This book provides a comprehensive account of judicial review in EU law by assessing the vast and complex case-law of the European Court of

Justice (ECJ) in this area and the academic opinion which has accompanied its rulings over the years. It questions the prevalent view in academic literature that the Court's restrictive approach to allowing individuals direct access to the Community Courts, in case of a challenge against normative acts, amounts to a denial of an effective remedy. The author argues that the emerging constitutional nature of the European Union and its federal structure requires a more balanced view. While it will improve direct access for individuals to the Union's judiciary, the Lisbon Treaty will not radically alter the system of judicial review in the European

Union. Judicial Review in EU Law will be of great interest to academics, and given its detailed discussion of case-law of the ECJ it will also appeal to postgraduate students of European law. Dealing with an important aspect of legal practice, it will be invaluable reading for practitioners in law firms and officials working in local, regional and central government.
