Engineered Performance Standards, Public Works Maintenance, Engineer's Manual, NavDocks P-700.0 Routledge
This new handbook, with contributions from experts around the world, is the most comprehensive treatise on work design and job analysis practice and research in over 20 years. The handbook, dedicated to Sidney Gael, is the next generation of Gael's successful Job Analysis Handbook for Business, Industry and Government,

published by Wiley in 1988. It consists of four parts: Methods, Systems, Applications and Research/Innovations. Finally, a tightly integrated, user-friendly handbook, of interest to students, practitioners and researchers in the field of Industrial Organizational Psychology and Human Resource Management. Sample Chapter available: Chapter 24, Training Needs Assessment by Eric A. Surface is available for download.

Fundamentals of Work Measurement
Corwin Press

This book will provide a quick reference on Work Measurement. While the nature of

the work may differ, measuring work is fundamental to any industrial or service activity. It's needed to determine such things as the amount a person should be paid, how much time should it take to perform an activity, what is an acceptable days' work, or how any two or more methods or designs compare. This book provides non-industrial engineers with the why and the how work is measured in order to perform their jobs.

Cost Control and Information Systems

International Labour Organization
The purpose of this manual is to standardize instructions, methods,

terminology and standard time data applicable to work measurement and the development of labor performance standards. The use of this manual is intended to: a. Maximize the productivity of industrial/management engineering personnel by providing a more rapid means of establishing labor performance standards and eliminating duplication in labor performance standards development. b. Foster the increased use of engineered performance standards by making available standard time data of stated accuracy and reliability structured for maximum ease of application. c. Promote appropriate application of more efficient methods of performing work. d. Provide uniformity in labor performance standards development by standardizing the application of various work measurement techniques. e. Facilitate communication by providing common terminology and definitions.
