the spaces we inhabit, and a call to imagine

a better-designed world for us all. Furniture and tools, kitchens and campuses and city streets—nearly everything human beings make and use is assistive technology, meant to bridge the gap between body and world. Yet unless, or until, a misfit between our own body and the world is acute enough to be understood as disability, we may never stop to consider—or reconsider—the hidden assumptions on which our everyday environment is built. In a series of vivid stories drawn from the lived experience of disability and the ideas and innovations that have emerged from it—from cyborg arms to customizable cardboard chairs to deaf architecture—Sara Hendren invites us to rethink the things and settings we live with. What might assistance based on

the body's stunning capacity for adaptation—rather than a rigid insistence on “normalcy”—look like? Can we foster interdependent, not just independent, living? How do we creatively engineer public spaces that allow us all to navigate our common terrain? By rendering familiar objects and environments newly strange and wondrous, *What Can a Body Do?* helps us imagine a future that will better meet the extraordinary range of our collective needs and desires.

**The World Made New** Convergent Books

A groundbreaking history of how the Black Death unleashed revolutionary change across the medieval world and ushered in the modern age In 1346, a catastrophic plague beset Europe and its

neighbours. The Black Death was a human tragedy that abruptly halved entire populations and caused untold suffering, but it also brought about a cultural and economic renewal on a scale never before witnessed. *The World the Plague Made* is a panoramic history of how the bubonic plague revolutionized labour, trade, and technology and set the stage for Europe's global expansion. James Belich takes readers across centuries and continents to shed new light on one of history's greatest paradoxes. Why did Europe's dramatic rise begin in the wake of the Black Death? Belich shows how plague doubled the per capita endowment of everything even as it decimated the population. Many more people had disposable incomes. Demand grew for

silks, sugar, spices, furs, gold, and slaves. Europe expanded to satisfy that demand—and plague provided the means. Labour scarcity drove more use of waterpower, wind power, and gunpowder. Technologies like water-powered blast furnaces, heavily gunned galleons, and musketry were fast-tracked by plague. A new “crew culture” of “disposable males” emerged to man the guns and galleons. Setting the rise of Western Europe in global context, Belich demonstrates how the mighty empires of the Middle East and Russia also flourished after the plague, and how European expansion was deeply entangled with the Chinese and other peoples throughout the world. *The Shape of the New* Penguin Press HC  
 Humanity hangs on after the fall of

civilization in this “wily, funny, rip-roaring, and profoundly provocative page-turner” (Booklist, starred review). After the collapse of the old world—the pandemics, the environmental disasters, the end of oil, the ensuing chaos—people are pursuing a simpler and sometimes happier existence. In Union Grove, New York, the townspeople are preparing for Christmas . . . the perfect time for a long-lost member of the community to return. Robert Earle’s son, Daniel, has come home after two years exploring what is left of the United States. He brings news of three new nations arisen from what was once America—and the dangers and possibilities they may hold. Meanwhile, a horrific murder threatens to turn the community of Union Grove against

itself—and what is supposed to be a time of peace and togetherness is overtaken by suspicion and fear. In this vividly depicted look at a world that may be on our own horizon, “Kunstler skewers everything from kitsch to greed, prejudice, bloodshed, and brainwashing” in a gripping story of hope, hate, and humanity’s last chance at survival (Booklist).

**Stuff** Bloomsbury Publishing USA

An analysis of the pivotal role of technology in modern warfare focuses on four historical periods that shaped the rise and fall of empires, in a narrative account that covers such topics as gunpowder, the Industrial Revolution, and stealth aircraft. First serial, American Heritage.

*War Made New* Random House

Provides twenty-two step-by-step projects to help readers learn about the explorers that discovered America and their voyages.

**I'm Still Here** Candlewick Press

FINALIST FOR THE ROBERT F. KENNEDY BOOK AWARD • “An important,

potentially galvanizing book, and in this frightful, ferocious time, marked by war and agony, it is urgent

reading.”—Blanche Wiesen Cook, Los

Angeles Times Unafraid to speak her

mind and famously tenacious in her

convictions, Eleanor Roosevelt was still

mourning the death of FDR when she

was asked by President Truman to lead a

controversial commission, under the

auspices of the newly formed United

Nations, to forge the world’s first

international bill of rights. A World Made

New is the dramatic and inspiring story of the remarkable group of men and women from around the world who participated in this historic achievement and gave us the founding document of the modern human rights movement. Spurred on by the horrors of the Second World War and working against the clock in the brief window of hope between the armistice and the Cold War, they grappled together to articulate a new vision of the rights that every man and woman in every country around the world should share, regardless of their culture or religion. A landmark work of narrative history based in part on diaries and letters to which Mary Ann Glendon, an award-winning professor of law at Harvard University, was given exclusive access, *A World Made New* is the first

book devoted to this crucial turning point in Eleanor Roosevelt's life, and in world history.

**The Wise Men** Harvard University Press  
 NEW YORK TIMES BESTSELLER •  
 REESE'S BOOK CLUB PICK • From a leading voice on racial justice, an eye-opening account of growing up Black, Christian, and female that exposes how white America's love affair with "diversity" so often falls short of its ideals. "Austin Channing Brown introduces herself as a master memoirist. This book will break open hearts and minds."—Glennon Doyle, #1 New York Times bestselling author of *Untamed* Austin Channing Brown's first encounter with a racialized America came at age seven, when she discovered her parents named her Austin to deceive

future employers into thinking she was a white man. Growing up in majority-white schools and churches, Austin writes, “I had to learn what it means to love blackness,” a journey that led to a lifetime spent navigating America’s racial divide as a writer, speaker, and expert helping organizations practice genuine inclusion. In a time when nearly every institution (schools, churches, universities, businesses) claims to value diversity in its mission statement, Austin writes in breathtaking detail about her journey to self-worth and the pitfalls that kill our attempts at racial justice. Her stories bear witness to the complexity of America’s social fabric—from Black Cleveland neighborhoods to private schools in the middle-class suburbs, from prison walls to the boardrooms at

majority-white organizations. For readers who have engaged with America’s legacy on race through the writing of Ta-Nehisi Coates and Michael Eric Dyson, *I’m Still Here* is an illuminating look at how white, middle-class, Evangelicalism has participated in an era of rising racial hostility, inviting the reader to confront apathy, recognize God’s ongoing work in the world, and discover how blackness—if we let it—can save us all. *A World Made New* HarperCollins

How four revolutionary ideas from the Enlightenment shaped today's world This panoramic book tells the story of how revolutionary ideas from the Enlightenment about freedom, equality, evolution, and democracy have reverberated through modern history and shaped the world as we know it

today. A testament to the enduring power of ideas, *The Shape of the New* offers unforgettable portraits of Adam Smith, Thomas Jefferson, Alexander Hamilton, Charles Darwin, and Karl Marx—heirs of the Enlightenment who embodied its highest ideals about progress—and shows how their thoughts, over time and in the hands of their followers and opponents, transformed the very nature of our beliefs, institutions, economies, and politics. Yet these ideas also hold contradictions. They have been used in the service of brutal systems such as slavery and colonialism, been appropriated and twisted by monsters like Stalin and Hitler, and provoked reactions against the Enlightenment's legacy by Islamic Salafists and the

Christian Religious Right. *The Shape of the New* argues that it is impossible to understand the ideological and political conflicts of our own time without familiarizing ourselves with the history and internal tensions of these world-changing ideas. With passion and conviction, it exhorts us to recognize the central importance of these ideas as historical forces and pillars of the Western humanistic tradition. It makes the case that to read the works of the great thinkers is to gain invaluable insights into the ideas that have shaped how we think and what we believe.

[About Town](#) Phaidon Press

What makes the modern world work? The answer to this deceptively simple question lies in four "grand transitions" of civilization--in populations,

agriculture, energy, and economics-- which have transformed the way we live. Societies that have undergone all four transitions emerge into an era of radically different population dynamics, food surpluses (and waste), abundant energy use, and expanding economic opportunities. Simultaneously, in other parts of the world, hundreds of millions remain largely untouched by these developments. Through erudite storytelling, Vaclav Smil investigates the fascinating and complex interactions of these transitions. He argues that the moral imperative to share modernity's benefits has become more acute with increasing economic inequality, but addressing this imbalance would make it exceedingly difficult to implement the changes necessary for the long-term

preservation of the environment. Thus, managing the fifth transition-- environmental changes from natural-resource depletion, biodiversity loss, and global warming--will determine the success or eventual failure of the grand transitions that have made the world we live in today.

The World Made Straight Grove/Atlantic, Inc.

From the author of the bestselling children's book *When God Made You* comes a rhythmic, whimsical journey through creation--for little readers who love science and wonder and the beginnings of all things. For spiritual parents who are looking for a different kind of creation book, Matthew Paul Turner's *When God Made the World* focuses on the complex way that God

created our vast and scientifically operating universe, including the biodiversity of life on our planet and the intricacies of a vast solar system.

Scottish illustrator Gillian Gamble brings the natural world to vibrant life with rich colors and poignant detail certain to stretch young minds and engage imaginations. Planet Earth, God made a blue and green sphere, And designed it to orbit the sun once a year. God made daytime and nighttime, climates and seasons, And all kinds of weather that vary by region. God made continents and oceans, islands and seas, A north and south pole that God put in deep freeze. God carved rivers and brooks, mountains and caves, Made beaches with sand and huge crashing waves. God made tropics and plateaus, glaciers and

meadows, marshes and tundras and erupting volcanos.

From a talented young journalist on the rise, a deeply reported, timely new biography of the Notorious B.I.G., publishing for what would have been his 50th birthday The Notorious B.I.G. was one of the most charismatic and talented artists of the 1990s. Born Christopher Wallace and raised in Clinton Hill/Bed Stuy, Brooklyn, Biggie lived an almost archetypal rap life: young trouble, drug dealing, guns, prison, a giant hit record, the wealth and international superstardom that came with it, then an early violent death. Biggie released his first record, Ready to Die, in 1994, when he was only 22. Less than three years later, he was killed just days before the planned release of his second record Life After Death. Journalist Justin Tinsley's It

Was All a Dream is a fresh, insightful telling of the life beyond the legend. It is based on extensive interviews with those who knew and loved Biggie, including neighbors, friends, DJs, party promoters, and journalists. And it places Biggie's life in context, both within the history of rap but also the wider cultural and political forces that shaped him, including Caribbean immigration, the Reagan era disinvestment in public education, street life, the war on drugs, mass incarceration, and the booming, creative, and influential 1990s music industry. This is the story of where Biggie came from, the forces that shaped him, and the legacy he has left behind.

*Gotcha Good!* Build It Yourself  
A captivating blend of personal

biography and public drama, *The Wise Men* introduces the original best and brightest, leaders whose outsized personalities and actions brought order to postwar chaos: Averell Harriman, the freewheeling diplomat and Roosevelt's special envoy to Churchill and Stalin; Dean Acheson, the secretary of state who was more responsible for the Truman Doctrine than Truman and for the Marshall Plan than General Marshall;

George Kennan, self-cast outsider and intellectual darling of the Washington elite; Robert Lovett, assistant secretary of war, undersecretary of state, and secretary of defense throughout the formative years of the Cold War; John McCloy, one of the nation's most influential private citizens; and Charles Bohlen, adroit diplomat and ambassador to the Soviet Union.
