The winners of the Nobel Prize show how economics, when done right, can help us solve the thorniest social and political problems of our day. Figuring out how to deal with today's critical economic problems is perhaps the great challenge of our time. Much greater than space travel or perhaps even the next revolutionary medical breakthrough, what is at stake is the whole idea of the

good life as we have known it. Immigration and inequality, globalization and technological disruption, slowing growth and accelerating climate change--these are sources of great anxiety across the world, from New Delhi and Dakar to Paris and Washington, DC. The resources to address these challenges are there--what we lack are ideas that will help us jump the wall of disagreement and distrust that divides us. If we succeed, history will remember our era with gratitude; if we fail, the potential losses are incalculable. In this revolutionary book, renowned MIT economists Abhijit V. Banerjee and Esther Duflo take on this challenge, building on cutting-edge research in economics explained with lucidity and grace. Original, provocative, and urgent, *Good Economics for Hard Times* makes a persuasive case for an intelligent interventionism and a society built on compassion and respect. It is an extraordinary achievement, one that shines a light to help us appreciate and understand our precariously balanced world.

**Congo and Regional Geopolitics, 1996-2006** Scarecrow Press Spread over fifteen of the country's twenty-eight states, India's Maoist movement is now one of the world's biggest and most sophisticated extreme-left movements. Hardly a week passes without people dying in strikes and counter-strikes by the Maoists—interchangeably known as the Naxalites—and the police and paramilitary forces. In this brilliant and sobering examination of the 'Other India', Sudeep Chakravarti combines reportage,

political analysis and individual case histories as he takes us to the heart of Maoist zones in the country—areas of extreme destitution, bad governance and perpetual war.

The Holocaust - the murder of Europe's Jews by Nazi Germany -

has too often been depicted in isolation by its historians. The Final Solution: a Genocide is the first study to combine a detailed re-appraisal of the development of the genocide of the Jews with full consideration of Nazi policies against other population groups, and a comparative analysis of other modern genocides. Moving beyond a narrow focus on Nazi Germany, Donald Bloxham provides a broadperspective on a whole continent in crisis from the late nineteenth century onwards and considers the Holocaust as the culmination of a much wider history of European genocide and ethnic cleansing. Ultimately, he shows that an explanation for the Holocaust rooted exclusively in Nazism and antisemitism is necessarily inadequate when set against one prepared to give due weight to the immediate circumstances of the Second World War in eastern Europe, and to situate the Jewish genocide within the broader patterns of human behaviour in the late-modern world.

The freedom of expression and the freedom of information are the indispensable components of free media. Without these two basic rights, an informed, active, and participatory citizenry is impossible. Members of the media require special protections to enable them to operate freely in order to advocate for human rights, public discourse, and the plurality of ideas. The Handbook of Research on Combating Threats to Media Freedom and Journalist Safety is an essential reference source that evaluates how diverse threats impact on journalists' wellbeing, their right to freedom of expression, and overall media freedoms in various contexts and assesses inadequacies in national security policies,

planning, and coordination relating to the safety of journalists in different countries. Featuring research on topics such as freedom of the press, professional journalism, and media security, this book is ideally designed for journalists, news writers, editors, columnists, press, broadcasters, newscasters, government officials, lawmakers, diplomats, international relations officers, law enforcement, industry professionals, academicians, researchers, and students.

One of the most vexing issues that has faced the international community since the end of the Cold War has been the use of

force by the United Nations peacekeeping forces. UN intervention in civil wars, as in Somalia, Bosnia and Herzegovina, and Rwanda, has thrown into stark relief the difficulty of peacekeepers operating in situations where consent to their presence and activities is fragile or incomplete and where there is little peace to keep. Complex questions arise in these circumstances. When and how should peacekeepers use force to protect themselves, to protect their mission, or, most troublingly, to ensure compliance by recalcitrant parties with peace accords? Is a peace enforcement role for peacekeepers possible or is this simply war by another name? Is there a grey zone between peacekeeping and peace enforcement? Trevor Findlay reveals the history of the use of force by UN peacekeepers from Sinai in the 1950s to Haiti in the 1990s. He untangles the arguments about the use of force in peace operations and sets these within the broader context of military doctrine and practice. Drawing on these insights the author examines proposals for future conduct of UN operations, including the formulation of UN peacekeeping doctrine and the establishment of a UN rapid reaction force.

As seen in military documents, medical journals, novels, films, television shows, and memoirs, soldiers' invisible wounds are not innate cracks in individual psyches that break under the stress of war. Instead, the generation of weary warriors is caught up in wider social and political networks and institutions—families, activist groups, government bureaucracies, welfare state programs—mediated through a military hierarchy, psychiatry rooted in mind-body sciences, and various cultural constructs of masculinity. This book offers a history of military psychiatry from the American Civil War to the latest Afghanistan conflict. The authors trace the effects of power and knowledge in relation to the emotional and psychological trauma that shapes soldiers' bodies, minds, and souls, developing an extensive account of the emergence, diagnosis, and treatment of soldiers' invisible wounds.

**YOUTH COMPETITION TIMES**

This book examines a decade-long period of instability, violence

and state decay in Central Africa from 1996, when the war started, to 2006, when elections formally ended the political transition in the Democratic Republic of Congo. A unique combination of circumstances explain the unravelling of the conflicts: the collapsed Zairian/Congolese state; the continuation of the Rwandan civil war across borders; the shifting alliances in the region; the politics of identity in Rwanda, Burundi and eastern DRC; the ineptitude of the international community; and the emergence of privatized and criminalized public spaces and economies, linked to the global economy, but largely disconnected from the state - on whose territory the "entrepreneurs of insecurity" function. As a complement to the existing literature, this book seeks to provide an in-depth analysis of concurrent developments in Zaire/DRC, Rwanda, Burundi and Uganda in African and international contexts. By adopting a non-chronological approach, it attempts to show the dynamics of the inter-relationships between these realms and offers a toolkit for understanding the past and future of Central Africa.
