Very little has yet been written about the cultural or economic contributions of woodcarving to people's livelihoods or the consequences of felling hardwood and softwood trees for the international woodcarving trade.

Carving Out a Future is the first examination of this trade and its critical links to rural livelihoods, biodiversity, conservation, forestry and the international trade regime. A range of case studies from Australia, Bali, India, Africa and Mexico provides a lens for examining the critical

issues relating to the significant impacts of woodcarving on forests, conservation efforts, the need to promote sustainable rural livelihoods and efforts to promote trade so that skilled artisans in developing countries get a fair economic return. Livelihoods, Carving and Conservation * Global Overview * The Case of Woodcarving in Kenya * Drums and Hornbills * Sculpture and Identity * Carving Wood in Southern Zimbabwe * The Kiaat Woodcrafters of Bushbuckridge, South Africa * Carvers, Conservation and Certification in India * Colour, Sustainability and Market Sense in Bali * Aboriginal Woodcarvers in Australia *

Bursera Woodcarving in Oaxaca, Mexico * Linaloe Wood Handicrafts * Learning from a Comparison of Cases * Carving, Sustainability and Scarcity * Certification of Woodcarving * Planning for Woodcarving in the 21st Century * **The Scientific Monthly** Texas A&M University Press This study is the culmination of seven years research into the Carved Stone Balls of Late Neolithic Scotland. It is the first study of these enigmatic artefacts since that undertaken by Dorothy Marshall in 1977 and includes all currently known examples in both museums and private hands, described and analysed in considerable

detail.

Parliamentary Papers

HarperCollins

This book discusses the science behind various elements of downhill skiing, particularly the carve turn. The chapters examine case studies of famous sports moments, explain how the athletes perform these actions, and document the history of how scientists, doctors, and coaches have been working to make these sports safer. Sidebars include thought-provoking trivia. Questions in the backmatter ask for text-dependent analysis. A timeline provides history, key developments, and advancements associated with the sport.

The Science of Society

Good Press

Reflections on the metaphysics and epistemology of classification from a distinguished group of philosophers. Contemporary discussions of the success of science often invoke an ancient metaphor from Plato's Phaedrus: successful theories should "carve nature at its joints." But is nature really "jointed"? Are there natural kinds of things around which our theories cut? The essays in this volume offer reflections by a

distinguished group of philosophers on a series of intertwined issues in the metaphysics and epistemology of classification. The contributors consider such topics as the relevance of natural kinds in inductive inference; the role of natural kinds in natural laws; the nature of fundamental properties; the naturalness of boundaries; the metaphysics and epistemology of biological kinds; and the relevance of biological kinds to certain questions in ethics. *Carving Nature at Its Joints* offers both breadth and thematic unity, providing a sampling of state-of-the-art work in contemporary analytic philosophy that will be of interest to a wide audience of scholars and students concerned with classification.

Carving and Painting a Northern Cardinal with Bob Guge Stackpole Books

First published in 2012, this catalogue presents fifty-six Etruscan, Greek, and Italic carved ambers from the Getty Museum's collection—the second largest body of this material in the United States and one of the most important in the world. The ambers date

from about 650 to 300 BC. The catalogue offers full description of the pieces, including typology, style, chronology, condition, and iconography. Each piece is illustrated. The catalogue is preceded by a general introduction to ancient amber (which was also published in 2012 as a stand-alone print volume titled *Amber and the Ancient World*). Through exquisite visual examples and vivid classical texts, this book examines the myths and legends woven around amber—its employment in magic and medicine, its transport and carving, and its incorporation into jewelry, amulets, and other objects of prestige. This publication highlights a group of remarkable amber carvings at the J. Paul Getty Museum. This catalogue was first published in 2012 at museumcatalogues.getty.edu/amber/. The present online edition of this open-access publication was migrated in 2019 to www.getty.edu/publications/ambers/; it features zoomable, high-resolution photography; free PDF, EPUB, and Kindle/MOBI downloads of the book; and JPG downloads of the catalogue images. *Principles of Meat Science* University Press of

Stories in Stone

Routledge

A renowned scientist is sipping his drink in a five star suite when he drops dead. Was it a cardiac arrest or a well-planned murder? When a neuroscientist is found dead a few days later, Inspector Abinay Chaturvedi is perplexed at the common evidence found at both the crime scenes - a carved arrow with a mysterious engraving. As Abinay and his trusted man Lance set out to unravel the mystery, a young and charismatic historian hints at the possible hand of a two-thousand-year-old secret society in the killings. Is there really a secret society working to safeguard dharma? Is Abinay ready to unravel the centuries-old secret? Will Abinay and his team reach the bottom of the mystery of the carved arrow? *Faceless: The Mystery of the Carved Arrow* is an intriguing journey of an honest policeman trying to find the truth, and the nail-biting aftereffects of man's challenging nature with science.

Carving Out a Future Fox

Vasily Konovalenko's unique, dynamic, and theatrical sculptures stand alone in the gem-carving world—bawdy but not salacious, political but not diplomatic, boisterous and exuberant yet occasionally sensitive. *Stories in Stone* offers the first comprehensive treatment of the life of this little-known Russian artist and the remarkable history of his wonderful sculptures. Part art catalogue and part life history, *Stories in Stone* tells the tale of Konovalenko's impressive works, explaining their conception, creation, and symbolism. Each handcrafted figure depicts a scene from life in the Soviet Union—a bowman hunting snow geese, a woman reposing in a hot spring surrounded by ice, peasants spinning wool, a pair of gulag prisoners sawing lumber—painstakingly rendered in precious stones and metals. The materials used to make the figurines are worth millions of dollars, but as cultural artifacts, the sculptures are priceless. Author Stephen Nash draws upon oral history and archival research to detail the life of their creator, revealing a rags-

to-riches and life-imitates-art narrative full of Cold War intrigue, Communist persecution, and capitalist exploitation. Augmented by Richard M. Wicker's exquisite and revelatory photographs of sixty-five Konovalenko sculptures from museums, state agencies, and private collections around the world, *Stories in Stone* is a visually stunning glimpse into a unique corner of Russian art and cultural history, the craft and science of gem carving, and the life of a Russian artist and immigrant who loved people everywhere. Co-published with the Denver Museum of Nature & Science, home to the most significant collection of Russian gem-carving sculptures by Vasily Konovalenko in the world. Joy of Chip Carving MIT Press

Anthropology Maker Media, Inc.

Mary Slusser's work on the history of the art and culture of Nepal is marked by a series of discoveries and critical reassessments that have advanced our comprehension of this extraordinarily rich culture and art in a revolutionary way. In *The Antiquity of Nepalese Wood Carving*, Dr. Slusser drastically revises our perception of the marvelous wooden sculpture of the Kathmandu Valley.-- Previously considered to be no earlier than the thirteenth century, the earliest of these wooden masterpieces have now been clearly demonstrated to date from the sixth or seventh

century, the time of the Licchavis, lords of Nepal from about 300 to 850. Slusser has used an important scientific tool, radiocarbon dating, to help realign -- and correct -- our overly conservative accepted perceptions of the antiquity of Nepalese wood sculpture. The book is bolstered by the meticulous and painstaking research and documentation that are among the hallmarks of Slusser's works. It is also enriched by her extraordinary photographic archive. Beautiful struts and architectural details that have long been missing from the sites where Slusser first saw them are shown once again in situ in this work, and new photographs, largely the work of Neil Greentree, reveal a wealth of previously unsuspected detail. Also included is an essay by Paul Jett that is both a brief explanation of the science of radiocarbon testing and a validation of the revised dating of Nepalese wood carving proposed in the study.-- Mary Shepherd Slusser is the author of an authoritative history of the culture of the Kathmandu Valley, *Nepal Mandala*. --Paul Jett is director of conservation

and scientific research at the Freer/Sackler Gallery, Smithsonian Institution.- *The Science of Prosperity* Cherry Lake step-by-step instructions from world-class carvers take you from raw block to finished bird. Lay-out, carving, detailing, mounting, and painting all illustrated with color photos.

Carved Histories Srishthi Publishers & Distributors This comprehensive guide examines the personal histories, roles, and personalities that played into the traditional cultural art of carving. It also traces the influence of European patronage and the ensuing tourist trade upon this art form, as many Maori carvers began styling and catering their product to meet their clients' aesthetic desires. Included is a discussion of the establishment of the government-sponsored Rotorua School of Maori Art in 1928, which appointed as the main tutor Eramiha Kapua, a Ngati Tarawhai carver, thus helping his own traditional tribal art to make the transition into a modern "national" art.

Carving a Niche Archaeopress Publishing Ltd Each vol. contains a list of

members. *Reproductions of carved ivories. A priced inventory of the casts in 'fictile ivory' in the South Kensington museum* AOSIS Vols. 1-3 paged continuously. Vol. 4 by W.G. Sumner, A.G. Keller, and M.R. Davie."Published under the auspices of the Sumner Club on the foundation established in memory of Philip Hamilton McMillan of the class of 1894, Yale College." "Bibliographical note": v. 4, p. [1193]-1268. *Faceless: The Mystery of the Carved Arrow* Getty Publications The United States Military Academy at West Point is one of America's oldest and most revered institutions. Founded in 1802, its first and only mission is to prepare young men—and, since 1976, young women—to be leaders of character for service as commissioned officers in the United States Army. West Point's success in accomplishing that mission has secured its reputation as the foremost leadership-development institution in the world. An Academy promotional poster says it this way: "At West Point, much of the history we teach was made by people we taught."

Carved from Granite is the story of how West Point goes about producing military leaders of character. An opening chapter on the Academy's nineteenth-century history provides context for the topic of each subsequent chapter. As scholar and Academy graduate Lance Betros shows, West Point's early history is interesting and colorful, but its history since then is far more relevant to the issues—and problems—that face the Academy today. Drawing from oral histories, archival sources, and his own experiences as a cadet and, later, a faculty member, Betros describes and assesses how well West Point has accomplished its mission. And, while West Point is an impressive institution in many ways, Betros does not hesitate to expose problems and challenge long-held assumptions. In a concluding chapter that is both subjective and interpretive, the author offers his prescriptions for improving the institution, focusing particularly on the areas of governance, admissions, and intercollegiate athletics. Photographs, tables, charts, and other graphics

aid the clarity of the discussion and lend visual and historical interest. Carved from Granite: West Point since 1902 is the most authoritative history of the modern United States Military Academy written to date. There will be lively debate over some of the observations made in this book, but if they are followed, the author asserts that the Academy will emerge stronger and better able to accomplish its vital mission in the new century and beyond.

Wood Carving with Suggestions in Chip Carving McGill-Queen's Press - MQUP

Globally bestselling Divergent author Veronica Roth delivers a breathtaking fantasy featuring an unusual friendship, an epic love story, and a galaxy-sweeping adventure. #1 New York Times bestseller * Wall Street Journal bestseller * USA Today bestseller * #1 IndieBound bestseller

Praise for Carve the Mark: "Roth skillfully weaves the careful world-building and intricate web of characters that distinguished Divergent." —VOYA (starred review)

"Roth offers a richly imagined, often brutal world of political intrigue

and adventure, with a slow-burning romance at its core." —ALA Booklist

Cyra Noavek and Akos Kereseth have grown up in enemy countries locked in a long-standing fight for dominance over their shared planet. When Akos and his brother are kidnapped by the ruling Noavek family, Akos is forced to serve Cyra, the sister of a dictator who governs with violence and fear. Cyra is known for her deadly power of transferring extraordinary pain unto others with simple touch, and her tyrant brother uses her as a weapon against those who challenge him. But as Akos fights for his own survival, he recognizes that Cyra is also fighting for hers, and that her true gift—resilience—might be what saves them both. When Akos and Cyra are caught in the middle of a raging rebellion, everything they've been led to believe about their world and themselves must be called into question. But fighting for what's right might mean betraying their countries, their families, and each other. When the time comes, will they choose loyalty or love? And don't miss *The Fates Divide*, Veronica Roth's powerful follow-up novel!

CARVE SKY MIT Press

This book sheds light on how humans deal with adversity, especially in uncertain and turbulent times, as seen during the COVID-19 pandemic. Resilience theory has become popular in scholarly discourse, and the term is difficult to define as so many opinions exist. This book aims to engage critically with resilience theory as a scholarly debate from the unique vantage point of the world of social work as well as theology. This specific aspect of originality contributes to the generation of new knowledge in the broad field of social sciences and humanities. The inception of the book stems from an interdisciplinary conference held at Huguenote Kollege, Wellington, where scholars from social work as well as theology engaged in a discourse on resilience. Professor Adrian van Breda, a specialist in resilience theory and from the social work department of the University of Johannesburg, was one of the keynote speakers, inspiring scholars to understand what is meant by resilience. Professor Yolanda Dreyer from the

University of Pretoria and a seasoned theologian and prolific writer on trauma and resilience, was also a keynote speaker, providing insights from a theological perspective. The collaboration between these two fields of thought is unique and rendered new insights into engaging with resilience. Different methodologies and perspectives from researchers are prevalent as contributors are from different scholarly fields. The book ranges from linguistical, liturgical, philosophical, practical, autoethnographical, anthropological, sociological, and online methodological approaches contributing to ways to deal with traumatic, turbulent and trying times. The book is divided into four main themes that stood out from the results obtained at the conference, namely, (1) religious imagination and resilience, (2) communities and resilience, (3) online teaching and resilience, and (4) the resilience of philosophical questions. *Annual Report* Auckland

University Press
3D printing has been the hot topic in the maker world for years now, but there's another type of desktop manufacturing that's become the go-to choice for anyone who needs durable results fast. Instead of slowly depositing layers of plastic, a 3D carver starts with a solid block of material and carves it away using a rotating metal bit. It's faster than 3D printing, offers a wider choice of materials, and creates durable, permanent parts that look great. This book covers the basics of designing and making things with a 3D carver, and gives you several projects you can build yourself including a guitar, clock, earrings, and even a skateboard. Getting Started with 3D Carving Kendall Hunt
