Construction & Maintenance Daily Log Chris Hendrickson

This Construction and Maintenance Daily Log Book is perfect for Contractors, Supervisors, Superintendents of Job Sites. This Daily Log Book helps you track Job Progress, Equipment, Weather, Job Site Personnel, Safety Accidents and more!

*Construction Daily Site Log Book*

This practical letter sized (8.5 x 11 inch; 21.59 x 27.94 cm) daily site log has been carefully designed for foremen, forewomen, construction site managers. Ideal for keeping everything recorded: Space is left at the top of each page so that it can be clipped onto a clipboard. Designed to work with an Electronic Document Management System (EDMS). Simply give each page a document number, take a photograph and upload it directly. Record all important site related activities: weather, deliveries, work stoppages, safety incidents etc. In case of disputes, you can be sure you have the required information thus minimising claim and litigation risks. As long as you give each page its specific

dated project number it can be photographed and then uploaded to a electronic document management system (EDMS). All lines in the log book are dark grey, instead of black, so they are less distracting. If you're in construction or dirt work, this record book will help you recall details. You can go back and see the ground conditions, deliveries, contractors, equipment, etc., on site. If you keep up with your paperwork this will meet your needs. As long as you are consistent, it is admissible. Functional size: 8.5 x 11 inch; 21.59 x 27.94 cm letter size dimensions; the ideal size for all purposes. Reliable standards: Book industry perfect binding (the same standard binding as the books in your local library). Tough paperback. Crisp white paper that minimizes ink bleed-through. The book is great for either pen or pencil users. Space to record: date, unique project number, foreman name, weather conditions, visitors, schedule, problems, delays, safety issues, accidents/incidents, summary of work performed, signature, employees/contractors' names, trades, and hours worked, equipment, materials, and notes.

Construction Daily Log

This Construction Daily Logbook sized: 8.5x11 inches, 215 x279 mm, 110 pages, keeps all the important daily site information. To tell the full details of the day-to-day progress on site. Recording the shortcomings and triumphs, Resolving any Disputes concerning payments or amount of work performed and improving customer relations. Designed for every Construction Foreman, Engineer, Coordinator, Project Manager, contractor, and worker. Using this logbook, You will be able to record and track: Project name, Location, Contract info, report date and author. Weather, Temperature, Site condition. Work force Logs, Hours

worked, Over-time, Number of teams and trades. Work Tasks in progress and tasks completed. Inventory Checklist: Resources and Quantities Delivered or purchased. Equipment used and received, In Use and/or Idle and its working condition. Undated Planner, Notes and Comments. ### Construction Daily Site Log

The book is developed to provide significant information and guidelines to construction and project management professionals (owners, designers, consultants, construction managers, project managers, supervisors, contractors, builders, developers, and many others from the construction-related industry) involved in construction projects (mainly civil construction projects, commercial-A/E projects) and construction-related industries. It covers the importance of construction management principles, procedures, concepts, methods, and tools, and their applications to various activities/components/subsystems of different phases of the life cycle of a construction project. These applications will improve the construction process in order to conveniently manage the project and make the project most qualitative, competitive, and economical. It also discuss the interaction and/or combination among some of the activities/elements of management functions, management processes, and their effective implementation and applications that are essential

throughout the life cycle of project to conveniently manage the project. This handbook will: Focus on the construction management system to manage construction projects Include a number of figures and tables which will enhance reader comprehension Provide all related topics/areas of construction management Be of interest to all those involved in construction management and project management Provide information about Building Information Modeling (BIM), and ISO Certification in Construction Industry Offer a chapter on Lean construction The construction project life cycle phases and its activities/elements/subsystems are comprehensively developed and take into consideration Henri Fayol's Management Function concept which was subsequently modified by Koontz and O'Donnell and Management Processes Knowledge Areas described in PMBOK® published by Project Management Institute (PMI). The information available in the book will also prove valuable for academics/instructors to provide construction management/project management students with in-depth knowledge and guidelines followed in the construction projects and familiarize them with construction management practices.
