

Nwu 2015 Application Forms

When somebody should go to the books stores, search foundation by shop, shelf by shelf, it is truly problematic. This is why we give the books compilations in this website. It will very ease you to look guide **Nwu 2015 Application Forms** as you such as.

By searching the title, publisher, or authors of guide you in fact want, you can discover them rapidly. In the house, workplace, or perhaps in your method can be all best area within net connections. If you seek to download and install the Nwu 2015 Application Forms, it is unquestionably simple then, previously currently we extend the join to buy and create bargains to download and install Nwu 2015 Application Forms thus simple!

A typology of questions in Northeast Asia and beyond IGI Global

In considering diffusion from a global perspective, this book provides timely new insights into its application in a variety of fields and at many levels of both legal and non-legal orderings. This collection contributes to the wider theoretical debate concerning the movement of law and legal norms by engaging with concrete examples of legal diffusion, in jurisdictions as diverse as Albania, the Czech Republic, Poland and Kuwait. These examples, taken together, provide a comprehensive illustration of the theoretical debates concerning the diffusion of laws and norms in terms of both process and form. This international, multi-disciplinary and multi-methodological volume brings together scholars from law and social science with experience in mixed and hybrid jurisdictions, and advances the conversation about legal and normative diffusion across the academy. It represents a robust challenge to many preconceived ideas about legal movement and, as such, will be of interest to academics and students working in the fields of Law, Sociology, Anthropology, Political Science, Legal Education and comparative method.

Plant responses to environmental stress are governed by complex molecular and biochemical signal transduction processes, which act in coordination to determine tolerance or sensitivity at the whole plant level. Upon exposure to abiotic stress, plants express a sophisticated coordinated response to reprogram interconnected defense networks and metabolic pathways, by alterations in the transcription, translation, and post-translational modification of defense-related genes and proteins. Traditionally, physiological and phenotypic responses were the major ones to be collected in plant stress biology. However, modern studies include the identification of key

genes that influence stress tolerance and plant growth under the imposing stress and the verification of gene functions using knock out mutants or overexpression lines. In addition, genomics has become a necessary tool for the understanding of plant stress responses at the whole genome levels. The identification of stress-tolerant plant resources and the investigation of the functional role of the genetic variants is also a valuable tool in this research field. Recently, the advent of CRISPR/Cas genome editing technology, enables these variations to be introduced in crops for improved stress tolerance traits. Through the understanding of the molecular mechanisms involved in plant signaling in response to abiotic stress and crop performance characters under stress conditions, we hope to open new ways for the breeding of superior crops.

Curriculum Development and Online Instruction for the 21st Century Springer

In today's society, it is very common for decisions that influence us all to be made by a combination of interested parties, all with their own agenda. In this instance, how can we be sure that the decision is the correct one, not just decided by the group with the most political influence or most money? Such groups have now become fundamental decision-making units within and between organisations in most societies and are more often than not very complex structures. The use of Geographic Information Systems (GIS) Groupware can be used in several practical contexts to make sure that spatial decision problems are overcome in the most effective way. A fundamental aspect of a spatial decision problem is the matter of location. The complexity of spatial decision problems result from the multiplicity of stakeholders involved, their often conflicting interests, and the intangible variables of the decision environment. Examples of such problems include: where to locate a public facility, which brownfield redevelopment strategy to choose, which sites to select for environmental restoration, or which comprehensive land use plan to adopt.

Good solutions to such problems -if they exist at all- are characterised by a certain minimum level of secretarial support; hence the decision-making process should involve experts, citizens, and interest groups alike. Such a collaborative approach to spatial decision-making needs methodology, tools, and application examples to inspire its adoption and more widespread use. This book sets out the key to the collaborative spatial decision-making approach: its theoretical basis, the requisite tools, and a number of application examples. GIS professionals and researchers should find this an invaluable guide to an emerging area of GIS

Introducing the Framework, and Case Studies from Africa and Eurasia Springer

This book constitutes the refereed conference proceedings of the 8th International Conference on Image and Graphics, ICIG 2015 held in Tianjin, China, in August 2015. The 164 revised full papers and 6 special issue papers were carefully reviewed and selected from 339 submissions. The papers focus on various advances of theory, techniques and algorithms in the fields of images and graphics.

10th European Conference on Information Systems Management Springer Nature
This study investigates the distribution of linguistic and specifically structural diversity in Northeast Asia (NEA), defined as the region north of the Yellow River and east of the Yenisei. In particular, it analyzes what is called the grammar of questions (GQ), i.e., those aspects of any given language that are specialized for asking questions or regularly combine with these. The bulk of the study is a bottom-up description and comparison of GQs in the languages of NEA. The addition of the phrase and beyond to the title of this study serves two purposes. First, languages such as Turkish and Chuvash are included, despite the fact that they are spoken outside of NEA, since they have ties to (or even originated in) the region. Second, despite its focus on one area, the typology is intended to be applicable to other languages as well. Therefore, it

makes extensive use of data from languages outside of NEA. The restriction to one category is necessary for reasons of space and clarity, and the process of zooming in on one region allows a higher resolution and historical accuracy than is usually the case in linguistic typology. The discussion mentions over 450 languages and dialects from NEA and beyond and gives about 900 glossed examples. The aim is to achieve both a cross-linguistically plausible typology and a maximal resolution of the linguistic diversity of Northeast Asia.

[A scholarly contribution to educational praxis](#) WIT Press

The chapters in this book reflect on the practice of using narratives to understand individual and social reality. They all reveal dimensions of the same concrete reality: contemporary society of Central South Africa. Except for two, all the chapters originated from research in the program The Narrative Study of Lives, situated in the Department of Sociology at the University of the Free State in Bloemfontein, South Africa. Each chapter opens a window on an aspect of everyday life in Central South Africa. Each window displays the capacity of the narrative as a methodological tool in qualitative research to open up better understandings of everyday experience. The chapters also reflect on the epistemological journey towards unwrapping and breaking open of meaning. Narratives are one of many tools available to sociologists in their quest to understand and interpret meaning. But, when it comes to deep understanding, narratives are particularly effective in opening up more intricate levels of meaning associated with emotions, feelings, and subjective experiences.

Inclusive education has been phased into South Africa since 2001 but relies heavily upon adequate support services to support learners and teachers experiencing barriers to learning and development. This book focuses on the different levels of support provided in South African education - from School-based Support Teams to District-based Support Teams through to special and full-service schools, and how these could be reconceptualised to provide improved support to learners and teachers. Current research indicates that inclusive education is being implemented in varied and fragmented forms across the country, and the point of departure of this work is that education support services need to be improved and reconceptualised to ensure better support for inclusive education.

The Handbook of Korean Linguistics presents state-of-the-art overviews of the linguistic research on the Korean language.

- Structured to allow a range of theoretical perspectives in addressing linguistic phenomena
- Includes chapters on Old Korean and Middle Korean, present-day language policies in North and South Korea, social aspects of Korean as a heritage language, and honorifics
- Indispensable and unique resource not only for those studying Korean linguistics but cross-linguistic research in general

Better urban transport systems are needed to achieve a healthier environment and as a result, a wide range of research has originated from many different countries. These studies highlight the importance of innovative systems, new approaches and original ideas, which need to be thoroughly tested and critically evaluated before they can be implemented in practice. To address the need to solve important pollution problems the papers included in this book focus on the relationship with urban transport. There is also a growing need for integration with telecommunications systems and IT applications in order to improve safety, security and efficiency. The variety of topics covered in this volume reflects the complex interaction of the urban transport systems with their environment and the need to establish integrated strategies. The aim is to arrive at optimal socio-economic solutions while reducing the negative environmental impacts of current transportation systems.

[Death and Garden Narratives in Literature, Art and Film: Song of Death in Paradise](#) explores the combination of two motifs, death and gardens, to show how the two subjects are intertwined and used in various media and cultural contexts. Using cultural, literary, film, and art history theories, the contributors analyze various death and garden sceneries in literary works by Arthur Machen, Agatha Christie, J.K. Rowling, as well as in superhero comics, films, and cultural and art contexts such as Ian Hamilton Finley's "Little Sparta," the poetic verses from the Karoo Desert National Botanical Garden in South Africa, and the Australian wilderness.

This proceeding constitutes the thoroughly refereed proceedings of the 1st International Conference on Combinatorial

and Optimization, ICCAP 2021, December 7-8, 2021. This event was organized by the group of Professors in Chennai. The Conference aims to provide the opportunities for informal conversations, have proven to be of great interest to other scientists and analysts employing these mathematical sciences in their professional work in business, industry, and government. The Conference continues to promote better understanding of the roles of modern applied mathematics, combinatorics, and computer science to acquaint the investigator in each of these areas with the various techniques and algorithms which are available to assist in his or her research. We selected 257 papers were carefully reviewed and selected from 741 submissions. The presentations covered multiple research fields like Computer Science, Artificial Intelligence, internet technology, smart health care etc., brought the discussion on how to shape optimization methods around human and social needs.

[Gis for Group Decision Making](#) Routledge

The International Student Conference in Tourism Research (ISCONTOUR) offers students a unique platform to present their research and establish a mutual knowledge transfer forum for attendees from academia, industry, government and other organisations. The annual conference, which is jointly organized by the IMC University of Applied Sciences Krams and the Management Center Innsbruck, takes place alternatively at the locations Krams and Innsbruck. The conference research chairs are Prof. (FH) Mag. Christian Maurer (University of Applied Sciences Krams) and Prof. (FH) Mag. Hubert Siller (Management Center Innsbruck). The target audience include international bachelor, master and PhD students, graduates, lecturers and professors from the field of tourism and leisure management as well as businesses and anyone interested in cutting-edge research of the conference topic areas. The proceedings of the 9th International Student Conference in Tourism Research include a wide variety of research topics, ranging from consumer behaviour, tourist experience, information and communication technologies, marketing, destination management, and sustainable tourism management.

[Resilience: Life Events, Trajectories and The Brain](#) Frontiers Media SA

Worldwide, in Africa and in South Africa, the importance of the doctorate has increased disproportionately in relation to its share of the overall graduate output over the past decade. This heightened

attention has not only been concerned with the traditional role of the PhD, namely the provision of future academics; rather, it has focused on the increasingly important role that higher education and, particularly, high-level skills is perceived to play in national development and the knowledge economy. This book is unique in the area of research into doctoral studies because it draws on a large number of studies conducted by the Centre of Higher Education Trust (CHET) and the Centre for Research on Evaluation, Science and Technology (CREST), as well as on studies from the rest of Africa and the world. In addition to the historical studies, new quantitative and qualitative research was undertaken to produce the evidence base for the analyses presented in the book. The findings presented in Doctoral Education in South Africa pose anew at least six tough policy questions that the country has struggled with since 1994, and continues to struggle with, if it wishes to gear up the system to meet the target of 5 000 new doctorates a year by 2030. Discourses framed around the single imperatives of growth, efficiency, transformation or quality will not, however, generate the kind of policy discourses required to resolve these tough policy questions effectively. What is needed is a change in approach that accommodates multiple imperatives and allows for these to be addressed simultaneously.

Urban Transport Systems Bloomsbury Publishing

Roland Barthes declared that “the author is dead.” Professor Zhang Jiang challenges this statement by asking “is the author really dead?” In contemporary Western theories of literature and art, the relationship among the author, the text and the reader is not only a theoretical issue, but a matter of epistemology and philosophy with a broad background and rich connotations. Is the Author Really Dead? Textual Research into Contemporary Western Literary Theories analyzes the inadequacies and problems of contemporary Western literary theory and calls for realignment in this field. It argues that the root of the insurmountable conflict between Western literary theory and Chinese literary theory lies in what Professor Zhang terms “compulsory interpretation,” the recognition and repudiation of which should form the cornerstone of reconstructing contemporary Chinese literary theory.

ICCAP 2021 AOSIS

Technology can be a powerful tool for transforming learning. It can help affirm and advance relationships between

educators and students, reinvent approaches to learning and collaboration, shrink long-standing equity and accessibility gaps, and adapt learning experiences to meet the needs of all learners. Technology-Supported Teaching and Research Methods for Educators provides innovative insights into the utilization and maintenance of technology-supported teaching and research methods for educators. The content within this publication represents the work of e-learning, digital technologies, and current issues and trends in the field of teaching and learning in the context of contemporary technologies. It is a vital reference source for school educators, professionals, school administrators, academicians, researchers, and graduate-level students seeking coverage on topics centered on the integration of effective technologies that will support educators and students.

ISCONTOUR 2023 Tourism Research Perspectives IGI Global

This publication contains original research targeting scientific specialists in the field of education, through research endeavours grounded on a philosophical basis, as well as being embedded in the empirical. The research methodology of each chapter emanates from applicable philosophical assumptions in the form of an applicable theoretical and conceptual framework. The latter forms a firm basis for the application of sound empiricism. The content of this book adds to the body of scholarly knowledge in education. In his evaluation of the book, Acting Executive Dean, Faculty of Education and Training, Professor Akpovire Oduaran, made the following remarks: ‘To a large extent, the ideas put together in this book have come from data generated not just from literature found in books and journals but actual interactions with educators and the learning environment. So then, what the reader is offered in this volume is the articulation of ideas that have been interrogated, structured and presented in surprisingly simplistic and yet incisive and academically enriching content that can match the standards of scholarship that is available in the Western World. Yet, what makes this book so welcome, relevant and timely, is the fact that it is built around Afrocentric theories and practices such as one may find in imported literature.’

Research in Attacks, Intrusions, and Defenses American Academic Press

The publication provides the first comprehensive text that reflects on a century of the development of geography as an academic discipline at South African universities. The book showcases a broad

and textured review of South Africa's geography departments, their staff members, their times, and the different Geographies they engaged in. The book lays the foundation from which more expansive individual departmental histories can be written in the future.

Reconceptualising education support services in South Africa Varna University of Management

Mycotoxins are secondary metabolites produced by the fungi of different species (mainly *Aspergillus*, *Fusarium*, and *Penicillium*), with toxic effects for humans and animals. These mycotoxins can contaminate food and feed. The European Union (EU) has established the maximum permitted or recommended levels for well-known mycotoxins in different foodstuffs. However, there are other mycotoxins that are not included in the regulations: the “emerging mycotoxins” (whose toxicity is still not clear), and the “modified or masked mycotoxins” (produced as a consequence of a detoxification strategy of the host plant of the fungus or during food processing). These mycotoxins could pose a risk and should also be taken into account. In order to assure consumers’ health, analytical methods for the accurate determination of mycotoxins in different food matrices and feeds are required. In this sense, liquid chromatography tandem mass spectrometry (LC-MS/MS) is a powerful tool for their unique identification and quantification. Moreover, the use of high-resolution mass spectrometry (HRMS) allows one to identify novel mycotoxins and targeted/untargeted approaches for study. This Special Issue compiles recent applications of LC-MS/MS in mycotoxin studies, as well as the development and validation of new analytical methods for their identification and quantification in different food matrices and feed, occurrence studies, and the biomonitoring of mycotoxins and their metabolites in biological fluids.

The Cnidaria, Past, Present and Future John Wiley & Sons

This volume presents a broad panorama of the current status of research of invertebrate animals considered belonging to the phylum Cnidaria, such as hydra, jellyfish, sea anemone, and coral. In this book the Cnidarians are traced from the Earth’s primordial oceans, to their response to the warming and acidifying oceans. Due to the role of corals in the carbon and calcium cycles, various aspects of cnidarian calcification are discussed. The relation of the Cnidaria with Mankind is approached, in accordance with the Editors’ philosophy of

bridging the artificial schism between science, arts and Humanities. Cnidarians' encounters with humans result in a broad spectrum of medical emergencies that are reviewed. The final section of the volume is devoted to the role of Hydra and Medusa in mythology and art.

Self-directed multimodal learning in higher education

BoD - Books on Demand

An in-depth look at the changing sociolinguistic dynamics that have influenced South African society. To date, there has been no published textbook which takes into account changing sociolinguistic dynamics that have influenced South African society. Multilingualism and Intercultural

Communication breaks new ground in this arena. The scope of this book ranges from macro-sociolinguistic questions pertaining to language policies and their implementation (or non-implementation) to micro-sociolinguistic observations of actual language-use in verbal interaction, mainly in multilingual contexts of Higher Education (HE). There is a gradual move for the study of language and culture to be taught in the context of (professional) disciplines in which they would be used, for example, Journalism and African languages, Education and African languages, etc. The book caters for this growing market. Because of its multilingual nature, it caters to English

and Afrikaans language speakers, as well as the Sotho and Nguni language groups – the largest languages in South Africa [and also increasingly used in the context of South African Higher Education]. It brings together various inter-linked disciplines such as Sociolinguistics and Applied Language Studies, Media Studies and Journalism, History and Education, Social and Natural Sciences, Law, Human Language Technology, Music, Intercultural Communication and Literary Studies. The unique cross-cutting disciplinary features of the book will make it a must-have for twenty-first century South African students and scholars and those interested in applied language issues.
