The Department of  
Defense Law of War  
Manual belongs on the  
shelf of every  
researcher, journalist,  
lawyer, historian, and  
individual interested in  
foreign affairs,  
international law,  
human rights, or  
national security. The  
Manual provides a  
comprehensive,  
authoritative  
interpretation of the  
law of war for the U.S.  
Department of  
Defense.

The conscious

experience of the  
bodily self is a  
cornerstone of human  
nature, which allows us  
to delineate the  
boundaries between  
the surrounding  
environment and us. A  
plethora of clinical and  
experimental  
investigations has  
clearly demonstrated  
that bodily self-  
consciousness draws  
on different neuro-  
cognitive mechanisms  
with distinct anatomo-  
functional  
underpinnings. Among  
these, the sense of  
body ownership (i.e.,  
my body belongs to  
me), and the sense of  
agency (i.e., I am the  
author of my actions)  
have attracted  
increasing interest in  
recent years. The  
former seems to be  
strongly rooted in  
afferent sensory  
signals, whereas the

latter appears to be rooted in efferent motor signals and/or the monitoring of their sensory consequences. Despite the consensus that the interplay between body ownership and the sense of agency contribute to the omnipresent conscious experience of the bodily self, the character and the form of this relationship remain unclear. Though research into the mechanisms underlying ownership (e.g., bodily illusions) or on agency (e.g., intentional binding) is blooming, very few studies have aimed to investigate both these processes at the same time. Therefore, many questions remain unresolved: for example, how do the experiences of

ownership and agency influence each other? What are the anatomo-functional substrates of their interplay, and how does damage to these structures affect the experience of either ownership or agency (or both) in clinical populations? What is the specific role of efferent and afferent signals, and how may these be complimented by other inputs like emotional or interoceptive cues? And going beyond the mechanisms and anatomo-functional substrates, are there rational relations between the representations underlying body ownership and agency so that ownership can be seen as a condition on intentional action and a sense of agency? Elucidating

the complex relationship between ownership and agency is a crucial step in our understanding of bodily self-consciousness, and may help us to better understand the variety of neurological/psychiatric disorders affecting the perception of one's own body and its movements. These insights can contribute to the development of future prosthetic devices or virtual-reality applications, which may in turn allow for new approaches in neuroscience, rehabilitative medicine, and therapeutic interventions.

Crises in Authoritarian Regimes Yearbook of International Orga  
Dr. Greg Zacharias, former Chief Scientist

of the United States Air Force (2015-18), explores next steps in autonomous systems (AS) development, fielding, and training. Rapid advances in AS development and artificial intelligence (AI) research will change how we think about machines, whether they are individual vehicle platforms or networked enterprises. The payoff will be considerable, affording the US military significant protection for aviators, greater effectiveness in employment, and unlimited opportunities for novel and disruptive concepts of operations.

Autonomous Horizons: The Way Forward identifies issues and makes recommendations for the Air Force to take

full advantage of this transformational technology.

*Mastering the Gray Zone* BASLER AFRIKA BIBLIOGRAPHIEN  
 Krisen offenbaren die Fragilität der Ordnung und fordern die Macht heraus. Wie gehen autoritäre Regime mit ihnen um? Welche Stärken und Schwächen zeigen sie in der Krisenbewältigung, verglichen mit demokratischen Ordnungen? Wie lässt sich ihre Anpassungsfähigkeit und Persistenz erklären? Die Beiträge dieses Bandes verbinden die Sichtweisen von Politikwissenschaft, Geschichte, Literaturwissenschaft, Soziologie und Regionalwissenschaften auf gegenwärtige

und untergegangene Regime in Afrika, Ost- und Zentralasien, Ost- und Westeuropa und Lateinamerika. Die Fallstudien beleuchten die Verdichtung autoritärer Herrschaft in der Krise, die meist zwei konträre Ziele verfolgt: die Stabilität zu erhalten und die eigene Herrschaft zu erneuern.

Does the identification number 60 indicate a toxic substance or a flammable solid, in the molten state at an elevated temperature?  
 Does the identification number 1035 indicate ethane or butane?  
 What is the difference between natural gas transmission pipelines and natural gas distribution pipelines?  
 If you came upon an overturned truck on

the highway that was leaking, would you be able to identify if it was hazardous and know what steps to take? Questions like these and more are answered in the Emergency Response Guidebook. Learn how to identify symbols for and vehicles carrying toxic, flammable, explosive, radioactive, or otherwise harmful substances and how to respond once an incident involving those substances has been identified. Always be prepared in situations that are unfamiliar and dangerous and know how to rectify them. Keeping this guide around at all times will ensure that, if you were to come upon a transportation situation involving hazardous substances or

dangerous goods, you will be able to help keep others and yourself out of danger. With color-coded pages for quick and easy reference, this is the official manual used by first responders in the United States and Canada for transportation incidents involving dangerous goods or hazardous materials. Serving Those Who Served Independently Published

The purpose of this manual is to provide clear and helpful information for maintaining gravel roads. Very little technical help is available to small agencies that are responsible for managing these roads. Gravel road maintenance has traditionally been

"more of an art than a science" and very few formal standards exist. This manual contains guidelines to help answer the questions that arise concerning gravel road maintenance such as: What is enough surface crown? What is too much? What causes corrugation? The information is as nontechnical as possible without sacrificing clear guidelines and instructions on how to do the job right. *ICMLG 2017 5th International Conference on Management Leadership and Governance* Simon and Schuster Volume 1 (A and B) covers international organizations throughout the world, comprising their aims,

activities and events. Department of Defense Law of War Manual Mwanaka Media and Publishing Pvt Ltd Estimates indicate that as many as 1 in 4 Americans will experience a mental health problem or will misuse alcohol or drugs in their lifetimes. These disorders are among the most highly stigmatized health conditions in the United States, and they remain barriers to full participation in society in areas as basic as education, housing, and employment. Improving the lives of people with mental health and substance abuse disorders has been a priority in the United States for more than 50 years. The Community Mental Health Act of 1963 is considered a major

turning point in America's efforts to improve behavioral healthcare. It ushered in an era of optimism and hope and laid the groundwork for the consumer movement and new models of recovery. The consumer movement gave voice to people with mental and substance use disorders and brought their perspectives and experience into national discussions about mental health. However over the same 50-year period, positive change in American public attitudes and beliefs about mental and substance use disorders has lagged behind these advances. Stigma is a complex social phenomenon based on a relationship between

an attribute and a stereotype that assigns undesirable labels, qualities, and behaviors to a person with that attribute. Labeled individuals are then socially devalued, which leads to inequality and discrimination. This report contributes to national efforts to understand and change attitudes, beliefs and behaviors that can lead to stigma and discrimination. Changing stigma in a lasting way will require coordinated efforts, which are based on the best possible evidence, supported at the national level with multiyear funding, and planned and implemented by an effective coalition of representative stakeholders. Ending Discrimination Against

People with Mental and Substance Use Disorders: The Evidence for Stigma Change explores stigma and discrimination faced by individuals with mental or substance use disorders and recommends effective strategies for reducing stigma and encouraging people to seek treatment and other supportive services. It offers a set of conclusions and recommendations about successful stigma change strategies and the research needed to inform and evaluate these efforts in the United States.

**Boer War** Bloomsbury Publishing USA  
In 1950, when he commissioned the first edition of *The Armed Forces Officer*,

Secretary of Defense George C. Marshall told its author, S.L.A. Marshall, that "American military officers, of whatever service, should share common ground ethically and morally." In this new edition, the authors methodically explore that common ground, reflecting on the basics of the Profession of Arms, and the officer's special place and distinctive obligations within that profession and especially to the Constitution.

of Lieutenant Malcolm Riall. A signals officer with the West Yorkshires, Riall was just 20 years old when he embarked for active service in 1899.

Colonial Soldiers in Europe, 1914-1945

Campus Verlag

A RAND study analyzed Chinese and U.S. military capabilities in two scenarios (Taiwan and the Spratly Islands) from 1996 to 2017, finding that trends in most, but not all, areas run strongly against the United States. While U.S. aggregate power remains greater than China's, distance and geography affect outcomes. China is capable of challenging U.S. military dominance on its immediate periphery—and its reach is likely to grow

in the years ahead.

Oklahoma's Poor Rich Indians Emerald Group Publishing

Critical Discourse Studies (CDS) aims to enhance our understanding of how discourse figures in social processes, social structures, and social change. This book is in response to specific changes in mediation technologies of discourse, brought about by the significant concentration of discursive practices within the paradigm of social media communication. This book addresses this participatory media context against a broadly defined tradition in CDS, its aspirations, assumptions, and critique. It views discourse as forms of structured

representations across a range of modalities of communication including the emerging meaning-making artefacts and practices across social media. It aspires to provide an overview of the key considerations in doing CDS on social media spaces. The book firstly provides a set of aspiration signposting the parameters of doing social media CDS followed by critical explorations of a number of contemporary case studies of digital discourses around identity, politics and representation. It includes various social media communication including YouTube, Instagram, Wikipedia, and Twitter. The book will be of interest to researchers and advanced students of

linguistics, politics, sociology, communication studies, media and cultural studies, and science and technology studies. It was originally published as a special issue of the journal *Critical Discourse Studies*. *Military Intelligence Professional Bulletin* Jeffrey Frank Jones Practical advice on how best to serve veterans, service members, and their families in your community, including effective ways to develop new outreach partnerships and collaborations. Whether you work in a public library, an academic library, a school library, or any other type of library, you are likely to encounter members of the veteran and military communities.

This book is a starting point to help librarians, library administrators, and all library employees understand how veterans, service members, and their families can be different from other patrons, recognize important elements of military and veteran culture, and identify strategies for effectively serving the veteran and military communities. In this book, you find tips to help you determine the size and the needs of the veteran and military communities in your local area. You'll learn about some common information requests and information-seeking behavior of veterans and service members. You'll discover how to take the needs and also the unique

strengths of the veteran and military communities into account when developing library outreach efforts, programs, services, and collections. And you'll gain insights to help you harness the knowledge, strengths, and experiences of the veteran and military communities in order to help them fulfill their potential as an asset to the library and to the community.

Mobile Networks and Management

Government Printing Office

This book constitutes the refereed post-conference proceedings of the 9th International Conference on Mobile Networks and Management, MONAMI 2017, held in Melbourne, Australia,

in December 2017. The 30 revised full papers were carefully reviewed and selected from 43 submissions. The papers handle topics in the area of mobile computing, wireless networking and management.

Springer

The Military Balance has been published annually since 1959. The 2023 edition provides an open-source assessment of the armed forces and equipment inventories of 173 countries, with accompanying defence economics data. Alongside detailed country data, The Military Balance assesses important military issues, region-by-region, and includes graphics to illustrate these as well as noteworthy equipment

developments. Maps this year include a focus on Russia's full-scale invasion of Ukraine and select China-Russia military cooperation activities. The book draws on the range of data carried in the Military Balance+ online database, particularly the procurement features in each regional section. The accompanying wallchart explores the military use of outer space, an increasingly important element of defence capabilities, focusing on China, Russia and the United States. For those involved in defence and security policymaking, analysis and research, The Military Balance is an indispensable source. The Russian Way of War Frontiers Media SA

The main theme of this volume of the Yearbook of International Humanitarian Law is the development and interpretation of international humanitarian law (IHL). It is elaborated upon in several chapters that examine the role of non-state armed groups in the development and interpretation of IHL, the impact of international criminal law on the development of IHL, the notion of external non-international armed conflicts, and the regulation of prolonged occupation under international law. The second theme of this volume is dedicated to targeting in armed conflicts. Specific topics include precautions in attack in urban and

siege warfare, the targeting of the Islamic State's religious personnel in Iraq and Syria, and the targeting of illicit crop through aerial spraying in Colombia. Besides the chapters that address both themes, this volume also contains a Year in Review describing the most important events and legal developments that took place in 2017. The Yearbook of International Humanitarian Law is the world's only annual publication devoted to the study of the laws governing armed conflict. It provides a truly international forum for high-quality, peer-reviewed academic articles focusing on this crucial branch of international law. Distinguished by

contemporary relevance, the Yearbook of International Humanitarian Law bridges the gap between theory and practice and serves as a useful reference tool for scholars, practitioners, military personnel, civil servants, diplomats, human rights workers and students.

*South African Law Reports* Routledge

The U.S. military has been continuously engaged in foreign conflicts for over two decades. The strains that these deployments, the associated increases in operational tempo, and the general challenges of military life affect not only service members but also the people who depend on

them and who support them as they support the nation — their families. Family members provide support to service members while they serve or when they have difficulties; family problems can interfere with the ability of service members to deploy or remain in theater; and family members are central influences on whether members continue to serve. In addition, rising family diversity and complexity will likely increase the difficulty of creating military policies, programs and practices that adequately support families in the performance of military duties. Strengthening the Military Family Readiness System for a Changing American

Society examines the challenges and opportunities facing military families and what is known about effective strategies for supporting and protecting military children and families, as well as lessons to be learned from these experiences. This report offers recommendations regarding what is needed to strengthen the support system for military families.

This book explores how social and territorial boundaries have influenced the approaches and practices of the South Africa Police Service (SAPS). By means of a historical analysis of South Africa, this book introduces a new concept, 'police

frontierism', which illuminates the nature of the relationships between the police, policing and boundaries, and can potentially be used for future case study research. Drawing on a wealth of research, this book examines how social and territorial boundaries strongly influenced police practices and behaviour in South Africa, and how social delineations amplify and distort existing police prejudices against those communities on the other side of the boundary. Focusing on cases of high-density police operations, public-order policing and the recent policing of the COVID-19 lockdown, this book argues that poor economic conditions

combined with an increased militarisation of the SAPS and a decline in public trust in the police will result in boundaries continuing to fundamentally inform police work in South Africa. This book will be of interest to scholars and students interested in policing in post-colonial societies characterised by high levels of violence, as well as police work and police militarization. *South Africa and United Nations Peacekeeping Offensive Operations* Routledge

This new Handbook unites cartographic theory and praxis with the principles of cartographic design and their application. It offers a critical appraisal of the current state of the art,

science, and technology of map-making in a convenient and well-illustrated guide that will appeal to an international and multi-disciplinary audience. No single-volume work in the field is comparable in terms of its accessibility, currency, and scope. The *Routledge Handbook of Mapping and Cartography* draws on the wealth of new scholarship and practice in this emerging field, from the latest conceptual developments in mapping and advances in map-making technology to reflections on the role of maps in society. It brings together 43 engaging chapters on a diverse range of topics, including the history of cartography, map use

and user issues, cartographic design, remote sensing, volunteered geographic information (VGI), and map art. The title's expert contributions are drawn from an international base of influential academics and leading practitioners, with a view to informing theoretical development and best practice. This new volume will provide the reader with an

exceptionally wide-ranging introduction to mapping and cartography and aim to inspire further engagement within this dynamic and exciting field. The Routledge Handbook of Mapping and Cartography offers a unique reference point that will be of great interest and practical use to all map-makers and students of geographic information science, geography, cultural studies, and a range of related disciplines.
