Perspective,
Marti Kheel
explores the
underlying
worldview of

'nature ethics, ' offering an alternative ecofeminist approach. Seeking to heal the divisions between the seemingly disparate movements and philosophies of feminism, animal advocacy, environmental ethics, and holistic health, Kheel proposes an ecofeminist philosophy that underscores the importance of empathy and care for individual beings as well

 Through its many and varied manifestations , authority has frequently played a role in the communication process in both manuscript and print. This volume explores how authority, whether religious, intellectual, political or social, has enforced the circulation of certain texts and text

versions, or acted to prevent the distribution of books, pamphlets and other print matter. It also analyzes how readers, writers and printers have sometimes rebelled against the constraints and restrictions of authority, publishing controversial works anonymously or counterfeiting authoritative texts; and how the written or printed word itself has sometimes been

perceived to have a kind of authority, which might have had ramifications in social, political or religious spheres. Contributors look at the experience of various European cultures- English, French, German and Italian-to allow for comparative study of a number of questions pertinent to the period. Among the issues explored are local and regional

factors influencing book production; the interplay between manuscript and print culture; the slippage between authorship and authority; and the role of civic and religious authority in cultural production. Deliberately conceived to foster interdisciplinary dialogue between the history of the book, and literary and cultural history, this volume takes a pan-

European perspective to explore the ways in which authority infiltrates and is in turn propagated or undermined by book culture. The ancients stole all our great ideas Springer "Wake up man, you just slept through Armageddon," she said, roughly shaking the deadweight Saladin by the shoulders. He came awake with the bleary eyed reluctance of a teenage boy being torn from a wet

dream into a hangover. ---
 The coroner surveyed the charred collection of bones and pronounced it, with astounding professional accuracy, dead. What the coroner failed to ascertain with accuracy was the true cause of death. On the file it all looked very convincing "Death by incineration", but in fact the onus for Rutherford's death lay with a man whose cranium he had recently sawn into. ---

Athena is an info-merc. She gets paid to sift. Intelligent software crafted in her fibre-optic nest, her sift engines and AI spiders have gained her a healthy profit. A client has just made the mistake of paying her too well for a score. Curiosity overtakes caution and drops her hard into an adventure that stretches from the madness within, to the drug-induced climax of the human species. A fast

epic, God Shock follows Athena inside an institute where reality is detuned; through a hidden city where pleasure has been tweaked into a weapon against the frightening assault of boredom; to the beautiful and twisted landscape of a diseased intranet; all the way to the threshold of her sanity. Luckily her sense of humor is well intact. ---

<p>The subject matter of the book is the technological framework of the Greek and Roman cultures from ca. 800 B.C. through ca. A.D. 500 in the circum-Mediterranean world and Northern Europe. Each chapter discusses a technology or family of technologies from an analytical rather than descriptive point of view, providing a critical summation of our present knowledge of the Greek and</p>	<p>Roman accomplishments in the technology concerned and the evolution of their technical capabilities over the chronological period. Each presentation reviews the issues and recent contributions, and defines the capacities and accomplishments of the technology in the context of the society that used it, the available "technological shelf," and the resources consumed. These studies</p>	<p>introduce and synthesize the results of excavation or specialized studies. The chapters are organized in sections progressing from sources (written and representation al) to primary (e.g., mining, metallurgy, agriculture) and secondary (e.g., woodworking, glass production, food preparation, textile production and leather-working) production, to technologies of social organization</p>

and interaction (e.g., roads, bridges, ships, harbors, warfare and fortification), and finally to studies of general social issues (e.g., writing, timekeeping, measurement, scientific instruments, attitudes toward technology and innovation) and the relevance of ethnographic methods to the study of classical technology. The unrivalled breadth and depth of this volume make

it the definitive reference work for students and academics across the spectrum of classical studies. *The Holy Place* The History Press The best available reference on amber is now revised and updated. Dr. Rice's Amber presents a comprehensive reference for the general collector, carver, or the scientist. She begins with the history of amber, which moves from the Stone Age

through archaeological finds, ancient writings and medieval chronicles, and then on to explore the scientific studies of amber and how it attained commercial value. Amber provides information on the cultural changes relating to amber jewelry plus the mystical powers attributed to the gem. It is updated to include information on mining in the Baltic areas as well as new

information on DNA Coding. **Now We Are Cool** Oxford University Press
 In the late nineteenth century, Germans spearheaded a worldwide effort to preserve the material traces of humanity, designing major ethnographic museums and building extensive networks of communication and exchange across the globe. In this groundbreaking study, Glenn Penny

explores the appeal of ethnology in Imperial Germany and analyzes the motivations of the scientists who created the ethnographic museums. Penny shows that German ethnologists were not driven by imperialist desires or an interest in legitimating putative biological or racial hierarchies. Overwhelmingly antiracist, they aspired to generate theories about the essential nature of

human beings through their museums' collections. They gained support in their efforts from boosters who were enticed by participating in this international science and who used it to promote the cosmopolitan character of their cities and themselves. But these cosmopolitan ideals were eventually overshadowed by the scientists' more modern, professional, and materialist

concerns, which dramatically altered the science and its goals. By clarifying German ethnologists' aspirations and focusing on the market and conflicting interest groups, Penny makes important contributions to German history, the history of science, and museum studies.

summary:
Alongside the Willendorf Venus, no ancient monument has achieved such a degree of fame as the Heathens' Gate at Carnuntum. The character image of the ruin as a gateway arch results from its long period of decay. Since the humanism of the Renaissance, generation after generation has attempted to reveal the secret of the Heathens' Gate by interpreting

sources, investigating the building and undertaking excavations. The site has been visited frequently by travellers, and has been recorded in descriptions, drawings, watercolours and copper engravings. Thus today we know that the Heathens' Gate is precisely not a gateway in the sense of a town gate or a single-gate triumphal arch, but is an antique quadriphronium or tetrapylum

(double-passage arch, in Greek tetrapylon), i.e. a building on four pillars with four passageways. This work is initially a collection, analysis and evaluation of all the available sources on the Heathens' Gate, i.e. views, descriptions, legends, attempts to reconstruct and explain. German description: Neben der Venus von Willendorf hat kein Denkmal der Antike einen so

hohen Bekanntheitsgrad erreicht wie das Heidentor von Carnuntum. Und dennoch ist dieses Baudenkmal der römischen Antike voller Ratsel und Geheimnisse. Das charakteristische Bild der Ruine als Torbogen resultiert aus seiner langen Verfallszeit. Seit dem Renaissance-Humanismus wurde von Generation zu Generation der Versuch unternommen, das Geheimnis des Heidentores

durch Quelleninterpretation, Bauuntersuchungen und Ausgrabungen zu lüften. Oftmals wurde der Standort von Bildungsreisen den, Gelehrten und Künstlern aufgesucht und in Beschreibungen, Zeichnungen, Aquarellen und Kupferstichen festgehalten. for their audience. The purpose of this volume is to bridge the interdisciplinary abyss between the study of creativity in theatre/drama and in other fields. Sharing theories, research findings, and pedagogical practices, the authors and I hope to stimulate discussion among creativity and theatre scholar/teachers, as well as multidisciplinary research. Theatre educators know from

experience that performance classes enhance student creativity. This volume is the first to bring together perspectives from multiple disciplines on how drama pedagogy facilitates learning creativity. Drawing on current findings in cognitive science, as well as drama teachers' lived experience, the contributors analyze how acting techniques train the

imagination, allow students to explore alternate identities, and discover the confidence to take risks. The goal is to stimulate further multidisciplinary investigation of theatre education and creativity, with the intention of benefitting both fields.

The breadth of National Museums Scotland's collections, together with the support of The Glenmorangie Company, puts National Museums in a unique position to reveal the role of silver in the development of the first kingdoms of Scotland. It was silver, not gold, which was the most important and powerful precious metal in Scotland for over six hundred years and, as well as showcasing beautiful objects, the book builds on the Glenmorangie Research Project to give fresh insights into this formative period of Scottish history. Teeming with merchants from all over Europe, medieval Bruges provides an early model of a great capitalist city. Bruges established a sophisticated money market and an elaborate network of agents and brokers. Moreover, it promoted co-operation between merchants of various nations. In this book James Murray explores how Bruges became the commercial capital of

northern Europe in the late fourteenth century. He argues that a combination of fortuitous changes such as the shift to sea-borne commerce and the extraordinary efforts of the city's population served to shape a great commercial centre. Areas explored include the political history of Bruges, its position as a node and network, the wool, cloth and gold trade and the role of

women in the market. This book serves not only as a case-study in medieval economic history, but also as a social and cultural history of medieval Bruges. *Corpus Cultus Cybelae Attidisque (CCCA)* Createspace Independent Publishing Platform The Celts are commonly considered to be one of the great peoples of Europe, with continuous racial, cultural and linguistic

genealogy from the Iron Age to the modern-day 'Celtic fringe'. This book shows, in contrast, that the Celts, as they have been known and understood over two thousand years, are simply the 'other' of the dominant cultural and political traditions of Europe. It is this continuous 'otherness' which lends them apparent continuity and substance. Castellani and

World Peter Lang GmbH, Internationaler Verlag Der Wissenschaften Arthur led the Britons to the brink of victory but was cut down by treachery and betrayal. Arthurian legends have since been corrupted, leading to popular but false assumptions about the king and the belief that his grave could never be found. Drawing on a vast range of sources and new

translations of early British and Gaelic poetry, Arthur explodes these myths and exposes the shocking truth. In this, the first full biography of Arthur, Simon Andrew Stirling provides a range of proofs that Artuir mac Aedain was the original King Arthur; he identifies the original Camelot, the site of Arthur's last battle and his precise burial location. For the first time ever, the role played by the

early Church in Arthur's downfall and the fall of North Britain is also revealed. This includes the Church's contribution to fabricated Arthurian history, the unusual circumstances of his burial and the extraordinary history of the sacred isle on which he was buried. Pakistan Rowman & Littlefield The classical conception of reason (or logos) has been repeatedly attacked in

the modern era. Its enemies range from Descartes, who complains that logos is not sufficiently useful or precise, to Derrida who hopes to liberate Western thought from its bondage to "logocentrism." At least since the time of Nietzsche, Plato has been damned as the chief architect of the classical conception of logos. He is accused of overvaluing reason and thereby

devaluing the other, more human aspects of life. As it was originally formulated in Nietzsche's *The Birth of Tragedy*, Plato has been taken to be the arch-enemy of tragedy, which for Nietzsche was the most life-affirming of all the art forms of Greek culture. Originally published in 1990, *The Tragedy of Reason* defends Plato against his accusers. Employing a mode of exposition

which exhibits Plato's position, Roochnik presents the Platonic conception of logos in confrontation with texts by Homer, Hesiod, Heraclitus, Aristotle, Descartes, Porty, and Derrida. In clear language, unencumbered by technical terminology, Roochnik shows that Platonic conception of logos is keenly aware of the strength of its opponents. The result is a presentation

of Plato as a "tragic philosopher" whose conception of logos is characterized by an affirmation of its own limits as well as its goodness. Of other kind than the normal inducement of interest and increasing skill, there exists a continual pressure upon the artist of which he is sometimes partially conscious but rarely entirely aware. He learns early or

late in his career that power of literal reproduction (such as that of the photographic apparatus) is not more than slightly useful to him. He is compelled to find out from his artist predecessors the existence, in representation of real form, of super-sessions of immediate accuracies; he discovers within himself a selective conscience and he is satisfied, normally, in large measure

by the extensive field afforded by this broadened and simplified beyond this is a region and that a much greater one, for exploration. The objective understanding, as we see, has to be attacked by the artist and a subconscious method, for correction of conscious visual accuracy, must be used. No amount of manual skill and consciousness of error will produce good

drawing. A recent book on drawing by a well-known painter is a case in point; there the examples of masters of draughtsmanship may be compared with the painter-author's own, side by side, and the futility of mere skill and interest examined. Therefore to proceed further, it is necessary to dispose of the subject in art also (that is to say the subject in the illustrative or complex sense). Thus

to clear the mind of inessentials permits through a clear and transparent medium, without prepossession of any kind, the most definite and simple forms and ideas to attain expression. wirtschaftliche Zusammenhänge verstehen und einen Einblick in volkswirtschaftliches Denken und in betriebswirtschaftliche Logik erhalten? „Die Wirtschaft im Überblick“ bietet all das und dient als integrative Einführung in die Wirtschaftswissenschaften bezogen auf Österreich. Die Themen umfassen u. a. eine Einführung in die Markt- und Preislehre, eine Betrachtung	des Inlandsprodukts und weiterer Wohlstandskriterien, Konjunktur, Beschäftigung und Geld bis hin zu den zentralen wirtschaftspolitischen Themenfeldern wie Finanz-, Geld-, Außenhandels- und Sozialpolitik. Darüber hinaus werden die institutionellen Rahmenbedingungen unternehmerischen Handelns dargestellt.	Dem Autor gelingt es, die komplexen Sachverhalte leicht verständlich darzustellen und dabei gleichzeitig in die Tiefe zu gehen. Das Buch in seiner zweiten Auflage überzeugt durch seine praxisrelevante Ausrichtung und sein aktuelles Datenmaterial sowie die Darstellung jüngster wirtschaftswissenschaftlicher und -politischer Entwicklungen.
